

VELAGAPUDI RAMAKRISHNA SIDDHARTHA ENGINEERING COLLEGE

CIVIL ENGINEERING [VR23] **SCHEME OF INSTRUCTIONS** **B.Tech. PROGRAMME [VR23]**

**B.Tech. Degree Programs Applicable for the batch of students admitted from the
Academic Year 2023-24**

**VELAGAPUDI RAMAKRISHNA
SIDDHARTHA ENGINEERING COLLEGE**
(Autonomous, Accredited with 'A+' grade by NAAC)
Affiliated to Jawaharlal Nehru Technological University Kakinada
Approved by AICTE & ISO 21001: 2018 Certified
Kanuru, Vijayawada -520 007, Andhra Pradesh
☎: 0866 2582333
www.vrsiddhartha.ac.in

INSTITUTION VISION

To be a Centre of Excellence in Education, Innovation and Research with Global presence in Arts, Science, Technology, Medicine, Management, Legal Studies and Social Studies in enriching the frontier areas of National and International Importance.

INSTITUTION MISSION

- To create a transformative educational experience for students focused on problem solving skills; communication abilities, and interpersonal relations and leadership.
- To cultivate a vibrant university community for attracting and retaining diverse, world-class talent creating a collaborative environment open to the free exchange of ideas where research, creativity, innovation and entrepreneurship can flourish and ensuring individuals to achieve their full potential.
- To impact society in a pragmatic manner - regionally, nationally and globally - by engaging with industry, outstanding national and international universities and research organizations.
- To be a global University that nurtures excellence in education and innovation for creating a knowledgeable society.

DEPARTMENT VISION

To achieve excellence and quality in civil engineering education, research, innovation, capacity building & training, and industry-academia collaboration, thus contributing to sustainable infrastructure development that serves the society.

DEPARTMENT VISION

- To foster quality education, research, innovation, professional engagement, entrepreneurship and outreach activities through collaboration with Industry and academia, addressing real-world infrastructure challenges.
- To provide ethical values, leadership, environmental sustainability and lifelong learning through an interdisciplinary approach that encourages social responsibility and professional growth in Civil Engineering.

PROGRAMME EDUCATIONAL OBJECTIVES (PEOs):

PEO 1: Professional Competence and Lifelong Learning

Graduates will possess strong technical knowledge and analytical skills in civil engineering, enabling them to plan, design, and execute sustainable infrastructure projects while adapting to emerging technologies and engaging in lifelong learning.

PEO 2: Innovation, Research and Entrepreneurship

Graduates will engage in research, consultancy, innovative and entrepreneurial practices by collaborating with academia, industry in contributing to the development of sustainable engineering solutions.

PEO 3: Social Responsibility and Ethical Leadership

Graduates will demonstrate professionalism, ethical values, effective communication and leadership in multidisciplinary teams, contributing to societal well-being.

SYLLABUS

23BS3101A	MECHANICS OF SOLIDS
------------------	----------------------------

Course Category:	Basic Science	Credits:	3
Course Type:	Theory	Lecture - Tutorial - Practice:	3-0-0
Prerequisites:	Engineering Mechanics	Continuous Evaluation:	30
		Semester end Evaluation:	70
		Total Marks:	100

Course outcomes		Upon successful completion of the course, the student will be able to :														
		CO1	Understand the concepts of stresses, strains and principles stresses and strains.													
		CO2	Determine the shear forces and bending moments													
		CO3	Determine the bending stresses and deflection at any point subjected to loads.													
		CO4	Determine the shear stress in beams, torsion in shafts, strain energy.													
		CO5	Determine the compound stresses and behavior of columns.													
Contribution of Course Outcomes towards achievement of Program Outcomes (1 – Low, 2 - Medium, 3– High)		PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO 10	PO 11	P O 12	PSO 1	PSO 2	
	CO1	3	2	2		3						2		1	3	
	CO2	3	2	2		3						1		1	3	
	CO3	3	2	2		3						1		1	3	
	CO4	3	2	2		3						1		1	3	
	CO5	3	2	2		3						1		1	3	
Course Content		UNIT – I STRESSES AND STRAINS Stress and strain - Hooke’s law -tension -compression and shear-Lateral strain, Poisson’s ratio and volumetric strain – Elastic moduli and the relationship between them – Bars of varying section –composite bars – Temperature stresses- Simple problems. Concept of Principal Stresses and Strains. SHEAR FORCE AND BENDING MOMENT Shear Force and Bending Moment diagrams of statically determinate beams.														

	UNIT – II FLEXURAL STRESSES Theory of simple bending – Assumptions – Derivation of bending equation - Neutral axis –Determination of bending stresses – Section modulus of across various beam sections. SLOPE AND DEFLECTION Relationship between moment; slope and deflection; Macaulay’s method; Moment area method; Use of these methods to calculate slope and deflection for determinant beams– Simple problems;Castigliano’s theorem. UNIT – III SHEAR STRESSES AND TORSION Derivation of formula of shear stress– Shear stress distribution across various beam sections - Derivation of torsion equation and its assumptions; Applications of the equation of the hollow and solid circular shafts; Torsional rigidity; Simple problems. STRAIN ENERGY Introduction; Derivation of expressions for elastic strain energy in uni -axial stress; elastic strain energy in pure bending; elastic strain energy for shearing stresses; elastic strain energy of a bar in pure torsion. UNIT – IV COMPOUND STRESSES Introduction; Principle of superposition and its limitation; Stress distribution on various cross sections of members due to eccentric loads; Middle third rule; Core or Kernel of a section. COLUMNS Introduction, Stability of equilibrium; The Euler’s formula for columns with different end restraints; Limitations of the Euler’s formulas; Generalized Euler buckling – load formulas;

23HS3102	UNIVERSAL HUMAN VALUES 2: UNDERSTANDING HARMONY
----------	---

Course Category:	Humanities and Social Sciences	Credits:	3
Course Type:	Mandatory course (suggested by AICTE)	Lecture - Tutorial - Practice:	2-1-0
Prerequisites:	None. Universal Human Values 1 desirable.	Continuous Evaluation:	50
		Semester end Evaluation:	50
		Total Marks:	100

Course outcomes		Upon successful completion of the course, the students will be able to:													
		CO1	understand and aware of themselves and their surroundings(family, society and nature).												
		CO2	handle problems with sustainable solutions, while keeping human relationships and human nature in mind.												
		CO3	exhibit critical ability and become sensitive to their commitment towards their understanding of human values, human relationship and human society.												
		CO4	apply what they have learnt to their own self in different day-to-day settings in real life.												
Contribution of Course Outcomes towards achievement of Program Outcomes (1 – Low, 2 - Medium, 3 – High)		PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO 10	PO 11	PO 12	PSO 1	PSO 2
	CO1						1			2					
	CO2			3											
	CO3						2								
	CO4								3				2		

Course Content	UNIT – I: COURSE INTRODUCTION, NEED, BASIC GUIDELINES, CONTENT AND PROCESS FOR VALUE EDUCATION: PART-1: Purpose and motivation for the course, recapitulation from UHV-I, Self-exploration: what is it?, its content and process, ‘Natural acceptance’ and experiential validation- as the process for self-exploration. Continuous Happiness and Prosperity – A look at basic Human Aspirations. PART-2: Right understanding, Relationship and Physical Facility – the basic requirements for fulfillment of aspirations of every human being with their correct priority, Understanding Happiness and Prosperity correctly – A critical appraisal of the current scenario, Method to fulfill the above human aspirations: understanding and living in harmony at various levels. (Practice sessions are to be included to discuss natural acceptance in human being as the innate acceptance for living with responsibility (living in relationship, harmony and co-existence) rather than as arbitrariness in choice based on liking-disliking).
	UNIT – II: UNDERSTANDING HARMONY IN THE HUMAN BEING – HARMONY IN MYSELF: PART-1: Understanding human being as a co-existence of the sentient ‘I’ and the material ‘Body’. Understanding the needs of Self (‘I’) and ‘Body’ – happiness and physical facility, Understanding the Body as an instrument of ‘I’ (I being the doer, seer and enjoyer). PART-2: Understanding the characteristics and activities of ‘I’ and harmony in ‘I’. Understanding the harmony of I with the Body: Sanyam and Health; correct appraisal of Physical needs, meaning of Prosperity in detail, Programs to ensure Sanyam and Health. (Practice sessions are to be included to discuss the role others have played in making material goods available to me. Identifying from one’s own life. Differentiate between prosperity and accumulation. Discuss program for ensuring health vs. dealing with disease).
	UNIT – III: UNDERSTANDING HARMONY IN THE FAMILY AND SOCIETY – HARMONY IN HUMAN-HUMAN RELATIONSHIP: PART-1: Understanding values in human-human relationship; meaning of Justice (nine universal values in relationships) and program for its fulfillment to ensure mutual happiness; Trust and Respect as the foundational values of relationship, Understanding the meaning of Trust; Difference between intention and competence, Understanding the meaning of Respect, Difference between respect and differentiation; the other salient values in relationship. PART-2: Understanding the harmony in the society (society being an extension of family); Resolution, Prosperity, fearlessness (trust) and co-existence as comprehensive Human Goals, Visualizing a universal harmonious order in society–Undivided Society, Universal Order–from family to world family. (Practice sessions are to be included to reflect on relationships in family, hostel and institute as extended family, real life examples, teacher-student relationship, goal of education, etc. Gratitude as a universal value in relationships. Discuss with scenarios. Elicit examples from students’ lives).
	UNIT – IV: PART-1: UNDERSTANDING HARMONY IN NATURE & EXISTENCE – WHOLE EXISTENCE AS COEXISTENCE: Understanding the harmony in the Nature, Interconnectedness and mutual fulfillment among the four orders of Nature – recyclability and self-regulation in nature, Understanding Existence as Co-existence of mutually interacting units in all-pervasive space, Holistic perception of harmony at all levels of existence. PART-2: IMPLICATIONS OF THE ABOVE HOLISTIC UNDERSTANDING OF HARMONY ON PROFESSIONAL ETHICS: Natural acceptance of human values, Definitiveness of ethical human conduct, Basis for humanistic education, humanistic constitution and humanistic universal order, Competence in professional ethics: a) ability to utilize the professional competence for augmenting universal human order, b) ability to identify the scope and

	characteristics of people-friendly and eco-friendly production systems, c) ability to identify and develop appropriate technologies and management patterns for above production systems, Case studies of typical holistic technologies, management models and production systems, Strategy for transition from the present state to Universal Human Order: a) at the level of individual: as socially and ecologically responsible engineers, technologists and managers, b) at the level of society: as mutually enriching institutions and organizations. (Part-1: Practice sessions are to be included to discuss human being as cause of imbalance in nature (film —Homel can be used), pollution, depletion of resources and role of technology, etc. Part-2: Practice exercises and case studies are to be taken up in practice (tutorial) sessions eg. to discuss the conduct as an engineer or scientist, etc.)

23ES3103A	ENGINEERING GEOLOGY
------------------	----------------------------

Course Category:	Engineering Science	Credits:	2
Course Type:	Theory & Practice	Lecture - Tutorial - Practice:	1-0-2
Prerequisites:		Continuous Evaluation:	30
		Semester end Evaluation:	70
		Total Marks:	100

Course outcomes		Upon successful completion of the course, the student will be able to:														
		CO1	analyze and classify various minerals and rocks on the basis of their engineering properties.													
		CO2	apply quantitative skills and frame work for solving basic engineering geology problems related to geological features and geological hazards													
		CO3	understand the importance of geo physical methods making engineering decisions specially site selection of engineering projects.													
		CO4	evaluate geological problems for a meaningful solution in the context of major civil engineering projects and their environmental impact.													
Contribution of Course Outcomes towards achievement of Program Outcomes (1 – Low, 2 - Medium, 3– High)		PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO 10	PO 11	PO 12	PSO 1	PSO 2	
	CO1	3													3	
	CO2	3													3	
	CO3	3	3		3										3	
	CO4	3	3		3										3	
Course Content		UNIT-I														
		GEOLOGICAL MATERIALS														
		1. INTRODUCTION TO ENGINEERING GEOLOGY - Scope of geological studies in various Civil engineering projects; Mineralogy- Introduction to mineralogy, Mineral Identification by Physical properties. Physical properties of rock forming minerals														
		LAB EXCERCISE-I. Identification of Common Rock forming group of Minerals a. Quartz Group b. Feldspar group c. Mica Group d. Carbonate Group														

2. PETROLOGY -Rock cycle Igneous rocks – Formation –Classification and Textures
Sedimentary rocks – Formation –Classification and Textures, Metamorphic rocks and metamorphism – Formation –Classification and Texture, Engineering concerns of rocks

LAB EXCERSISE- II Identification of common rocks

a) Granite b) Basalt c) Diorite d) Sandston e Shale f) Limestone g) Gneiss h) Schist
i) Marble

UNIT-II

EARTH PROCESS

1. INTRODUCTION: Weathering, Engineering classification of weathered rocks : Importance of weathering in Civil Engineering. Earth quakes - Causes and effects of earthquakes Earthquake Magnitude and intensity scales. seismic zones of India: Landslides -Classification -Preventive measures

2. Structural geology – Stress –strain behavior of rock, Concept of rock deformation Rock outcrops- Types- strike and Dip; Folds- Types-Effects on construction; Faults- Types-Effects on construction: Joints-Types- Effects on construction

LAB EXCERSISE-III- Identification of structural features on Models.

UNIT-III

GEOLOGICAL AND GEOPHYSICAL INVESTIGATION METHODS

1. MAPS AND THEIR INTERPRETATION- Topographic Map and Geological Map

LAB EXCERSISE-IV- Practicing topographic map cross section, Practicing geological maps and cross section

2. GEOPHYSICAL METHODS- Principles of exploration geophysical Methods Electrical Resistivity method- Interpretation, Seismic refraction method- Interpretation

LAB EXCERSISE-V-Electrical Resistivity survey for civil engineering application

UNIT-IV

GEOLOGICAL INVESTIGATIONS FOR MAJOR PROJECTS

1. DAMS - Types and purpose of Dams , Geological investigation methods for dams:Reservoirs- Failure of reservoirs, Reservoir suitable rocks, Reservoir induced seismicity Tunnels- Site selection for tunnels, Geological investigation methods for Tunnels.

2. ENVIRONMENTAL GEOLOGY—Environmental impact on mining construction materials- aggregate waste disposal- Impact of environment on the construction of dams, reservoirs.

Course Category:	Program Core	Credits:	4
Course Type:	Theory	Lecture - Tutorial - Practice:	3 - 0- 2
Prerequisites:	Basic Mathematics	Continuous Evaluation: Semester end Evaluation: Total Marks:	30 70 100

Course outcomes	Upon successful completion of the course, the student will be able to:														
	CO1	Understand the basic principles of surveying and measure linear distances and areas using chain and compass surveying.													
	CO2	Understand and apply the concept of levelling to determine the elevations and contours.													
	CO3	Understand the principles of theodolite survey and measure horizontal and vertical angles using theodolite survey.													
	CO4	Evaluate areas and volumes of various sections													
	CO5	Understand various modern field equipments													

Contribution of Course Outcomes towards achievement of Program Outcomes (1– Low, 2-Medium, 3 – High)		PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO 10	PO 11	PO 12	PSO 1	PSO 2

	CO3	2	2	1	1	3			1	3	3	1	1	2	2
	CO4	2	2			2			1	3	3	1	1	2	2
	CO5	1				2							3		

Course Content	UNIT – I BASICS OF SURVEYING: Surveying definition; Primary divisions; Classification; Principles; Plan and map; Scales used for maps and plans; Accuracy; Precision; Sources of errors; Types of errors. CHAIN SURVEYING: Principles of chain surveying; Basic definitions; Different methods; Instruments for Chaining and taping; ranging out; Chaining a line on a flat ground; Chaining on an uneven or a sloping ground; Chain & Tape corrections.
----------------	--

LABORATORY TESTS:

Determine the area of a given parcel of land by using cross staff and chain survey

- Determine the distance between two points with obstacles in between

UNIT – II LEVELLING:

Basic definitions; Bench marks; Different methods of leveling; Classification of direct leveling methods; Auto level; Leveling staff; Terms used in levelling; Theory of differential Levelling; Levelling field book; Missing entities; Height of Instrument and rise and fall method; Profile leveling; Cross sectioning; Sources of errors in leveling.

CONTOURING:

Contouring; contour interval; Characteristics of contours; Methods of locating contours; Interpolation and Sketching of contours; Uses of contour maps.

LABORATORY TESTS:

- Determination of elevations of various points remote from each other
(Differential leveling)
 - Survey and plot the longitudinal and cross sections of a given embankment
 - Prepare a contour map of existing ground using an auto level.

UNIT – III

THEODOLITE SURVEYING:

Main parts of a vernier theodolite; Basic definitions; Fundamental lines; Temporary adjustments; Measurement of a horizontal angle by repetition and reiteration. Measurement of vertical angle; Errors in theodolite surveying.

CIRCULAR CURVES:

Basic definitions; Designation of a curve; Relationship between radius and degree of curve; Elements of a simple curves; setting out of simple curve

LABORATORY TESTS:

- Measurement of horizontal angle by using Repetition method.
- Measurement of horizontal angles by using Reiteration method.
- Measurement of vertical angles using a Vernier theodolite.

UNIT – IV

AREAS & VOLUMES:

Introduction; Area of a tract with straight irregular boundaries; Boundaries with offsets at irregular intervals; Coordinates method; Planimeter: working; Area of cross sections: two level sections only; Volume of a prismoid: Trapezoidal rule; Prismoidal formula; Capacity of a reservoir.

MODERN FIELD SURVEY SYSTEMS EDM:

Principle, Types of EDM instruments; Total Station: Fundamental parameters, Field equipment, Setup, Advantages, Uses; GPS: Functioning, Applications in Civil Engineering.

	LABORATORY TESTS: • Measurement of bearings of an open traverse with prismatic compass and computation of correct included angles. • Measurement of bearings of a closed traverse with prismatic compass and computation of area.

	DYNAMICS OF FLUID FLOW: Euler's equation of motion; Bernoulli's equation; Momentum principle; Application of Momentum equation; Force exerted on a pipe bend.
	UNIT III: MEASUREMENT OF FLOW THROUGH PIPES: Measurement of flow through Pipes – methods and various devices; Discharge through Venturi meter; Discharge through orifice meter; Measurement of velocity by Pitot tube. MEASUREMENT OF FLOW THROUGH ORIFICES: Flow through orifices; Determination of coefficients for an orifice; Flow through small orifice and large rectangular orifice.
	UNIT – IV ANALYSIS OF FLOW THROUGH PIPES: Energy losses in pipelines; Darcy – Weishbach equation; Minor losses in pipelines; Pipes in series and parallel. LAMINAR FLOW: Relation between shear and Pressure Gradients in Laminar Flow; Reynold's experiment; Critical velocity; Steady laminar flow through a circular pipe – Hagen Poiseuille's Law; Laminar Flow between Parallel Plates – Both plates at rest.

23CE3308	CONCRETE TECHNOLOGY
-----------------	----------------------------

Course Category:	Programme Core	Credits:	3
Course Type:	Theory & Practice	Lecture - Tutorial - Practice:	2-0-2
Prerequisites:	-----	Continuous Evaluation:	30
		Semester end Evaluation:	70
		Total Marks:	100

Course outcomes		Upon successful completion of the course, the student will be able to:													
		CO1	Understand the manufacturing process of cement, types of cements and chemical composition of cement.												
		CO2	Apply properties of the constituent materials in concrete												
		CO3	Analyze and Compare the Properties of fresh and hardened concrete.												
		CO4	Understand effects of various chemical actions on concrete.												
		CO5	Evaluate various special concretes and concreting methods based on the scenario.												
		CO6	Evaluate an appropriate concrete mix design using Indian Standard.												
Contribution of Course Outcomes towards achievement of Program Outcomes (1 – Low, 2 - Medium, 3 – High)		PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO 10	PO 11	PO 12	PSO 1	PSO 2
	CO1							2						1	3
	CO2	1					1	2						1	3
	CO3			2										1	3
	CO4				2		1	2						2	2
	CO5						2	2						2	2
	CO6	1	3	3	2		3	3	2		1		1	2	2

Course Content	UNIT – I CEMENT: Introduction to concrete as a structural material, Uses of cement, Chemical Composition of Ordinary Portland Cement, Functions of cement ingredients; Manufacturing process of cement (wet and Dry Processes), Hydration of Cement, Heat of Hydration, Water requirements for hydration, Types of cements -- Ordinary, Rapid hardening, low-heat, sulphate resisting, Portland slag, Portland pozzolana, High alumina cement, white cement and colored cement properties and their applications; Storage of cement; Field tests for cement. LABORATORY TESTS (As per IS Specifications): Fineness of cement, consistency, initial and final setting time, Specific gravity and compressive strength of cement. AGGREGATES: Classification of Aggregates; Properties of aggregates Grading of Aggregates; IS: 383 requirements for aggregates; Alkali – Aggregate reaction. LABORATORY TESTS (As per IS Specifications): Sieve analysis, specific gravity, bulk density of both fine and coarse aggregate, bulking of sand.
	UNIT – II WATER: General; Quality of water; Use of sea water; IS: 456 requirements. MORTAR: Functions of sand in mortar; Classification of mortars; Uses of mortar; Properties of good mortar mix and mortar; Selection of mortar. ADMIXTURES IN CONCRETE: General; Air-entraining agents; Plasticizers; Accelerators; Retarders; Miscellaneous admixtures for damp proofing and Surface hardening; Introduction to mineral admixtures. CONCRETE: Definition; Future demand of concrete - advantages of concrete structures ; Proportioning of concrete; Water – cement ratio; Properties of Fresh Concrete – Workability, Factors Affecting Workability, Segregation; Bleeding; Yield of Concrete. LABORATORY TESTS (As per IS Specifications): workability tests on fresh concrete: slump cone, compaction factor.
	UNIT – III MANUFACTURE OF CONCRETE: Batching of concrete; Mixing; Transporting Concrete; Placing concrete; Compaction of concrete; Curing of concrete; Finishing. HARDENED CONCRETE: General; Gel / space ratio; Gain of strength with age; Maturity concept of concrete; Elastic properties of concrete; Relation between modulus of Elasticity and strength; Factors affecting modulus of elasticity; Creep; Factors affecting creep; Shrinkage; Plastic shrinkage; Mechanism of shrinkage; Factors affecting shrinkage. LABORATORY TESTS (As per IS Specifications): Compressive strength, Effect of height / diameter ratio on strength and failure patterns, flexural strength, split tensile test, Relation between Compressive and Tensile Strength; Introduction to Non-Destructive Tests (Demo on Rebound Hammer Test, Ultrasonic Pulse Velocity Test).
	UNIT – IV DURABILITY OF CONCRETE: Permeability of concrete; Sulphate attack; Methods of controlling sulphate attack; Durability of concrete in sea water; Corrosion mechanism of reinforcement in concrete, Environmental considerations, concrete durability and sustainability, technology for sustainable development.

	SPECIAL CONCRETES & CONCRETING METHODS: Light weight concrete and No fines concrete; High strength and high performance of concrete; Polymer concrete and Fiber reinforced concrete; Guniting or shotcrete; Ferro cement; Vacuum concrete, Vacuum Dewatered Concrete, Self compacting concrete, Self healing Concrete. CONCRETE MIX DESIGN: Concept of mix design; List of Mix design methods; Indian standard method of mix design (IS10262-2019).

Course outcomes		Upon successful completion of the course, the student will be able to:														
		CO1	Think reason logically in any critical situation													
		CO2	Analyze given information to find correct solution													
		CO3	To reduce the mistakes in day to day activities in practical life													
		CO4	Develop time management skills by approaching different shortcut methods													
		CO5	Use mathematical based reasoning to make decisions													
		CO6	Apply logical thinking to solve problems and puzzles in qualifying exams for companies and in other competitive exams													
Contribution of Course Outcomes towards achievement of Program Outcomes (1 – Low, 2 - Medium, 3– High)		PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO 10	PO 11	PO 12	PSO 1	PSO 2

		Semester end Evaluation:	
		Total Marks:	100

--	--	--	--

Course Outcomes	Upon successful completion of the course, the student will be able to:		
	CO1	identify various factors causing degradation of natural resource, (remember, understand, apply)	
	CO2	identify various ecosystem and need for biodiversity(apply)	
	CO3	realize and explore the problems related to environmental pollution and its management(analyze, evaluate)	
	CO4	apply the information and technology to analyze social issues, use acts associated with environment (create)	

Contribution of Course Outcomes towards achievement of Program Outcomes (1-Low, Medium-2, 3-High)		PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO 10	PO 11	PO 12	PSO 1	PSO 2
	CO1	1							1					1	
	CO2		1	1							1			1	
	CO3				1	1							1	1	
	CO4						1	1	1					1	

Course Content	UNIT I The Multidisciplinary Nature of Environmental Studies Definition, scope and importance Need for public awareness. NATURAL RESOURCES : RENEWABLE AND NON-RENEWABLE RESOURCES: Natural resources and associated problems. (a)FOREST RESOURCES: Use and over-exploitation, deforestation. Timber extraction, mining, dams and their effects on forests and tribal people. (b)WATER RESOURCES: Use and over-utilization of surface and ground water, floods, drought, conflicts over water, dams-benefits and problems. (c)MINERAL RESOURCES: Use and exploitation, environmental effects of extracting and using mineral resources. (d)FOOD RESOURCES: World food problems, changes caused by agriculture and overgrazing, effects of modern agriculture, fertilizer-pesticide problems, water logging, salinity. (e)ENERGY RESOURCES: Growing energy needs, renewable and non-renewable energy sources, use of alternate energy sources. (f)LAND RESOURCES: Land as a resource, land degradation, man induced landslides, soil erosion and desertification. Role of an individual in conservation of natural resources. Equitable use of resources for sustainable lifestyles.
	UNIT II ECOSYSTEMS Concept of an ecosystem. Structure and function of an ecosystem. Producers, consumers and decomposers. Energy flow in the ecosystem. Ecological succession. Food chains, food webs and ecological pyramids. Introduction, types, characteristic features, structure and function of the following ecosystem: (a) Forest ecosystem (b) Grassland ecosystem (c) Desert ecosystem (d) Aquatic ecosystems (ponds, streams, lakes, rivers, oceans, estuaries) BIODIVERSITY AND ITS CONSERVATION Introduction, definition: genetic, species and ecosystem diversity. Biogeographically classification of India. Value of biodiversity: consumptive use, productive use, social, ethical, aesthetic and option values. Biodiversity at global, National and local levels. India as a mega-diversity nation. Hot-spots of biodiversity. Threats to biodiversity: habitat loss, poaching of wildlife, man-wildlife conflicts. Endangered and endemic species of India. Conservation of biodiversity: in-situ and ex-situ conservation of biodiversity.

	UNIT III ENVIRONMENTAL POLLUTION Definition ,Causes, effects and control measures of (a) Air pollution (b) Water pollution (c) Soil pollution (d) Marine pollution (e) Noise pollution (f) Thermal pollution (g) Nuclear hazards SOLID WASTE MANAGEMENT: Causes, effects and control measures of urban and industrial wastes. Role of an individual in prevention of pollution. DISASTER MANAGEMENT: Floods, earthquake, cyclone and landslides.
	UNIT IV SOCIAL ISSUES AND THE ENVIRONMENT: From unsustainable to sustainable development. Urban problems related to energy. Water conservation, rain water harvesting, watershed management. Resettlement and rehabilitation of people; its problems and concerns. ENVIRONMENTAL ETHICS Issues and possible solutions. Climate change, global warming, acid rain, ozone layer depletion, nuclear accidents and holocaust. Wasteland reclamation. Consumerism and waste products. ENVIRONMENT PROTECTION ACT Air (Prevention and Control of Pollution) Act. Water (Prevention and Control of Pollution) Act. Wildlife Protection Act. Forest Conservation Act. Issues involved in enforcement of environmental legislation. PUBLIC AWARENESS Human Population and the Environment, Population growth, variation among nations, Population explosion—Family Welfare Programme. ENVIRONMENT AND HUMAN HEALTH Human rights, Value education, HIV/AIDS, Women and Child Welfare. Role of Information Technology in environment and human health. FIELD WORK/ CASE STUDIES Visit to a local area to document environmental assets—river/forest/grassland/hill/ mountain. Visit to a local polluted site—Urban/Rural/Industrial/Agricultural. Study of common plants, insects, birds. Study of simple ecosystems—pond, river, hill slopes, etc.
Self-Study	Water resources, soil resources, mineral resource: radioactive elements, Threats to biodiversity, Solid waste management, Role of Information Technology in environment and human health.

	UNIT – III TIME VALUE OF MONEY Introduction to time value of money, Simple Interest, Compound Interest, Present Worth Analysis, Future Worth Analysis, Annual Cash Flow Analysis, Rate of Return Analysis, Normal and Effective Interest Rate, Perpetual Payment. DECISION MAKING Types of Decision-Making Environments, Decision Tree Analysis, Multiple Criteria Decision Making.
	UNIT – IV FINANCIAL STATEMENT & FINANCIAL RATIOS Financial Analysis, Financial Statement, Trading Account, Profit and Loss Account, Balance Sheet Requirements, Distinction between Profit and Loss Account and Balance Sheet. CAPITAL BUDGETING Capital Financing and Allocation Functions, Sources of Capital Funds, Capital Asset Pricing Model, Weighted Average Cost of Capital, Leasing Decisions, Capital Allocation.

	UNIT II: PROBABILITY DENSITIES: Continuous Random Variable , Expectation, Variance and Standard deviation of continuous random variable, Normal distribution, Normal approximation to the Binomial distribution. OTHER PROBABILITY DENSITIES - Uniform distribution, Log normal distribution, Gamma distribution, Beta distribution, Weibull distribution.
	UNIT III: SAMPLING DISTRIBUTIONS: Introduction, Populations and Samples, Sampling distribution of the mean (SD known and SD unknown) – Sampling distribution of the variance. ESTIMATION OF MEAN: Point Estimation, Maximum error of estimate, Interval Estimation.
	UNIT IV: REGRESSION AND CORRELATION: Types of Correlation, Scatter diagram, Karl Pearson's coefficient of correlation, Rank Correlation, Regression analysis. THE STATISTICAL CONTENT OF QUALITY IMPROVEMENT PROGRAMS: Quality Control- Control Charts for Measurements - Control Charts for Attributes.

23CE4303	STRUCTURAL ANALYSIS
-----------------	----------------------------

Course Category:	Program Core	Credits:	3
Course Type:	Theory	Lecture - Tutorial - Practice:	3-0-0
Prerequisites:	Mechanics of Solids 20BS3101A	Continuous Evaluation:	30
		Semester end Evaluation:	70
		Total Marks:	100

Course outcomes		Upon successful completion of the course, the student will be able to:														
		CO1	understand, draw and interpret influence line diagrams.													
		CO2	apply energy methods for analysis of indeterminate beams and frames.													
		CO3	analyze statically indeterminate structures using force and displacement methods.													
		CO4	evaluate multistory frames for vertical and horizontal loads by approximate methods.													
Contribution of Course Outcomes towards achievement of Program Outcomes (1 – Low, 2 - Medium, 3 – High)		PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO 10	PO 11	PO 12	PSO 1	PSO 2	
	CO1	3				2							2	2		
	CO2	3	1			2							2	2		
	CO3	3	1			2							2	2		
	CO4	3	1			2							2	2		
Course Content		UNIT – I														
		INFLUENCE LINES FOR STATICALLY DETERMINATE STRUCTURES : EQUILIBRIUM PRINCIPLES AND ITS APPLICATION Influence line for beam reaction; Shearing forces; Bending moment; Calculation of maximum and absolute maximum bending moment for rolling loads.														
		INFLUENCE LINES FOR STATICALLY DETERMINATE STRUCTURES : MULLER BRESLAU PRINCIPLES AND ITS APPLICATION Muller Breslau Principle; Concept and Its Application.														
		UNIT – II														
		ANALYSIS OF INDETERMINATE STRUCTURES USING ENERGY METHODS														

	: BEAMS Strain Energy Method for analysis of continuous beams up to two spans. ANALYSIS OF INDETERMINATE STRUCTURES USING ENERGY METHODS :FRAMES Analysis of rigid frames up to first degree of redundancy.
	UNIT – III ANALYSIS OF INDETERMINATE STRUCTURES: FORCE METHOD Propped cantilever by consistent deformation method; Fixed beams for different loadings. ANALYSIS OF INDETERMINATE STRUCTURES:DISPLACEMENT METHODS Slope deflection method for continuous beam (two span) and portal frames without side sway. Moment distribution method for continuous (two span) and portal frames without side sway.
	UNIT – IV APPROXIMATEMETHODSOFANALYSISFORMULTISTORYFRAMES: KANI'SMETHOD Introduction and principles of the kani's method; Application of the method to continuous beams; Application of method to the analysis of portal frames without side sway. APPROXIMATEMETHODSOFANALYSISFORMULTISTORYFRAMES: : ANALYSIS OF LATERAL LOADS Portal method and cantilever method.

23CE4304	GEOTECHNICAL ENGINEERING
-----------------	---------------------------------

Course Category:	Program Core	Credits:	4
Course Type:	Theory & Practice	Lecture - Tutorial - Practice:	3-0-2
Prerequisites:		Continuous Evaluation:	30
		Semester end Evaluation:	70
		Total Marks:	100

Course outcomes		Upon successful completion of the course, the student will be able to:														
		CO1	Understand the origin of soil and basic inter-relationships of soil components													
		CO2	Determine the index properties of soil and classify the soil based on the index properties													
		CO3	Understand the Soil-Water Interactions													
		CO4	Understand and determine compressibility and shear strength characteristics of soils													
Contribution of Course Outcomes towards achievement of Program Outcomes (1 – Low, 2 - Medium, 3 – High)		PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO 10	PO 11	PO 12	PSO 1	PSO 2	
	CO1	3	3													
	CO2	3	3		2						1			3	3	
	CO3	3	3		2	3					1			3	3	
	CO4	3	3		2	3					1			3	3	
Course Content		<u>UNIT – I</u> INTRODUCTION, BASIC DEFINITIONS AND RELATIONS: Scope of Geotechnical Engineering; Origin of Soils; Formation of soils; Types of soils; Transportation of soils; Major soil deposits of India. Phase diagrams; Volumetric relationships; Weight relationship; Volume-weight relationships; Specific gravity of soils; Three phase diagram in terms of void ratio; Inter-relationships INDEX PROPERTIES AND SOIL CLASSIFICATION: Index Properties – Introduction, Particle Size Distribution Curve and its uses, Relative Density,Plasticity of soils, Consistency Limits and uses, Plastic, consistency and liquidity indices; Flow index & toughness index; Sensitivity; Thixotropy; Activity of soils. Unified soil classification system; Indian standard soil classification system Experiments: 1. Determination of water content by oven drying method														

2. Determination of specific gravity by Density bottle & Pycnometer
3. Grain Size analysis – Mechanical analysis – wet and dry soil
4. Determination of liquid limit and plastic limit of soil
5. Determination of in-situ dry density of soil by Core cutter method and by sand replacement method

UNIT – II

SOIL MOISTURE AND PERMEABILITY:

Flow of water in soils; Darcy's law; Validity of Darcy's law by Reynolds number; Determination of coefficient of permeability by constant head and variable head methods & Indirect methods; Seepage velocity; Factors affecting permeability; Permeability of stratified soil deposits.

EFFECTIVE STRESS PRINCIPLE:

Effective stress principle; Effective stress in a soil mass under different loading conditions – effect of depth of water table, surcharge loading, capillary water

Experiments:

6. Determination of permeability by Constant head and Variable head methods

UNIT – III

SEEPAGE THROUGH SOILS

Quick sand conditions; Characteristics of flow net; Uses of flow nets; Seepage through earth dams with horizontal filter; Uplift pressure; Flow net for anisotropic soils.

COMPACTION OF SOILS:

Introduction; Standard proctor test and modified proctor test; Compaction of clayey soil and sand; Factors affecting compaction; Effect of compaction on properties of soils; Field compaction of soils and field compaction control.

Experiments:

7. Standard proctor compaction test- Determination of OMC, MOD

UNIT – IV

CONSOLIDATION OF SOILS:

Introduction; Initial and secondary consolidation; Spring analogy for primary consolidation; Terzaghi's theory of consolidation; Solution of basic differential equation; Consolidation test; Determination of void ratio at various load increments-height of solids and change in voids ratio methods; Consolidation test results; Determination of coefficient of consolidation-square root of time and logarithmic time fitting methods

SHEAR STRENGTH OF SOILS:

Introduction; Mohr – coulomb theory; Different types laboratory of shear strength tests; Different drainage conditions and their field applicability; Mohr - coulomb failure criterion; Shear characteristic of cohesive and cohesion less soils

Experiments:

8. Determination of shear parameters (C and ϕ) of soil by direct shear test
9. Unconfined compression test- Determination of C and ϕ
10. Determination of Shear strength of soil by Vane shear test

23CE 4305	HYDRAULICS & HYDRAULIC MACHINES
-----------	---------------------------------

Course Category:	Programme Core	Credits:	4
Course Type:	Theory & Practice	Lecture - Tutorial - Practice:	3 - 0 - 2
Prerequisites:	20CE 3304 – Fluid Mechanics	Continuous Evaluation:	30
		Semester end Evaluation:	70
		Total Marks:	100

Course Outcomes	Upon successful completion of the course, the student will be able to:														
	CO1	evaluate the most economical dimensions of different channel sections.													
	CO2	evaluate the flow through pipes and open channel.													
	CO3	evaluate an equation for a phenomenon using dimensional analysis.													
	CO4	analyze the performance of various Hydraulic machines .													
Contribution of Course Outcomes towards achievement of Program Outcomes (1– Low, 2 - Medium, 3 – High)		PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO 10	PO 11	PO 12	PSO 1	PSO 2
	CO1	3	2	3										3	
	CO2	3	3	3											3
	CO3	3	2	3											3
	CO4	3	3	3										2	3
Course Content	UNIT I: OPEN CHANNEL FLOW: UNIFORM FLOW: Introduction, Classification of flows and channels; Chezy's, Manning's, Bazin's, Kutter's Equations; Hydraulically efficient channel sections - Rectangular, Trapezoidal and Circular channels. NON-UNIFORM FLOW: Concept of specific energy; Specific energy curves; Critical flow; Critical flow in a rectangular channel; Critical slope; Different slope conditions; Channel transitions.														

	Laboratory tests: 1. Determine Chezy's and Manning's coefficient for free surface flow in a rough/smooth surfaced rectangular channel. 2. Characterise the state of fluid flow by Reynolds's Number 3. Determination of flow-rate in an open channel using V Notch. UNIT II: GRADUALLY VARIED FLOW: Dynamic equation; Types of Surface Profiles; Computation of surface profiles by single step method; Back water Curves and Draw down curves. RAPIDLY VARIED FLOW: Hydraulic jump; Elements and characteristics of hydraulic jump; Types of hydraulic jumps; Applications of hydraulic jump; Energy loss in a hydraulic jump. Laboratory tests: 4. Validate Bernoulli's energy principle experimentally along a conduit. 5. Determine the coefficient of discharge for a Venturimeter/ Orificemeter 6. Workout the flow rate of a liquid using Orifice/Mouthpiece for steady flow in water tanks. UNIT III: DIMENSIONAL ANALYSIS AND SIMILITUDE: Dimensional homogeneity; Rayleigh's method; Buckingham – Pi theorem; Geometric, Kinematic and dynamic similarities; Scale effect. IMPACT OF JETS: Force exerted by fluid jet on stationary and moving flat plates and curved plates; Force exerted by fluid jet on series of flat vanes; Angular momentum principle; Torque exerted on a wheel with radial curved vanes. Laboratory tests: 7. Measurement of force due to impact of jet on Flat/Curved vanes used in Hydropower projects. 8. Determination of minor loss of head in pipes a) Due to bends b) Sudden contractions c) Sudden expansion. 9. Estimation of friction factor and major head loss for a given pipe system UNIT – IV HYDRAULIC TURBINES: Classification; Impulse; Reaction; Radial, Axial, mixed and tangential flow turbines; Pelton, Francis and Kaplan turbines; Velocity triangles; Head and efficiency; Draft tube theory; Concept of specific speed; Cavitation. CENTRIFUGAL PUMPS: Types of pumps, Manometric head; Losses and efficiencies; Working Principle and Work done; Priming; Velocity triangles; Multistage pumps; Specific speed; Cavitation. Laboratory tests: 10. Find the overall efficiency of single stage centrifugal pump. 11. Find the Performance studies on Reciprocating pump. 12. Conduct Performance test for Francis turbine at constant head and determine efficiency. Demonstration Experiments: Conduct Performance test for Kaplan / Pelton at constant head and determine efficiency

Course outcomes		Upon successful completion of the course, the student will be able to :														
		CO1	Understand how to listen, reflect, and speak while communicating with others.													
		CO2	Recall the fundamentals of language in terms of grammar and vocabulary in communication.													
		CO3	Apply English language skills in various speaking contexts to present ideas with clarity and accuracy.													
		CO4	Analyze the different parts in Versant Test and answer them.													
Contribution of Course Outcomes towards achievement of Program Outcomes (1 – Low, 2 - Medium, 3– High)		PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO 10	PO 11	PO 12	PSO 1	PSO 2	
	CO1	2									3					
	CO2	2									3					
	CO3	2								2	3					
	CO4	2									3					
Course Content		COURSE CONTENT 1. CONVERSATION STARTERS Introduction – Seeking Permissions – Asking for Directions – Making Requests – Offering Help – Expressing Thanks – Conveying Apologies – Starting a Conversation with a Stranger – Practice. 2. FUNCTIONAL CONVERSATIONS Introducing Self – Introducing Others – Starting a Group Introduction – Icebreaker Introduction – Introducing a Formal Setting – Practice Exercises.														

	3. GRAMMAR Verbs – Tenses – Sentence Structures – Spotting the Errors. 4. JUST A MINUTE Introduction – Significance – Fluency – Coherence – Avoiding Errors – Communication Skills – Confidence – Practice. 5. VOCABULARY Idioms – Phrases – Significance – Meanings – Usage – Practice. 6. ELOCUTION Definition – Importance – Key Components – Voice Modulation – Articulation – Posture and Gestures – Practice. 7. EXTEMPORE Introduction – Significance – Developing Quick Thinking – Communication Skills – Confidence – Practice. 8. DEBATE Introduction – Understanding the Structure – Purpose of a Debate – Developing Basic Debating skills – Do's and Don'ts – Practice. 9. VERSANT TEST Overview of the Versant Test – Purpose and Importance – Format of the Test – Types of Questions – Practice. 10. STORY TELLING Know Your Audience – Choose a Story – Set the Scene – Introduce the Characters – Build Suspense – Describe the Conflict – Show the Resolution – Share the moral/message – Use Vivid Language – Practice Delivery – Invite Reflection/Discussion – Follow Up.

Course outcomes		Upon successful completion of the course, the student will be able to:														
		CO1	analyze 3D Structural elements using Autodesk Revit and develop drawings with the necessary details for construction													
		CO2	apply spreadsheet techniques to solve different engineering problems.													
Contribution of Course Outcomes towards achievement of Program Outcomes (1 – Low, 2 - Medium, 3 – High)		PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO 10	PO 11	PO 12	PSO 1	PSO 2	
	CO1	2	1			2						3		2	1	
	CO2	2	2			2						3		2	1	
Course Content		PART-A: AUTODESK RIVET STRUCTURES														
		Design and Drawing the details of the following 3D Structural elements . 1. Create additional grids and levels, family content 2. Working with Structural Columns, Beams, walls, floors, foundations 3. Creating and managing Call out views,duplicatingviews, Annotations 4. Demonstrate the Skills and knowledge required to convert Autocadd 2D drawing to 3D model using Autodesk Rivet Structures 5. Modelling Steel truss frame and design connections 6. Demonstration on sheets Creation and managing materials, Cost analysis of whole structure, walkway through and sun path analysis														
		B: Excel for Engineers 1. Using excel as a engineering tool that helps solve real world problems related to civil engineering. 2. Gain knowledge in excel and visual basics for applications. 3. Create spreadsheets to solve different structural design problems. 4. Utilize excel engineering for optimization and uncertainty analysis.														

	5. Introduce user forms and user controls for overall project control
Text books	[T1] Auto desk Rivet structures manual. [T2] Exploring Autodesk Revit 2020 for structures,10 th edition,byProf. Sham Tickoo, Purdue University Northwest, USA [T3] MS Excel user manual.

23ES4152	DESIGN THINKING AND INNOVATION
-----------------	---------------------------------------

Course Category:	Engineering Science	Credits:	1.5
Course Type:	Laboratory	Lecture - Tutorial - Practice:	0-0-3
Prerequisites:	---	Continuous Evaluation:	30
		Semester end Evaluation:	70
		Total Marks:	100

Course outcomes		Upon successful completion of the course, the student will be able to:														
		CO1	analyze complex civil engineering problems innovatively with the use of different construction materials and structural elements.													
		CO2	apply various power tools for construction													
Contribution of Course Outcomes towards achievement of Program Outcomes (1 – Low, 2 - Medium, 3 – High)		PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO 10	PO 11	PO 12	PSO 1	PSO 2	
	CO1	2	2	2	2	2				2		2	2		2	
	CO2	3	2	3	3	1				2		2	2		2	
Course Content	1 DESIGN THINKING a. Introduction to Design Thinking : An insight into Design, origin of Design thinking, Design thinking and its process models, application of Design thinking. b. Empathize In Design Thinking: Role of Empathy in design thinking, methods and tools of empathy, understanding empathy tools. Explore define phase state users‘ needs and problems using empathy method. *Carry out the detailed questionnaire to arrive at the problem of the selected theme. The empathy report shall be prepared based on the response of the stake holders. c. Prototyping and Testing: Methods and tools of ideations, prototyping and methods of prototyping, user testing methods, Advantages and disadvantages of user Testing/ Validation. * For the problem identified, the team needs to give solution through thinking out of the box innovatively to complete the ideation stage of DTL. *Once the idea of the solution is ready, detailed design has to be formulated in the Design stage considering the practical feasibility. *If the Design of the problem is approved, the team should implement the design and come out with prototype of the system.															

	*Conduct thorough testing of all the modules in the prototype developed and carry out integrated testing. *Demonstrate the functioning of the prototype along with presentations of the same. d. Product Innovation: Innovation towards product design Case studies. * Prepare a Digital poster indicating all the stages of DTL separately. A Detailed project report also should be submitted covering the difficulties and challenges faced in each stage of DTL. Methods of testing and validation should be clearly defined both in the Digital poster as well as the report. e. Ideation, Prototyping And Testing of an Innovative Model Based on the Topics Learnt – (Class may be divided in to groups. some marks may be allotted for the submission of innovation. Better innovations may lead to exhibition in NITs, IITs / patents / may be useful to Atal innovation ranking). 2. Calculate the length, area, volume, area of a built-up space and a small parcel of land - use digital distance measuring devices and To set horizontal, vertical and angle lines using different types of laser instruments. 3. (a) To find out the different materials present in the wall using wall scanner. (b) To view the objects using an inspection camera which are not accessible & visible. (c) To set different angles to a ramp or staircase using Inclinator. 4. (a) To cut shapes and curves in wood with its narrow blade using Jigsaw. (b) To cut through wood and other soft materials using Saber saw. (c) Polish the concrete using concrete grinder. 5. Painting – Paint a given surface in this order - putty, primer and painting. 6. Flooring – Suggest a suitable flooring and install in the given space. 7. Plumbing – Design pipeline layout for the given plan and utilize proper fittings. 8. Formwork – Suggest proper formwork for footings, stair case, 9. Apply basic techniques for masonry and concreting works – different types of brick bonds, plumb, alignment, brick quantity estimation 10. Estimation of material contents for cement mortar and plastering.

23CE4353	STRENGTH OF MATERIALS LAB
-----------------	----------------------------------

Course Category:	Programme core lab	Credits:	1
Course Type:	Laboratory	Lecture - Tutorial - Practice:	0-0-2
Prerequisites:	---	Continuous Evaluation:	30
		Semester end Evaluation:	70
		Total Marks:	100

Course outcomes		Upon successful completion of the course, the student will be able to:														
		CO1	understand the properties of wood, steel and other building materials as per IS code provisions.													
		CO2	analyse the behaviour in stress-strain, deflection, flexure/bending and torsion, of building components													
Contribution of Course Outcomes towards achievement of Program Outcomes (1 – Low, 2 - Medium, 3 – High)		PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO 10	PO 11	PO 12	PSO 1	PSO 2	
	CO1	3	3		3	1				2	2		1		2	
	CO2	3	3		3	1				2	2		1		2	
Course Content	1. Study the stress-strain characteristics of mild steel/tor steel by Universal testing machine. 2. Determine the ultimate shear strength of mild steel rod in single and double shear. 3. Find the Brinnel's hardness number and Rockwell’s hardness number of the givenmaterial. 4. Find the Young's modulus of the given material (Wood/Steel/Aluminum) byconducting bending test on simply supported beam. 5. Find the Young's modulus of the given material by conducting bending test oncantilever beam and propped cantilever. 6. Find the impact resistance of the given material by conducting Charpy test and IZODtest on Impact testing machine. 7. Find the modulus of rigidity by conducting torsion test on solid circular shaft. 8. Determine the modulus of rigidity of the material of the spring. 9. Determine the ductility of steel wire. 10. Tests on timber. 11. Strain gauge application and evaluation of stress. 12. Continuous beam – deflection test 13. Torsion Test on Beams: Torque and angle of twist characteristics, shear stress, modulus of															

	rigidity, energy 14. Deflection Test on Beams: Load deformation characteristics, Young's Modulus, Maxwell's Reciprocal law verification.

23CE5301 WATER RESOURCES ENGINEERING

Course Category:	Program Core	Credits:	3
Course Type:	Theory	Lecture - Tutorial - Practice:	3 - 0- 0
Prerequisites:	--	Continuous Evaluation:	30
		Semester end Evaluation:	70
		Total Marks:	100

Course Outcomes	Upon successful completion of the course, the student will be able to:														
	CO1	Understand irrigation methods, crop water requirements, and techniques for water assessment.													
	CO2	Explain hydrologic processes, runoff, unit hydrographs, and well irrigation methods.													
	CO3	Apply design principles to irrigation channels, analyze waterlogging, and implement canal lining.													
	CO4	Assess reservoir capacity and the functions of various types of hydraulic structures.													
Contribution of Course Outcomes towards achievement of Program Outcomes (1 – Low, 2 - Medium, 3 – High)		PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO10	PO 11		PSO 1	PSO 2
	CO1	3						2			1				
	CO2	3		2	2									2	
	CO3	3		2	2									3	
	CO4	3		3				2			1			3	
Course Content	UNIT – I 1. IRRIGATION:WATER APPLICATION METHODS Definition; Necessity; Benefits of irrigation; Ill-effects of irrigation; Types of irrigation and methods of applying water to crops; Uncontrolled or wild flooding; Free flooding; Contour laterals; Border strip method; Check flooding; Basin flooding; Zig zag method; Furrow method; Contour Farming; Sub-surface irrigation; Sprinkler Irrigation; Drip irrigation. 2. WATER REQUIREMENT OF CROPS: Saturation capacity; Field capacity; Wilting point; Available moisture and readily available moisture; Duty and Delta; Base period; Relation between Duty and Delta; Factors affecting duty; Methods of improving duty; Gross command area; Culturable command area; Culturable cultivated and uncultivated area; Kor depth and Kor period; Standards of irrigation water; Assessment of irrigation water. UNIT – II 3. HYDROLOGY: Introduction to Engineering Hydrology and its applications; Hydrologic cycle; Precipitation types; Rain gauges; Computation of average rain fall over a basin; Run off;														

	Factors affecting run off; Computation of run-off. Hydrograph; definition of Unit hydrograph; Limitations and applications of unit hydrograph, construction of a flood hydrograph resulting from rainfall of unit duration; Application of unit hydrograph to construction of a flood hydrograph resulting from two or more periods of rainfall; Construction of unit hydrograph of different unit duration from a unit hydrograph of some given unit duration. S-hydrograph 4. WELL IRRIGATION: Introduction; Aquifer; Aquicludes; Aquifuge; Specific yield; Specific retention; Water table; types of aquifers; Dupit's theory for confined and unconfined aquifers; Constant level pumping test, Recuperation test. UNIT-III 5. IRRIGATION CHANNELS – SILT THEORIES & DESIGN PROCEDURE: Classification; Canal alignment; Silt theories–Kennedy's theory, Lacey's regime theory; Kennedy's method of channel design; Silt supporting capacity according to Kennedy's theory; Use of Garret's diagram in channel design; Lacey's theory applied to channel design; Use of Lacey's regime diagrams; Drawbacks in Kennedy's theory; Defects in Lacey's theory; Comparison of Kennedy's theory and Lacey's theory 6. WATERLOGGING, CANAL LINING Waterlogging, causes, effects and remedial measures. Lining of Irrigation canals, Types of lining; Design of lined canal UNIT-IV 7. DAMS IN GENERAL: Classification; Gravity dams, Arch dams, Buttress dams, Steel dams, Timber dams, Earth dams and rock fill dams; factors governing selection of site for a dam. 8. RESERVOIR PLANNING: Selection of site for a reservoir; Zones of storage in a reservoir; Storage capacity and yield; Mass inflow curve and demand curve; Calculation of reservoir capacity for a specified yield from the mass inflow curve; Determination of safe yield from a reservoir of a given capacity; Life of reservoir.

23CE5302 ENVIRONMENTAL ENGINEERING

Course Category:	Program Core	Credits:	3
Course Type:	Theory	Lecture - Tutorial - Practice:	2 - 0- 2
Prerequisites:	-	Continuous Evaluation:	30
		Semester end Evaluation:	70
		Total Marks:	100

Upon successful completion of the course, the student will be able to:															
Course Outcomes	CO1	Assess water sources for a water supply scheme with reference to quantity and quality of water													
	CO2	Implement and design treatment units for water purification and examine the components of water distribution systems.													
	CO3	Understand methods for sewage collection, conveyance, quality assessment, and estimation of sewage quantity.													
	CO4	Select and apply appropriate methods for sewage treatment and disposal.													
Contribution of Course Outcomes towards achievement of Program Outcomes (1 – Low, 2 - Medium, 3 – High)		PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO10	PO 11	PO 12	PSO 1	PSO 2
	CO1	1			2		1				1		1		1
	CO2	3		2	3		2	2		1	2			1	1
	CO3	2	2				1			1			1	2	
	CO4	3	2	3	3		3	2			1		1	3	3
Course Content	UNIT I INTRODUCTION AND QUANTITY OF WATER Objectives of water supply systems, Per capita consumption; Design period; Types of demands; Fluctuations in demand; Prediction of population. QUALITY OF WATER Impurities in water; Routine water analysis - physical, chemical and bacteriological tests; Standards for drinking water; Water borne diseases. Laboratory tests: 1. Determination of pH value of water sample. 2. Determination of total suspended and dissolved solids in water sample. 3. Determination of alkalinity of water sample. UNIT II PURIFICATION OF WATER Purification of water; Plain sedimentation; coagulation and types of Coagulants; Sedimentation and coagulation tanks; Design aspects; Theory of filtration; Slow sand and rapid sand filters;														

	Construction and Operation; Disinfection methods-chlorination; Miscellaneous treatments - Removal of hardness, De-fluoridation. DISTRIBUTION SYSTEMS Methods of supply; Layouts; Distribution reservoirs; Capacity of balancing tank; Methods of analysis of distribution systems, Plumbing-pipes and fittings; Traps; One pipe and Two pipe systems. Laboratory tests: 4. Determination of acidity of water sample. 5. Determination of turbidity of water sample. 6. Determination of optimum dose of coagulant. UNIT III INTRODUCTION TO SANITARY ENGINEERING, QUANTITIES, SEWERS AND SEWER APPURTENANCES Sanitation; Conservancy and water carriage system; Sewerage systems; Relative merits, Sanitary and storm water sewage; Estimation of their quantities. Sewers-types, sewer appurtenances types. QUALITY OF SEWAGE AND PRIMARY TREATMENT OF SEWAGE Characteristics of sewage-physical, chemical and biological; decomposition cycles; BOD and COD. Primary treatment- theoretical concepts of Screens, Grit chamber; Skimming tanks; design aspects of Sedimentation tanks. Septic tank-Design and effluent disposal. Laboratory tests: 7. Determination of temporary and permanent hardness of water sample. 8. Determination of chloride concentration of water sample. 9. Determination of sulphate content in a given water sample. UNIT – IV SECONDARY TREATMENT OF SEWAGE Trickling filters and high rate trickling filters at primary level, Principles of action; Recirculation; Operational problems and remedies; Activated sludge process; Principles of action; Methods of aeration; Sludge bulking; Sludge volume index. SEWAGE DISPOSAL Methods; Disposal by dilution; Self-purification process; Oxygen sag; Zones of pollution of river; Disposal by irrigation. Laboratory tests: 10. Determination of dissolved oxygen of water sample. 11. Determination of biochemical oxygen demand (BOD) of waste water. 12. Determination of chemical oxygen demand (COD) of waste water.

23CE5303 Design of Concrete Structures

Course Category:	Program Core	Credits:	3
Course Type:	Theory	Lecture - Tutorial - Practice:	3 - 0- 0
Prerequisites:	23CE3308 Concrete Technology	Continuous Evaluation:	30
		Semester end Evaluation:	70
		Total Marks:	100

Course Outcomes	Upon successful completion of the course, the student will be able to:														
	CO1	Understand the design requirements and analyse a safe section for R.C. beams.													
	CO2	Examine sections of R.C. flanged beams and R.C. slabs for structural adequacy and safety.													
	CO3	Analyze and determine a safe section for R.C. columns.													
	CO4	Identify different types of foundations and design isolated column footings.													
Contribution of Course Outcomes towards achievement of Program Outcomes (1 – Low, 2 - Medium, 3 – High)		PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO10	PO 11		PSO 1	PSO 2
	CO1	2		3				1						3	
	CO2	2		3				1						3	
	CO3	2		3				1						3	
	CO4	2		3				1						3	
Course Content	UNIT I: GENERAL Loading standards as per IS 875, Grades of steel and cement, Stress- Strain characteristics of concrete and steel, Introduction to working stress method and Limit State Method (L.S.D.) of design. Characteristic load and strengths, Design values, Partial safety factors, Factored loads. ALL DESIGNS IN LIMIT STATE METHOD DESIGN OF BEAMS (IS456-2000). Flexural and Shear in R. C. beams; Check for development length. Deflection and cracking. Design of singly reinforced rectangular section, Doubly reinforced rectangular section. UNIT II: DESIGN OF FLANGED BEAM (IS456-2000) T-Beams introduction, Analysis and Design of singly reinforced flanged sections DESIGN OF SLABS (IS456-2000). One way and Two-way action of slabs, Choosing slab thickness. Design of one way slab. (only														

	simply supported one way slab) Design of restrained and unrestrained Two way slabs as per I.S. code provision (IS456-2000). UNIT III: DESIGN OF COLUMNS FOR AXIAL COMPRESSION (IS456-2000). Define short and long columns, estimation of effective length of a column. Code requirements on slenderness limits, minimum eccentricity and reinforcement. Design of short column under axial compression with lateral ties only. DESIGN OF COLUMNS FOR COMBINED ACTION (IS456-2000) Design of short columns subjected to combined axial load and uniaxial Moment. UNIT – IV Classification of foundations; Different types of shallow foundations and deep foundations. General aspects of footings. DESIGN OF ISOLATED FOOTING (IS456-2000). Design and detailing of Isolated Column footings.

	UNIT III: STIFFNESS METHOD (DISPLACEMENT METHOD) Notations, Kinematic Indeterminacy, Generating Stiffness Matrices and analysis of continuous beams by Stiffness method. STIFFNESS METHOD FOR PORTAL FRAMES Analysis of rigid Jointed frames by stiffness method with matrix approach. UNIT – IV: PLASTIC ANALYSIS OF STRUCTURES Idealized stress - strain curve for mild steel; Ultimate load carrying capacity of members carrying axial forces; Moment - Curvature relationship for flexural members; Evaluation of fully plastic moment; Shape factor; Collapse load factor; Upper and lower bound theorems. FINITE ELEMENT ANALYSIS Equilibrium Conditions; Strain-displacement relations; Linear Constitutive relations; Principle of Virtual work, Energy Principles; Application to finite element method. Element Strains and Stresses; Element Stiffness matrix.

23CE5404/B TOWN PLANNING & ARCHITECTURE

Course Category:	Programme Elective - I	Credits:	3
Course Type:	Theory	Lecture - Tutorial - Practice:	3 - 0- 0
Prerequisites:		Continuous Evaluation:	30
		Semester end Evaluation:	70
		Total Marks:	100

Course Outcomes	Upon successful completion of the course, the student will be able to:														
	CO1	Understand the history of Indian and European architecture and use basic principles of environmental design, energy efficiency, lighting, and acoustics in buildings.													
	CO2	Implement the principles and elements of landscape design and urban infrastructure systems.													
	CO3	Explain urban design and city planning concepts and their role in sustainable development and site planning.													
	CO4	Describe urban and regional planning techniques and apply principles of master planning and satellite towns.													
Contribution of Course Outcomes towards achievement of Program Outcomes (1 – Low, 2 - Medium, 3 – High)		PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO10	PO 11	PO 12	PSO 1	PSO 2
	CO1	1				1	1								
	CO2	1				1	1							1	
	CO3	1				1	1								
	CO4	1				1	1							1	
Course Content	UNIT I: HISTORY OF ARCHITECTURE: Indian – Indus valley, Vedic, Buddhist, Indo-Aryan, Dravidian and Mughal periods: European – Egyptian, Greek, Roman, medieval and renaissance periods construction and Architectural styles; vernacular and traditional architecture. Principles of Architecture. ENVIRONMENTAL STUDIES IN BUILDING SCIENCE: Components of Ecosystem; ecological principles concerning environment; energy efficient building design; thermal comfort; solar architecture; principles of lighting and styles for illumination; basic principles of architectural acoustics UNIT II: LANDSCAPE DESIGN: Principles of landscape design and site planning; history of landscape styles; landscape elements and materials.														

	Urban Infrastructure, Services and Amenities: Green building rating system-GRIHA and LEED Basic understanding of sustainable Development, green infrastructure; urban rainwater harvesting; power supply and communication systems -- guidelines; UNIT III: URBAN DESIGN Concepts and theories of urban design; Urban design interventions for sustainable development and transportation; Historical and modern examples of urban design; Public spaces, spatial qualities and Sense of Place; Elements of urban built environment – urban form, spaces, structure, pattern, etc; Urban renewal and conservation; Site planning; Landscape design. CITY PLANNING: Evolution of cities; principles of city planning; planning regulations, Development controls – FAR, densities and building byelaws; sustainable development. UNIT – IV TECHNIQUES OF PLANNING: Planning survey techniques; preparation of development plans; site planning principles and design; application of G.I.S and remote sensing techniques in urban and regional planning. CONCEPTS OF CITY MASTER PLANNING AND SATELLITE TOWNS Definition importance, feature-Various phases in the preparation of master plan and satellite towns-advantages-Examples -Hyderabad master plan and Noida satellite town.

23CE5404/C AIR POLLUTION AND CONTROL

Course Category:	Program Elective - I	Credits:	3
Course Type:	Theory	Lecture - Tutorial - Practice:	3 - 0- 0
Prerequisites:		Continuous Evaluation:	30
		Semester end Evaluation:	70
		Total Marks:	100

Course Outcomes	Upon successful completion of the course, the student will be able to:														
	CO1	Identify various types of air pollutants and their effects.													
	CO2	Explain the dispersion of air pollutants considering meteorological parameters.													
	CO3	Examine methods for sampling pollutants from chimney stacks and the ambient atmosphere.													
	CO4	Apply techniques and equipment to control air pollutants and evaluate their effectiveness.													
Contribution of Course Outcomes towards achievement of Program Outcomes (1 – Low, 2 - Medium, 3 – High)		PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO10	PO 11	PO 12	PSO 1	PSO 2
	CO1	3													2
	CO2	3													2
	CO3	3			1										2
	CO4	3		3	1		1	1							2
Course Content	UNIT I INTRODUCTION TO AIR POLLUTION Composition of air, Air pollution-definition, Prominent air pollution disasters or episodes, Sources of air pollution, Stationary and mobile sources. CLASSIFICATION AND EFFECTS OF AIR POLLUTION Classification of air pollutants - Natural Contaminants; Particulate Matter, Aerosols and Gaseous pollutants; Primary and secondary pollutants, Effects of air pollutants on human health; Effects on plants and economic effects. UNIT II METEOROLOGY AND AIR POLLUTION Meteorological factors influencing dispersion of air pollutants; Wind direction and wind speed, Atmospheric stability, temperature inversions, Mixing height, precipitation and humidity. MEASUREMENT OF METEOROLOGICAL PARAMETERS														

	Wind direction recorder, Wind speed recorder, Humidity Measurement, Temperature measurement; Wind Rose diagram; Plume behavior. UNIT III STACK SAMPLING Stack sampler; Sampling Procedure, Sampling point, size, Isokinetic Conditions, sampling of Particulate matter and Gases. AMBIENT AIR SAMPLING Sampling methods- Sedimentation, filtration, impingement methods, electrostatic precipitation and thermal precipitation. Sampling suspended particulates by high volume sampler. Sampling SO₂ and NO_x and Carbon Monoxide gases. Indian standard methods of analysis of SO₂ and NO_x gases Air Quality and Emission standards. UNIT – IV METHODS OF CONTROLLING AIR POLLUTION Measures to control air pollutants in atmosphere, Control of Particulate matter by equipments – Settling chamber, inertial separators, fabric filters, wet scrubbers, Electrostatic Precipitators. CONTROL OF GASEOUS POLLUTANTS Controlling methods of Gaseous Emissions - combustion, adsorption, absorption, closed collections and recovery systems - Control of SO₂ and NO_x gases.

23CE5404/D ENVIRONMENTAL GEOTECHNOLOGY

Course Category:	Program Elective - I	Credits:	3
Course Type:	Theory	Lecture - Tutorial - Practice:	3 - 0- 0
Prerequisites:		Continuous Evaluation:	30
		Semester end Evaluation:	70
		Total Marks:	100

Course Outcomes	Upon successful completion of the course, the student will be able to:														
	CO1	Apply fundamental principles of environmental geo-technology to real-world scenarios.													
	CO2	Utilize key concepts to design various components of waste containment facilities.													
	CO3	Assess and implement remediation strategies for contaminated sites.													
	CO4	Analyze and explore geotechnical applications for waste reuse.													
Contribution of Course Outcomes towards achievement of Program Outcomes (1 – Low, 2 - Medium, 3 – High)		PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO10	PO 11	PO 12	PSO 1	PSO 2
	CO1	3						3							3
	CO2	3		3			3								3
	CO3	3			3	1									
	CO4	3				1		1							3
Course Content	UNIT-I: FUNDAMENTALS OF ENVIRONMENTAL GEOTECHNOLOGY • Introduction and scope of Environmental Geotechnology • Sources and types of contaminants • Impact of subsurface contamination SOURCES AND CHARACTERISTICS OF WASTES • Waste characterization and its environmental concerns • Waste management strategies • Engineered waste disposal facilities														

	UNIT-II: SOIL-WATER INTERACTION • Soil mineralogy characterization and its role in soil behaviour • Soil-water interaction and double-layer concepts • Forces of interaction between soil particles CONTAMINANT TRANSPORT • Soil-water-contaminant interactions and their implications • Factors affecting contaminant retention and transport UNIT-III: CONTAMINATED SITE ASSESSMENT • Need for site characterization • Characterization methods: Electromagnetic resistivity, ground-penetrating radar, electrochemical and electro-optical sensing methods CONTAINMENT FACILITY • Principles and concept of waste containment • Site selection criteria for containment facilities • Components and design of waste containment systems UNIT-IV: CONTAMINATED SITE REMEDIATION • Methods for subsurface contamination remediation • Selection and planning of remediation techniques • Bio-remediation, incineration, soil washing, electro-kinetics, and soil heating RECYCLING AND REUSE • Geotechnical reuse of waste materials • Waste characteristics for soil replacement • Suitability of waste materials for geotechnical construction

	Roofs, Doors & Windows. UNIT III: PLUMBING SERVICES: Types of plumbing; Plumbing fittings and accessories; Water Meters; Drainage – Sanitary Fittings; Bathtubs, wash basins, sinks, flushing cisterns, water closets; Principles governing design of building drainage; Guidelines for laying of Gas supply systems. ELECTRICAL INSTALLATION IN BUILDINGS: Electrical Considerations for Office Buildings, School Buildings & Residential Buildings; Lighting, Fanning, Electrical Installation for Air Conditioning/ Heating, Reception and distribution of main supply; Method of internal wiring; Earthing; Lightning arrestors. UNIT – IV FIRE SAFETY: Causes of fire in buildings; Planning considerations for fire resistance: Non-combustible materials in construction, fire escapes, Special features required for physically handicapped and elderly people; Heat and smoke detectors, Fire alarm system, snorkel ladder, Firefighting pump; Dry risers and wet risers, Automatic sprinklers. ANTI-TERMITE TREATMENT: Preconstruction treatment, Post construction treatment; Construction of anti-termite groove in buildings for termite prevention.

23CE5352 ADVANCED SURVEYING LAB

Course Category:	Programme Core	Credits:	1.5
Course Type:	Lab	Lecture - Tutorial - Practice:	0 - 0- 3
Prerequisites:	23CE3304 Surveying & Geomatics	Continuous Evaluation:	30
		Semester end Evaluation:	70
		Total Marks:	100

Course Outcomes	Upon successful completion of the course, the student will be able to:														
	CO1	Apply the surveying principles for setting boundaries, computing area and elevation using a total station													
	CO2	Apply setting out for buildings and curves using various instruments													
	CO3	Evaluate the contours for any given area													
	CO4	Apply advanced instruments for surveying													
Contribution of Course Outcomes towards achievement of Program Outcomes (1 – Low, 2 - Medium, 3 – High)		PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO10	PO 11	PO 12	PSO 1	PSO 2
	CO1	2			3	2								1	2
	CO2	2			3										2
	CO3	2		2	3									1	2
	CO4	2			3										2
Course Content	1. Measure the boundaries of a given tract of land and determine the area using Total Station. 2. Set out a building using chain and tape. 3. Set out a building using total station. 4. Set out a simple circular curve using chain and tape. 5. Set out a simple circular curve using chain, tape and theodolite. 6. Set out a simple circular curve using a total station. 7. Determine the elevation of a remote object. 8. Plot the contour map for a given area using total station. 9. Determine the area of a given tract of land using DGPS. 10. Set out a building using DGPS. 11. Demonstration of Unmanned Aerial Vehicle (UAV).

Course Outcomes	Upon successful completion of the course, the student will be able to:														
	CO1	identify and formulate real-world community problems through field visits, interaction, and literature study.													
	CO2	design solutions using appropriate civil engineering techniques and modern engineering software tools for complex engineering problems.													
	CO3	understand the impact of the professional engineering solutions with ethical principles in social and environmental contexts.													
	CO4	apply skills effectively and communicate clearly by documenting and presenting solutions to community-based problems.													
Contribution of Course Outcomes towards achievement of Program Outcomes (1 – Low, 2 - Medium, 3 – High)		PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO10	PO 11	PSO1	PSO2	
	CO1		2	2			3					2	2	2	
	CO2			3	2	2							2	2	
	CO3							2					2	2	
	CO4									3	2				
Course Content	Engineering Project In Community Services (EPICS): ➤ This course enables students to engage with society through field visits to villages, towns, local communities, hospitals, schools, and recreational areas to identify real-world problems related to civil engineering such as water supply, sanitation, waste management, transportation, housing, and environmental sustainability. ➤ Students will review relevant journal papers, technical articles, and case studies to analyze the identified issues and explore feasible, cost-effective, and sustainable solutions. Emphasis will be placed on applying civil engineering knowledge to develop innovative designs, small-scale models, or prototypes that address community needs. ➤ The project work will be carried out during the summer vacation after the IV semester, and students are required to submit a detailed report and present their outcomes at the end of the V semester, thereby enhancing their technical, problem-solving, teamwork, and social responsibility skills.

23TP5106 PERSONALITY DEVELOPMENT

Course Category:	Soft Skills – 3	Credits:	1
Course Type:	Practical	Lecture – Tutorial - Practice:	0 – 0 – 2
	Basic understanding of the language skills viz Listening, Speaking, Reading and Writing.	Continuous Evaluation:	100
		Semester end Evaluation:	0
		Total Marks:	100

Course Outcomes	Upon successful completion of the course, the student will be able to:													
	CO1	recall the fundamentals of developing a positive attitude using verbal and nonverbal communication.												
	CO2	Understand how to listen, reflect, and speak while communicating with others using Management skills, team building and leadership qualities.												
	CO3	Apply language skills and etiquettes in professional and social contexts with clarity and accuracy.												
	CO4	Analyze ideas with coherence, cohesion and precision in formal communication through group discussion & Interviews.												
Contribution of Course Outcomes towards achievement of Program Outcomes (1 – Low, 2 - Medium, 3 – High)		PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO10	PO 11	PO 12	
	CO1	M									H		M	
	CO2	M								M	H		M	
	CO3	M									H		M	
	CO4	M									H		M	
Course Content	COURSE CONTENT 7) Pre-Placement Tests Synonyms – Antonyms – One-word Substitutes – Correction of Sentences – Vocabulary Analogies – spotting Errors – Sentence Correction. 8) Corporate Grooming Personal attire – Personal Hygiene – Professional Conduct – Personal Branding – Networking Skills – Workplace Diversity. 9) Group Discussions Communication Skills – Subject Knowledge – Listening Power – Attitude – Confidence – Leadership Skills – Ways of Presentation – views – Interaction Skills – Decision making ability – Problem solving ability –Critical Thinking ability – Analytical Thinking – Open-mindedness. 10) Interview Skills Preparation – Professionalism – Communication – Body Language – Problem Solving skills – Motivational Enthusiasm – Closing the interview.

23MC5107B Humanities Elective (MANDATORY COURSE)

MINORS

23CEM4701 INTRODUCTION TO CIVIL ENGINEERING – CONCEPTS AND MATERIALS

Course Category:	Minor	Credits:	3
Course Type:	Theory	Lecture - Tutorial - Practice:	3 - 0- 0
Prerequisites:	---	Continuous Evaluation:	30
		Semester end Evaluation:	70
		Total Marks:	100

Course Outcomes	Upon successful completion of the course, the student will be able to:														
	CO1	understand evaluation of civil engineering materials and use of stone as a primary component													
	CO2	evaluate the quality of bricks and timber													
	CO3	apply test on cement and understand varieties of concrete													
	CO4	analyze the quality of steel and paints													
Contribution of Course Outcomes towards achievement of Program Outcomes (1 – Low, 2 - Medium, 3 – High)		PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO10	PO 11	PO 12	PSO 1	PSO 2
	CO1	3						2							3
	CO2	3						2							3
	CO3	3						2							3
	CO4	3						2							3
Course Content	UNIT – I INTRODUCTION General Introduction to Civil Engineering; History of Civil Engineering; Relevance of Civil Engineering in the overall infrastructural development of the country. STONES: Classification of rocks; Qualities of a good building stone; Uses of Stones; Stone quarrying; Tools for blasting; Common building stones of India. UNIT – II BRICKS: Composition of good brick earth; Qualities of good bricks; Tests for bricks; Classification of bricks; Size and weight of bricks. TIMBER: Definition; Structure of a tree; Qualities of good timber; Preservation of timber; Seasoning of timber; Advantages of timber construction; Use of timber.														

	UNIT – III CEMENT Basic Ingredients; Grades of cement; Properties of cement; Field tests on cement. CONCRETE Definition; properties; Special Concretes-Light weight concrete, High density concrete, Fibre reinforced concrete, Polymer concrete. UNIT – IV STEEL General; Manufacture of steel; Uses of steel; Market forms of steel; Properties of mild steel; Properties of hard steel; PAINTS, VARNISHES AND DISTEMPERS General; Painting; Varnishing; Distempering; Wall paper; White washing; Colour washing.

**23CEM5701 METHODOLOGY FOR CIVIL ENGINEERING
CONSTRUCTION**

Course Category:	Minor	Credits:	3
Course Type:	Theory	Lecture - Tutorial - Practice:	3 - 0- 0
Prerequisites:	---	Continuous Evaluation:	30
		Semester end Evaluation:	70
		Total Marks:	100

Course Outcomes	Upon successful completion of the course, the student will be able to:														
	CO1	Evaluate the feasibility of the construction project													
	CO2	Apply planning and construction contracts													
	CO3	Analyse construction finance and organization structure													
	CO4	Evaluate the materials and adopt the quality control procedures													
Contribution of Course Outcomes towards achievement of Program Outcomes (1 – Low, 2 - Medium, 3 – High)		PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO10	PO 11	PO 12	PSO 1	PSO 2
	CO1	1	1	1							1	2			1
	CO2	1	1	1							1	2			1
	CO3	1	1	1						1	1	2			1
	CO4	1		1							1	2			1
Course Content	UNIT I: INTRODUCTION Role of government and construction agencies, classification of construction works, various stages in construction of a project, the construction team. PROJECT FEASIBILITY REPORTS Introduction, technical analysis, financial analysis, economic analysis, ecological analysis, schematic diagram for feasibility study. UNIT II: PLANNING FOR CONSTRUCTION PROJECTS General, steps involved in planning, objectives, principles, advantages of planning, limitations, stages and types of planning, stages of planning by different agencies. CONSTRUCTION CONTRACTS & TENDERS General, contract documents, types of contract, tender notice, types of tenders, tender														

	documents, Earnest money deposit and security deposit. UNIT III: CONSTRUCTION FINANCING AND CONTROL Introduction, costs associated with constructed facilities, estimates, effect of scale on construction cost, means of financing, application of financial assistance, cost control. ORGANISING FOR CONSTRUCTION Importance, general principles, types of organization structures, forms of business organizations. UNIT – IV: MATERIALS MANAGEMENT Importance, Objectives, Costs, functions of material management, uses, stores management, material procurement, maintaining stocks, material handling. QUALITY CONTROL IN CONSTRUCTION Elements of quality, Organisation for quality control, Quality assurance techniques, Documentation, Quality control circles, variation

23CEM6701 SYSTEM DESIGN FOR SUSTAINABILITY

Course Category:	Minor	Credits:	3
Course Type:	Theory	Lecture - Tutorial - Practice:	3 - 0- 0
Prerequisites:		Continuous Evaluation:	30
		Semester end Evaluation:	70
		Total Marks:	100

Course Outcomes	Upon successful completion of the course, the student will be able to:														
	CO1	Understand the sustainable product-service systems (SPSS) and their application in distributed renewable energy systems,													
	CO2	Apply SPSS to distributed renewable energy systems and exploring their sustainability.													
	CO3	Understand methodologies for design for Sustainability, and role in promoting eco-efficiency and social equity,													
	CO4	Acquire knowledge on methods and tools for system design for sustainable energy, and design strategies to real-world case studies.													
Contribution of Course Outcomes towards achievement of Program Outcomes (1 – Low, 2 - Medium, 3 – High)		PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO10	PO 11	PO 12	PSO 1	PSO 2
	CO1	1		1			2	3							2
	CO2	1		1			2	3				1			2
	CO3	1		1			2	3				1			2
	CO4	1		1		1	2	3				1			2
Course Content	UNIT I : INTRODUCTION Addressing sustainability by design; an introduction to sustainable product-service systems Applied to distributed renewable energy; United nations sustainability energy for all agenda. DISTRIBUTED ENERGY SYSTEMS Distributed renewable energy systems and Integrating SPSS with DE. UNIT II : SUSTAINABLE PRODUCT-SERVICE SYSTEM (SPSS) Introduction to SPSS; Types; Sustainability Benefits; Barriers and Limits. SUSTAINABLE PRODUCT-SERVICE SYSTEM APPLIED TO DISTRIBUTED RENEWABLE ENERGIES A Win-Win opportunity; Scenario for SPSS applied to distributed renewable energy (DRE); SPSS applied to DRE: Sustainability Potential Benefits; SPSS applied to DRE: Sustainability Potential Benefits.														

	UNIT III: DESIGN FOR SUSTAINABILITY Evolution of design for sustainability ; Product life cycle design or Eco-Design ;Design for Eco-Efficient Product-Service Systems; Design for Social Equity and Cohesion; Design for Socio-Technical Transitions; State of the art of design for Sustainability Human Centred and Universal Design. SYSTEM DESIGN FOR SUSTAINABLE ENERGY FOR ALL: A NEW ROLE FOR DESIGNERS System design for sustainable energy for all (SD4SEA); SDSEA Design Criteria, Guidelines and Examples. UNIT IV: METHOD AND TOOLS FOR SYSTEM DESIGN FOR SUSTAINABLE ENERGY FOR ALL(SD4SEA) Method for system design for sustainable energy for all; Sustainability design orienting Scenario; (SDOS) on S.PSS&DRE; Sustainable energy for all idea Tables and Cards; E.DRE—Estimator for Distributed Renewable Energy; PSS + DRE Innovation Map S.PSS + DRE Design Framework & Card ; The Energy System map innovation diagram for S.PSS& DRE; Concept Description Form for S.PSS and DRE Stakeholder Motivation and Sustainability Table. PRACTICAL EXAMPLES OF APPLICATION OF SDSEA APPROACH/TOOLS AND OTHER METHODS TO ACHIEVE SUSTAINABILITY Solar Energy Company, Botswana; SMEs for Energy, Uganda ; Summary and Considerations; green design; emotionally durable design; cradle to cradle design, bio mimicry design; design for base of a pyramid design; design for social innovation.

23CEM6702 ECOLOGY AND ENVIRONMENT

Course Category:	Minor	Credits:	3
Course Type:	Theory	Lecture - Tutorial - Practice:	3 - 0- 0
Prerequisites:		Continuous Evaluation:	30
		Semester end Evaluation:	70
		Total Marks:	100

Course Outcomes	Upon successful completion of the course, the student will be able to:														
	CO1	Analyse the issues concerned with ecology, environment and sustainability.													
	CO2	Evaluate the quantity and quality of water based on the available natural sources													
	CO3	Evaluate the water purification units and components of the distribution systems.													
	CO4	Analyze the effect of various attributes of environmental pollution													
Contribution of Course Outcomes towards achievement of Program Outcomes (1 – Low, 2 - Medium, 3 – High)		P O 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO 10	PO 11	PO 12	PS O1	PS O2
	CO1	1						2					2	1	1
	CO2	2	3		3		1								2
	CO3	2	1	3			1							1	2
	CO4	1	1	2	1										2
Course Content	UNIT I: INTRODUCTION TO ECOLOGY AND ENVIRONMENT Definition, scope & importance, need for public awareness- environment - definition, ecology, eco system - balanced ecosystem, human activities - food, shelter, economic and Social security. SUSTAINABILITY Sustainability – definition, significance, sustainability goals, impacts of climate change, Case Studies. UNIT II: WATER SUPPLY - QUANTITY OF WATER Sources of water, objectives of water supply systems, Per capita consumption; Types of demands; Fluctuations in demand.														

	QUALITY OF WATER Water purity characteristics; analysis of water samples - physical, chemical and biological tests; Standards for drinking water as per W.H.O; Water borne diseases. UNIT III: WATER TREATMENT Fundamentals on water purification; sedimentation; coagulation and types of coagulants; sedimentation and coagulation tanks uses and importance; theory of filtration; slow sand and rapid sand filters; operation; disinfection methodologies DISTRIBUTION SYSTEMS Methods of supply; Layouts, Plumbing-pipes and fittings; Traps; One pipe and Two pipe Systems. UNIT – IV ENVIRONMENTAL POLLUTION Environmental Pollution: Water pollution, Land and soil pollution, Air pollution, their impacts and on health and environment. SOLID WASTE MANAGEMENT Solid waste characteristics–basics on on-site handling, collection –separation and processing – Incineration- Composting-Solid waste disposal methods – Fundamentals of land filling.

23CEM7701 INFRASTRUCTURE AND TRANSPORTATION SYSTEM PLANNING

Course Category:	Minors	Credits:	3
Course Type:	Theory	Lecture - Tutorial - Practice:	3 - 0- 0
Prerequisites:	Nil	Continuous Evaluation:	30
		Semester end Evaluation:	70
		Total Marks:	100

Course Outcomes	Upon successful completion of the course, the student will be able to:														
	CO1	Analyze and differentiate various types of roads and pavement structures.													
	CO2	Evaluate and understand different pavement materials and construction methods for effective pavement design.													
	CO3	Identify and describe the key components of a railway track system.													
	CO4	Understand and apply knowledge of geometric features in the design and layout of railway tracks.													
Contribution of Course Outcomes towards achievement of Program Outcomes (1 – Low, 2 - Medium, 3 – High)		PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO10	PO 11	PO 12	PSO 1	PSO 2
	CO1	2					2								
	CO2	2	2	2											
	CO3	2	2												
	CO4	2	2	2			2								
Course Content	UNIT-I INTRODUCTION TO ROADWAYS: Different Modes of Transportation, Road development in India during twentieth century, Classification of different types of roads, Highway cross section elements. PAVEMENTS: Different types of pavements – Cross section, functions of pavement layers, Need for design, importance of drainage UNIT-II MATERIALS FOR PAVEMENTS: Materials used in highway construction- soil, fine and coarse aggregate, bituminous binders, cement, water.														

	CONSTRUCTION OF PAVEMENTS: Construction of flexible pavement, Construction of rigid pavement, Equipment for excavation, equipment for compaction. UNIT-III INTRODUCTION TO RAILWAYS: Historic development of railways in India, Classification of Indian Railways, Different gauges in Indian Railways. COMPONENTS OF RAILWAY TRACK: Permanent way cross section and functions, Types of rails, Types of Sleepers, Types of ballast, cross section of ballast, coning of wheels, sleeper density, length of rails. UNIT-IV GEOMETRIC FEATURES AND OPERATION: Super elevation or cant, cant deficiency, cant excess, negative super elevation concept, types of transition curves, gradient types. POINTS AND CROSSINGS: Switches, crossings, working principle of turnout, classification of signals, interlocking

V. R. Siddhartha Engineering College, Department of Civil Engineering: VR23 Regulation Syllabus

23CEM7702B NPTEL (Mandatory Course Based on Availability)

HONORS

23CEH4801A STABILITY OF STRUCTURES

Course Category:	Program core	Credits:	3.0
Course Type:	Theory	Lecture - Tutorial - Practice:	3 - 0- 0
Prerequisites:	Honors	Continuous Evaluation:	30
		Semester end Evaluation:	70
		Total Marks:	100

Course Outcomes	Upon successful completion of the course, the student will be able to:														
	CO1	Analyze the buckling of columns, beam-columns and find critical loads using energy and non-energy methods													
	CO2	Analyze the lateral buckling of beams by energy and non-energy methods													
	CO3	Analyze the buckling of rectangular plates and find critical compressive loads for various boundary conditions													
	CO4	analyze the buckling of axially loaded cylindrical shells													
Contribution of Course Outcomes towards achievement of Program Outcomes (1 – Low, 2 - Medium, 3 – High)		PO 1	PO2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO10	PO 11	PO12	PSO 1	PSO 2
	CO1	1		3	2		1							2	
	CO2	1		3	2		1							2	
	CO3	1		3	2		1							2	
	CO4	1		3	2		1							2	
Course Content	UNIT-I Buckling of columns: Introduction; Methods of finding critical loads; Critical loads for straight columns with different end conditions and loading; Inelastic buckling of axially loaded columns; Energy methods; Prismatic and non-prismatic columns under discrete and distributed loading. Beam Columns – Theory of Beam column – Stability analysis of beam column with different types of loads. UNIT-II Lateral Buckling of Beams: Beams under pure bending; Cantilever and simply supported beams of rectangular and I sections; Beams under transverse loading; Energy methods; Solution of simple problems. UNIT-III														

	Buckling of Rectangular Plates: Plates simply supported on all edges and subjected to constant compression in one or two directions; Plates simply supported along two opposite sides perpendicular to the direction of compression and having various edge conditions along the other two sides UNIT-IV Buckling of Shells: Introduction to buckling of axially compressed cylindrical shells, Linear theory of cylindrical shells-donnell equations, critical load of an axially loaded cylinder, failure of axially compressed cylindrical shells
Text books	1. Theory of elastic stability by Timoshenko & Gere, McGraw Hill, 1961. 2. Background to buckling by Allen and Bulson, McGraw- Hill, 1980.
Reference books	1. Elastic stability of structural elements by N.G.R.Iyengar, Macmillan India Ltd., 2007. 2. Principles of Structural stability theory by Alexandar Chajes

23CEH4801B SUSTAINABLE CONSTRUCTION METHODS

Course Category:	Honors	Credits:	3
Course Type:	Theory	Lecture - Tutorial - Practice:	3 - 0- 0
Prerequisites:	---	Continuous Evaluation:	30
		Semester end Evaluation:	70
		Total Marks:	100

Course Outcomes	Upon successful completion of the course, the student will be able to:														
	CO1	Apply the green buildings and sustainable design aspects													
	CO2	Analyze the water conservation and energy efficiency													
	CO3	Evaluate the sustainable materials and wellbeing of residents													
	CO4	Apply principles of green rating systems in construction													
Contribution of Course Outcomes towards achievement of Program Outcomes (1 – Low, 2 - Medium, 3 – High)		PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO10	PO 11	PO 12	PSO 1	PSO 2
	CO1	1		1				2	1						1
	CO2	1		1				2	1						1
	CO3	1		1			2	2	1						2
	CO4	1		1				2	1						2
Course Content	UNIT I: INTRODUCTION Green building, Global warming, requirement of Green Building, Benefits of green Buildings SUSTAINABLE DESIGN Local building requirements, soil erosion control, natural topography, vegetation, heat island effect, roof & non-roof, passive architecture, basic house hold amenities, green education & awareness UNIT II: WATER CONSERVATION Water efficient plumbing fixtures, rain water harvesting, landscape design, management of irrigation system, recycle and reuse of waste water, water quality ENERGY EFFICIENCY HCFC free equipment, minimum energy performance, enhance energy performance, alternate														

	water heating systems, on-site renewable energy – common lighting, energy efficiency in common area equipment, integrated energy monitoring system UNIT III: MATERIALS & RESOURCES Separation of house-hold waste, green procurement policy, local materials, eco friendly wood based materials, alternate construction material, handling of construction & demolition material. RESIDENT HEALTH & WELLBEING Minimum day lighting, Ventilation design, no smoking policy, enhanced day lighting, enhanced ventilation design, cross ventilation UNIT – IV CONSTRUCTION AND OPERATIONS Construction, Occupancy & Operations GREEN RATING SYSTEMS IGBC, LEED, GRIHA, BEE, benefits of rating systems, procedure to get IGBC certification
Text books	[T1] IGBC Green homes rating system Version 3.0 – A bridged reference guide, September 2019 [T2] Jerry Yudelson, —Green building through Integrated design, Mc Graw Hill, 2009 [T3] Gautham R K, —Green Homes, BSP Books Private Limited, New Delhi, 2009.

23CEH4801C DESIGN OF FORMWORK

Course Category:	Honors	Credits:	3
Course Type:	Theory	Lecture - Tutorial - Practice:	3-0-0
Prerequisites:		Continuous Evaluation:	
		Semester end Evaluation:	
		Total Marks:	

Course outcomes	Upon successful completion of the course, the student will be able to:														
	CO1	apply a right material for manufacturing false work and form work suiting specific													
	CO2	analyze the pressure of concrete on form work													
	CO3	evaluate the adequacy of decking, form work and false work.													
	CO4	evaluate the sequence of construction of civil engineering structures and safety steps involved in the design of form work and false work.													
Contribution of Course Outcomes towards achievement of Program Outcomes (Low – 1, Medium - 2, High – 3)		P O 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO 10	PO 11	PO 12	PSO 1	PSO 2
	CO1		1			2	1	1		1	1				2
	CO2	2	2	1		2								2	
	CO3	3	3	3			1			1				3	1
	CO4	1	2			1	2	1		1	1			2	
Course Content		UNIT – I INTRODUCTION Formwork and false work, Temporary work systems, Construction planning and site constraints. MATERIALS OF FORMWORK Materials and construction of the common formwork and false work systems, Special and proprietary forms.													
		UNIT – II FORM WORK Formwork – Design: Concrete pressure on forms, Design of timber and steel forms ANALYSIS OF FORMWORK Loading and moment of formwork.													

	<i>UNIT – III</i> DESIGN OF DECKS Types of beam, decking and column formwork, Design of decking FALSE WORKS False work design, Effects of wind load, Foundation and soil on false work design.
	<i>UNIT – IV</i> SPECIAL FORMS The use and applications of special forms. CONSTRUCTION SEQUENCE AND SAFETY IN USE OF FORMWORK Sequence of construction, Safety use of formwork and false work.
Text books	[T1] Robert L. Peurifoy and Garold D. Oberiender, —Formwork for Concrete Structures, McGraw-Hill, 1996. [T2] TudorDinescu and Constantin Radulescu, —Slip Form Techniques, Abacus Press, Turn Bridge Wells, Kent, 2004.

23CEH5801A ENGINEERING ROCK MECHANICS

Course Category:	Program Core	Credits:	3
Course Type:	Theory	Lecture - Tutorial - Practice:	3 - 0- 0
Prerequisites:	Geotechnical Engineering	Continuous Evaluation:	30
		Semester end Evaluation:	70
		Total Marks:	100

Course Outcomes	Upon successful completion of the course, the student will be able to:														
	CO1	evaluate rock masses based on classification systems													
	CO2	apply the laboratory and field testing of rocks to assess their engineering properties													
	CO3	analyze rocks based on the failure criteria													
	CO4	evaluate the bearing capacity of foundations on rocks and understand stability of rock slopes													
Contribution of Course Outcomes towards achievement of Program Outcomes (1 – Low, 2 – Medium, 3 – High)		PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO10	PO 11	PO 12	PSO 1	PSO 2
	CO1	3	2	2			3								1
	CO2	3	2	2			3								1
	CO3	3	2	2			3								1
	CO4	3	2	2			3								1
Course Content	UNIT I: INTRODUCTION TO ROCK MECHANICS AND CLASSIFICATION OF ROCKS Objectives of rock mechanics, Fields of application of rock mechanics. Geological Classification of igneous, sedimentary and metamorphic rocks based on texture and stratification. ROCK MASS CLASSIFICATIONS Rock Quality Designation (RQD), Rock Structure Rating (RSR), Rock Mass Rating (RMR). UNIT II: LABORATORY TESTS - PHYSICO —MECHANICAL PROPERTIES OF ROCKS Compressive strength, Tensile strength, Direct shear test, Triaxial shear test, Slake durability test, Schmidt rebound hardness test FIELD TESTS - PHYSICO —MECHANICAL PROPERTIES OF ROCKS Uniaxial jacking test, Pressure meter tests, Hydraulic fracturing, Flat jack test. Electric resistivity method, Seismic refraction method.														

	UNIT III: FAILURE CRITERIA FOR ROCK AND ROCK MASSES Mohr-Coulomb Yield Criterion, Hoek-Brown Criterion. STRENGTH AND DEFORMABILITY OF JOINTED ROCK MASS Shear strength of Rock joints, Deformability of Rock joints, Concept of joint compliance. UNIT – IV FOUNDATION ON ROCKS Estimation of bearing capacity, Settlement in rocks, Pile foundation in rocks. STABILITY OF ROCK SLOPES AND METHODS TO IMPROVE ROCK MASS RESPONSES Modes of failure, Grouting in Rocks, Rock bolting, Rock Anchors.

23CEH5801C GEOSPATIAL DATA PROCESSING

Course Category:	Honors	Credits:	3
Course Type:	Theory	Lecture - Tutorial - Practice:	3 - 0- 0
Prerequisites:		Continuous Evaluation:	30
		Semester end Evaluation:	70
		Total Marks:	100

Course Outcomes	Upon successful completion of the course, the student will be able to:														
	CO1	Understand the concepts of Geographical information systems and apply them in various engineering applications.													
	CO2	Evaluate appropriate remote sensing data products for mapping, monitoring and management applications.													
	CO3	Apply various image processing techniques and their applications.													
	CO4	Apply RS and GIS techniques for solving Engineering applications.													
Contribution of Course Outcomes towards achievement of Program Outcomes (1 – Low, 2 - Medium, 3 – High)		PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO10	PO 11	PO 12	PSO 1	PSO 2
	CO1	3	2	3		3									3
	CO2	3	2	3		3									3
	CO3	3	2	3		3								2	
	CO4	3	2	3		3								2	
Course Content	UNIT I: GEOGRAPHICAL INFORMATION SYSTEM Components of GIS, Types of Data, coordinate systems, Geographic coordinate system, Projected coordinate system, Maps and scales, Types of Maps and scales, Projections, Types of Projections, Georeferencing, Data structures, GIS analysis functions. DATA EDITING AND STORAGE Raster and vector data models, Digitization, Data editing, Errors and corrections, data presentation and generation of thematic maps, spatial database management systems, Data representation, Data storage, Entity relationship models. PRACTICE: 1. Introduction to Arc GIS and Georeferencing, projections and re-projections Creating a shape file, clip and attribute data manipulation. UNIT II: INTRODUCTION TO REMOTE SENSING Introduction, Data and Information, Remote sensing data collection, Remote sensing advantages & Limitations, Remote Sensing process. Electromagnetic Spectrum, Energy interactions with atmosphere and with earth surface features (soil, water, and vegetation), Resolution, image registration and elements of visual interpretation techniques.														

	DATA ACQUISITION AND PLATFORMS Indian Satellites and Sensors characteristics, Remote Sensing Platforms, Sensors and Properties of Digital Data, Data Formats: Introduction, platforms-IRS, Landsat, Sentinel, SPOT, CARTOSAT, etc. sensors, sensor resolutions (spatial, spectral, radiometric and temporal), Optical, Thermal and Microwave, signal to noise ratio, LiDAR data acquisition and processing. PRACTICE 3.DataDigitization (Draw, edit, delete and update) UNIT III: IMAGE CLASSIFICATION TECHNIQUES Supervised Classification, Unsupervised classification, ANN and SVM classification techniques SPECTRAL INDICES Vegetation indices, water related indices, Digital elevation model, Digital terrain model, Triangulated irregular networks. PRACTICE 4. Data Analysis – Overlay, Buffer 5. Generation of DEM and DTM using raster data. UNIT – IV APPLICATIONS IN SCIENCE DOMAIN Applications of Remote sensing in various Engineering and Science domains such as Agriculture, Forest, Soil, Geology APPLICATIONS IN ENGINEERING DOMAIN LU/LC, Water Resources, Urban, Disaster Management, etc PRACTICE 6. Assignment on Application of Geospatial techniques in Civil Engineering.
Text books	[T1] Photogrammetry, GIS & Remote Sensing, <u>SSManugula</u>, VeerannaBommakanti,, Educreation Publishing, 2018 [T2] Text Book of Remote Sensing and Geographical Information Systems, M. Anji Reddy, BS Publications/BSP Books, 4th edition, 2012

23CEH6801A TRAFFIC ANALYSIS AND DESIGN

Course Category:	Honors	Credits:	3
Course Type:	Theory	Lecture - Tutorial - Practice:	3 - 0- 0
Prerequisites:	NIL	Continuous Evaluation:	30
		Semester end Evaluation:	70
		Total Marks:	100

Course Outcomes	Upon successful completion of the course, the student will be able to:														
	CO1	Understand traffic engineering studies, analyse the data and present the results.													
	CO2	Evaluate traffic and road facilities, and intersection control measures for smooth traffic movement.													
	CO3	Analyse appropriate traffic control and management measures.													
	CO4	Apply the principles of queuing theory to analyse delay at signalized and Un signalized intersections.													
Contribution of Course Outcomes towards achievement of Program Outcomes (1 – Low, 2 - Medium, 3 – High)		PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO10	PO 11	PO 12	PSO 1	PSO 2
	CO1	3			3					1					
	CO2	3	3								1			3	
	CO3	3					3								3
	CO4	3	3							1					3
Course Content	UNIT I Traffic Engineering Studies and Analysis Sampling in Traffic Studies, Adequacy of Sample Size; Objectives, Methods of Study, Equipment. Data Collection, Analysis and Interpretation Case Studies of (a) Speed (b) Speed and Delay (c) Volume (d) Origin and Destination (e) Parking (f) Accident & other Studies UNIT II Design of Traffic Engineering Facilities Control of Traffic Movements through Time Sharing and Space Sharing Concepts. Design of Islands														

	Design of Channelising Islands, T, Y, Skewed, Staggered, Roundabout, Mini-roundabout and other forms of AT-Grade Crossings including provision for safe crossing of Pedestrians and Cyclists; Grade Separated Intersections, their Warrants and Design Features; Bus Stop Location and Bus Bay Design UNIT III Traffic Regulation and Management Traffic Signs, Markings and Signals; Principles of Signal Design, Webster's method of Signal Design, Redesign of Existing Signals including Case Studies; Signal System and Coordination. Traffic Management measures Speed, vehicle, parking, enforcement regulations, mixed traffic regulation, various management techniques. UNIT – IV Traffic Stream Models Fundamental Equation of Traffic Flow, Speed-Flow-Concentration Relationships, Normalised Relationship, Fluid Flow Analogy Approach, Shock Wave Theory, Platoon Diffusion and Boltzman Like Behaviour of Traffic Flow, Car-Following Theory, Linear and Non-Linear Car-Following Models, Acceleration Noise. Queuing Analysis Fundamentals of Queuing Theory, Demand Service Characteristics, Deterministic Queuing Models, Stochastic Queuing Models, Multiple Service Channels, Models of Delay at Intersections and Pedestrian Crossings.
Text books	[1] . Kadiyali, L.R., Traffic Engineering and Transport Planning, Khanna publishers, 2011. [2]. The Institute of Transportation Engineers, Traffic Engineering Handbook, 7th edn, 2016.

23CEH6801B TRANSPORTATION ECONOMICS

Course Category:	Honors	Credits:	3
Course Type:	Theory	Lecture - Tutorial - Practice:	3 - 0- 0
Prerequisites:	NIL	Continuous Evaluation:	30
		Semester end Evaluation:	70
		Total Marks:	100

Course Outcomes	Upon successful completion of the course, the student will be able to:														
	CO1	Understanding the economic principles and estimating the various cost components in transportation													
	CO2	Apply the possible project alternatives for the economic analysis and applying the appropriate economic analysis method													
	CO3	Analysing Demand and Supply modelling													
	CO4	Attaining Knowledge on Regulation and Policy making of Economic Evaluation													
Contribution of Course Outcomes towards achievement of Program Outcomes (1 – Low, 2 - Medium, 3 – High)		PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO10	PO 11	PO 12	PSO 1	PSO 2
	CO1	3	3											3	3
	CO2	3	3			3				1					
	CO3	3			3										
	CO4	3							3		1				3
Course Content	UNIT I Transport Costs and Benefits Principles of economic analysis, Fixed and variable cost, cost of improvement, maintenance cost, cost estimating methods, accounting for inflation, external costs. Consequences of transport projects, road user consequences Reduced vehicle operation costs, value of travel time savings, value of increased comfort and convenience, cost of accident reduction, reduction in maintenance cost, non-user consequences – travel time. UNIT II Economic Analysis Methods Generation and screening of project Alternatives Different methods of economic analysis annual cost and benefit ratio methods, discounted cash flow methods, shadow pricing techniques, determination of IRR and NPV, examples of economic analysis, application economic theory in traffic assignment problem.														

	UNIT III Transport Demand The Basic Framework- measuring the demand in a spatial and temporal setting. Traditional Four-Stage Demand Model; modern approaches to modelling demand and practical issues in demand estimation. Transport Supply The nature of output in transport, output and costs, economies of size, density and scope, empirical estimation of transport cost functions- the approaches and illustrations. UNIT – IV Regulation and policy Theory of Regulation, Deregulation and Privatisation in Transport. Approaches to privatisation of transport infrastructure and services and a competition policy for transport. Evolution of transport policy in India with focus on case studies regarding different modes. Evolution of Policy Evolution of transport policy in India with focus on case studies regarding different modes.

	Static capacity of piles; Point bearing resistance with SPT and CPT; Ultimate capacity of pile groups in compression; Settlement; Pile load test; Negative skin friction. SPECIAL PILES AND SETTLEMENTS OF PILE Laterally loaded piles – Ultimate lateral resistance; Batter piles; Under-reamed piles; Mini and micro piles; Pullout& lateral load; Efficiency; Settlements of pile groups. UNIT – IV WELL FOUNDATIONS Open wells; Design of pier foundations and well foundations; Lateral stability of well foundations; RCC designs of wells. PNEUMATIC CAISSONS Introduction to pneumatic caissons; Construction of piers.

23CEH6801B1 NPTEL Mandatory Course based on Availability

23CE6301 DESIGN OF STEEL STRUCTURES

Course Category:	Program Core	Credits:	4
Course Type:	Theory	Lecture - Tutorial - Practice:	3 - 1- 0
Prerequisites:		Continuous Evaluation:	30
		Semester end Evaluation:	70
		Total Marks:	100

Course Outcomes	Upon successful completion of the course, the student will be able to:													
	CO1	Explain the behavior of steel materials and describe the design principles of bolted and welded connections subjected to axial loading as per IS codal provisions.												
	CO2	Apply codal provisions to assess the lateral stability of steel beams, and design both laterally supported and unsupported beams.												
	CO3	Analyze the behavior and failure modes of tension and compression members and design axially loaded members with bolted and welded connections as per IS 800:2007.												
	CO4	Apply the relevant IS code provisions to design slab bases and gusseted column bases with connections.												
Contribution of Course Outcomes towards achievement of Program Outcomes (1 – Low, 2 – Medium, 3 – High)		PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO10	PO 11	PSO 1	PSO 2
	CO1	2	2	3		3	1						3	
	CO2	2	2	3		3	1						3	
	CO3	2	2	3		3	1						3	
	CO4	2	2	3		3	1						3	
Course Content	UNIT I: GENERAL Fundamental Concepts of limit state design of structures, Different types of rolled steel sections available to be used in steel structures. Stress – Strain relationship for mild steel. SIMPLE CONNECTIONS (IS800-2007) Bolted connections: Types of joints, Behaviour of bolted joints, Design Strength of ordinary black bolts, Simple connections. Design of bolted joints subjected to axial load. Welded Connections: Advantages of welding, Types and properties of welds, Types of joints, weld specifications, Design of welded joints subjected to axial load. UNIT II: BEAMS- LATERALLY SUPPORTED (IS800-2007) Introduction; classification of sections; Lateral stability of beams; web													

	Buckling; Web crippling. Design of laterally supported beams. BEAMS- LATERALLY UNSUPPORTED (IS800-2007) Design of laterally unsupported beams. UNIT III: TENSION MEMBERS (IS800-2007) Types of tension members, slenderness ratio, and displacement of tension Members, behaviour of tension members, modes of failure, factors affecting strength of tension members, design of tension members with bolted and welded connections. COMPRESSION MEMBERS (IS800-2007) Possible failure modes, behaviour of compression members, Effective length, radius of gyration and slenderness of compression members, Allowable stresses in compression, Design of axially loaded compression Members with bolted and welded connections. UNIT – IV COLUMN BASE (IS800-2007) Introduction to column bases and gusseted base, types of column bases. Allowable stress in bearing. SLAB BASE Design of slab base with bolted and welded connections
Text books	[T1] Subramanian, N. Design of steel structures - Oxford university press, NDLS, 2018. [T2] Duggal S K, Limit state design of steel structures –McGraw Hill (I) Pvt Ltd., 2017. [T3] Ramchandra and Gehlot V, Limit State Design of steel structures – Scientific Publishers (I). 2012.

23CE6302 TRANSPORTATION ENGINEERING

Course Category:	Program Core	Credits:	3
Course Type:	Theory	Lecture - Tutorial - Practice:	3 - 0- 0
Prerequisites:		Continuous Evaluation:	30
		Semester end Evaluation:	70
		Total Marks:	100

Course Outcomes	Upon successful completion of the course, the student will be able to:													
	CO1	Explain the principles of highway network planning and describe the factors governing highway alignment and engineering surveys.												
	CO2	Apply geometric design standards to determine sight distance requirements and to design horizontal and vertical alignment elements.												
	CO3	Analyze traffic characteristics using traffic volume, speed, and delay studies, and evaluate traffic control devices including signal design.												
	CO4	Apply IRC codal provisions to design flexible and rigid pavements considering load, environmental factors, and stress analysis.												
Contribution of Course Outcomes towards achievement of Program Outcomes (1 – Low, 2 - Medium, 3 – High)		PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO10	PO 11	PSO 1	PSO 2
	CO1	3		3										
	CO2				3		1							3
	CO3	3	3	3									3	
	CO4	2		3	3			2		3	3			3
Course Content	UNIT I: HIGHWAY NETWORK PLANNING AND ALIGNMENT Different Modes of Transportation, Road Classification, Road Patterns, 20 Year Road Development plans. Highway Alignment: Requirements, factors controlling, Engineering Surveys. PAVEMENT MATERIALS Aggregates and their characterization, Bituminous materials, desirable properties and tests on Aggregates and Bituminous materials, aggregate blending concepts, Marshal Stability Test													

.

UNIT II:

HIGHWAY GEOMETRIC DESIGN

Geometric Design: Highway Cross Section Elements Sight Distance Stopping Sight Distance, Overtaking Sight Distance, Intermediate Sight Distance
Design of Horizontal Alignment- Super elevation, transition curves, extra widening,

HIGHWAY VERTICAL ALIGNMENT

Design of Vertical Alignment, Grades and Grade Compensation.

UNIT III:

TRAFFIC STUDIES

Introduction, Road User Characteristics, Vehicle Characteristics, Traffic Volume Studies objectives, methods, presentation of data, Speed Studies, Methods and presentation of data, various methods of speed and delay studies, Traffic Flow Characteristics, Traffic Capacity and concept of Level of Service.

DESIGN OF TRAFFIC CONTROL DEVICES

Traffic Operations-Traffic Regulation, Traffic Control Devices- types of Signs, types of traffic signals, types of traffic signal system, design of traffic signal by Webster's method.

UNIT – IV:

DESIGN OF FLEXIBLE PAVEMENTS

Types of Pavement Structures, Design Factors, Design of Flexible Pavements- IRC Method using code IRC-37

DESIGN OF RIGID PAVEMENT

Design of Rigid Pavement- Wheel Load stresses, Temperature Stresses, Frictional Stresses. Using code IRC-58

Text books	Text Books for Theory [1].Khanna, S. K., Justo, C. E. G., Veeraragavan, A." Highway Engineering Revised 10th Edition Nem Chand Bros . Roorkee 2017. [2]. Kadyali, L R —Principles and Practices of Highway Engineering, Khanna Publishers, New Delhi, 2004.

23CE6303 FOUNDATION ENGINEERING

[illegible]

	UNIT – III BEARING CAPACITY OF SHALLOW FOUNDATION Different bearing capacity equations; Types of shear failures; Effect of inclined load, eccentric load and water table on bearing capacity; Bearing capacity from in-situ tests; Methods of improving bearing capacity; Plate load test. SETTLEMENT ANALYSIS Settlement of foundations; Immediate and consolidation settlements; Allowable settlement; Proportioning of a foundation for a given settlement. UNIT – IV PILE FOUNDATIONS Necessity of pile foundation; Classification of piles; Construction of piles; Load carrying capacity of single pile from static, dynamic and in-situ test methods; Pile load tests; Pile group and its efficiency; Settlement of pile foundation; Negative skin friction; Under-reamed pile foundation in swelling soils. WELL FOUNDATION Forces acting on well foundation; Types, different shapes of wells; Analysis of well foundation; Individual components of well; Sinking of wells; Measures for rectification of tilts and shifts.
Text books	[T1] Basic and Applied Soil Mechanics, Gopal Ranjan and A.S.R. Rao, 8th Edition, 2018, New Age International (P) Limited Publishers, Chennai. [T2] Soil Mechanics and Foundation Engineering K.R. Arora, 2011, Standard Publishers and Distributors, New Delhi.
Reference books	[R1] Advanced Foundation Engineering, V.N.S. Murthy, 2018, CBS Publishers and Distributors, New Delhi. [R2] Foundation Analysis and Design, Joseph E. Bowles, 4th Edition, 1996, McGraw – Hill International Editions. [R3] Relevant Indian Standard Code Books.

23CE6404/A Advanced Design of concrete structures

Course Category:	Program Elective - II	Credits:	3
Course Type:	Theory	Lecture - Tutorial - Practice:	3 - 0- 0
Prerequisites:	23CE5303 Design of Concrete Structures	Continuous Evaluation:	30
		Semester end Evaluation:	70
		Total Marks:	100

Course Outcomes	Upon successful completion of the course, the student will be able to:													
	CO1	Analyze and design reinforced concrete staircases and flat slabs in compliance with relevant codal provisions.												
	CO2	Apply structural design principles to assess and design pile foundations and cantilever retaining walls.												
	CO3	Design rectangular and circular water tanks (on-ground and overhead) in accordance with relevant IS codes, and prepare appropriate reinforcement detailing.												
	CO4	Analyze composite structural members and apply appropriate design principles to composite beams and shear connectors in steel–concrete composite systems.												
Contribution of Course Outcomes towards achievement of Program Outcomes (1 – Low, 2 – Medium, 3 – High)		PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PSO1	PSO2
	CO1	3	2	2				1					3	1
	CO2	3	2	2				1					3	1
	CO3	3	2	2				1					3	1
	CO4	3	2	2				1					3	2
Course Content	UNIT I: DESIGN OF STAIRCASE Types; Design and detailing of reinforced concrete doglegged staircase. DESIGN OF FLAT SLABS Design of Flat Slab: Direct design method – Distribution of moments in column strips and middle strip-moment and shear transfer from slabs to columns – Shear in Flat slabs-Check for one way and two-way shears, Limitations of Direct design method, Introduction to Equivalent frame method. UNIT II: DESIGN OF FOUNDATIONS Structural Design of Pile Foundations: Types of piles, Load carrying capacity of piles, Structural design of RC piles, Design of pile cap for 2, Reinforcement detailing.													

	DESIGN OF RETAINING WALLS Introduction – Types of retaining walls –Active and passive earth pressure- Design principles of cantilever retaining walls with horizontal back fill –With sloping back fill. Reinforcement detailing. UNIT III: DESIGN OF RECTANGULAR WATER TANKS Rectangular Water Tanks: Introduction – General design requirements according to Indian standard code of practice – Design of on ground water tanks Design of overhead water tanks- Reinforcement detailing. DESIGN OF CIRCULAR WATER TANKS: Introduction – General design requirements according to Indian standard code of practice – Joints in water tanks – Circular tank with flexible joint between floor and wall – Circular tank with rigid joint between floor and wall. UNIT – IV DESIGN OF COMPOSITE STRUCURES Introduction – Design principles – Composite action of components- Equivalent section – prefabricated steel and in-situ concrete – composite members DESIGN OF SHEAR CONNECTORS: Shear connectors – channel connectors - Spiral connectors - Composite beams and bridge deck

23CE6404/B ADVANCED ENVIRONMENTAL ENGINEERING

Course Category:	Programme Elective -II	Credits:	3
Course Type:	Theory	Lecture - Tutorial - Practice:	3 - 0- 0
Prerequisites:	23MC3107B – Environmental Studies 23CE5302- Environmental Engineering	Continuous Evaluation: Semester end Evaluation: Total Marks:	30 70 100

Course Outcomes	Upon successful completion of the course, the student will be able to:														
	CO1	Explain the need for protecting water bodies and understand the factors influencing contamination during wastewater disposal.													
	CO2	Apply new concepts of wastewater treatment and selection of low cost treatment units.													
	CO3	Analyze the characteristics of industrial effluents from sugar, dairy, and paper industries and evaluate appropriate treatment and disposal methods.													
	CO4	Analyze the effects of air pollutants and acquaint devices to control air pollutants, levels of and effects of noise pollution.													
Contribution of Course Outcomes towards achievement of Program Outcomes (1 – Low, 2 - Medium, 3 – High)		PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO10	PO 11	PSO 1	PSO 2	
	CO1	3		1											
	CO2	3		3				2						2	
	CO3	3		2			2	1						3	
	CO4	1					2	1							
Course Content	UNIT I STREAM SANITATION Characteristics of the treatment plant effluents: Patterns of pollution and self-purification in a stream: Dissolved oxygen balance in streams: Oxygen Sag Curve Impact of pollutants on stream waters and usage of stream waters with reference to flora and fauna. DESIGN OF LOW COST WASTEWATER TREATMENT SYSTEMS Introduction, Biological kinetics of wastewater, Stabilization ponds. Aerated lagoons, Oxidation ditch, Extended aeration process. UNIT II INDUSTRIAL WASTEWATER TREATMENT: SUGAR PLANT AND DAIRY Introduction, Characteristics and treatment of industrial effluents. Difference between Industrial wastewater and Domestic wastewater. Sugar and Dairy Industry; Quantity of liquid waste; characteristics of liquid waste. Processing and Manufacturing Units, Methods of its treatment and disposal.														

	PULP AND PAPER INDUSTRY Quantity of liquid waste; characteristics of liquid waste. Processing and Manufacturing Units, Methods of its treatment and disposal. UNIT III NEW CONCEPTS IN BIOLOGICAL WASTEWATER TREATMENT Introduction: Nitrogen removal by biological nitrification and de-nitrification; Phosphate removal from the activated sludge process, Rotating disc biological contactor: An-aerobic filters, U-tube aeration systems. AIR POLLUTION AND EFFECTS OF AIR POLLUTION: Definition, Stationary and mobile sources, Primary and secondary pollutants, Natural contaminants, Particulate matter, Aerosols, Gases. Effects of air pollutants on human health, Effects on plants and economic effects. UNIT – IV METEOROLOGY AND CONTROL OF AIR POLLUTION BY EQUIPMENT: Atmospheric stability and temperature in versions; Mixing height, Wind direction and speed: Wind direction recorder; Wind speed recorder, Humidity measurement, Temperature measurement; Plume behavior. Objectives: Types of collection equipment: Settling chambers: Inertial separators; Cyclones, Filters: Electrostatic precipitators: Scrubbers. NOISE POLLUTION: Introduction; Levels of noise. Noise rating systems. Measures of noise: Sources of noise and their noise levels, Acceptance of noise levels; Effects of noise: Control of noise.

Course Category:	Program Elective - II	Credits:	3
Course Type:	Theory	Lecture - Tutorial - Practice:	3 - 0- 0
Prerequisites:	Nil	Continuous Evaluation:	30
		Semester end Evaluation:	70
		Total Marks:	100

Course Outcomes	Upon successful completion of the course, the student will be able to:													
	CO1	understand the components of the Railway Track												
	CO2	Apply geometric design principles to railway tracks and understand points, crossings, and signaling systems.												
	CO3	Demonstrate the general aspects of tunneling, construction stages and essential safety measures in tunneling.												
	CO4	Apply knowledge of tunneling methods for different soil and rock conditions and understand the process and materials used in tunnel lining.												
Contribution of Course Outcomes towards achievement of Program Outcomes (1 – Low, 2 - Medium, 3 – High)		PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO10	PO 11	PSO 1	PSO 2
	CO1	3												3
	CO2	3	3	2									3	
	CO3	3	2				2							2
	CO4	3		2				3						3
Course Content	UNIT – I INTRODUCTION TO RAILWAYS Introduction to Railways, Comparison of railway and highways transportation; Classification of Indian Railways, Gauges in Railway Track, Permanent way- Cross section and functions COMPONENTS OF RAILWAY TRACK Rails – Types, Coning of Wheels, Rail failures, Creep of Rails, Rail Joints-Types, Sleepers - Types, Types of Ballast materials, Specifications of Indian Railways, Ballast Profile, Formation; Specifications of Formation UNIT – II GEOMETRIC DESIGN OF RAILWAY TRACK Geometric Design Necessity; Gradients – types, Gradient Compensation; Super elevation- definition, expression for super elevation; Cant deficiency and cant excess; Negative Super													

	elevation concept, Numerical on Negative super elevation POINTS AND CROSSINGS & SIGNALLING Turnouts components and its working principle, Classification of signals, Classification of stations and yards UNIT – III GENERAL ASPECTS OF TUNNELLING Definition of Tunnel and Open cut, Comparison of by passing alternatives, advantages and disadvantages of tunnel, classification of tunnels, problems in tunneling. STAGES IN TUNNEL CONSTRUCTION Investigations at tunnel site, setting out of tunnel, excavation, safety precautions in tunneling UNIT – IV TUNNELLING METHODS FOR SOFT SOIL Methods of tunneling – for soft soil (American method, English method, Belgian method & Liner plates method) TUNNELLING METHODS FOR ROCK Methods of tunneling – for rock(drift method, heading and bench method, cantilever car dump method), objectives of lining, materials for lining

Course Outcomes	Upon successful completion of the course, the student will be able to:													
	CO 1	Explain the basics of hot and cold water supply systems, plumbing materials, fittings, and installation practices.												
	CO 2	Apply code provisions and pumping system concepts to select pumps and design water supply and drainage systems.												
	CO 3	Understand the functions and installation requirements of sanitary fixtures, fittings, traps, and venting systems.												
	CO 4	Apply principles of indirect waste disposal, venting, and drainage design for proper plumbing system installation.												
Contribution of Course Outcomes towards achievement of Program Outcomes (1 – Low, 2 – Medium, 3 – High)		PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO 10	PO 11	PS O1	PS O2
	CO 1	2	2	2			2						2	1
	CO 2	2	2	2			2						2	1
	CO 3	2	2	2			2						2	1
	CO 4	2	2	2			2						2	1
Course Content	UNIT I: Water Supply Plumbing: Storage, hot and cold water distribution system, backflow prevention, air gap, cross connection control, pressure and velocity, pipe materials and jointing methods, alternative materials, hangers and supports, workmanship, prohibited fittings and practices, protection of pipes and structures, pressure controls, unions, thermal expansion, types of valves, installation and testing, disinfection, protection of underground pipes, color codes and arrow marking, introduction to Water Supply Fixture Units (WSFU) and sizing. Hot water systems, individual and centralized systems, geysers, heaters, heat pumps, energy													

	sources, solar hot water systems, types, boilers, hot water generators, hot water consumption pattern, introduction to sizing of systems. UNIT II: Pumping Systems & Codal Provisions Terminology, pump heads, types of Pumps, applications, pump selection, pump characteristics, pumps and motors, pump efficiency, motor efficiency, Hydro Pneumatic Systems (HPS), Zoning, Storm Water and Drainage Pumps, introduction to starters and control panels. Scope, purpose; codes and standards in the building industry, UIPC-I, NBC and other codes, Local Municipal Laws, approvals, general regulations, standards, water supply, sewerage system, drainage system, workmanship, water conservation, protection of pipes and structures, waterproofing. UNIT III: Sanitary Plumbing Fixtures , Fittings and Traps Definitions of plumbing fixtures, fittings, appliances and appurtenances; maximum flow rates, water closets, bidets, urinals, flushing devices, washbasins, bath/shower, toilets for differently abled, kitchen sinks, water coolers, drinking fountain, clothes washer, dish washer, mop sink, overflows, strainers, prohibited fixtures, floor drains, floor slopes, location of valves, hot water temperature controls, installation standard dimensions in plan and elevation. Traps required, trap arms, developed length, trap seals, venting to traps, trap primers, prohibited traps, building traps. UNIT – IV Interceptors, Indirect Waste and Vents : Discharge for indirect waste piping, nature of contents or systems, proper methods to install indirect waste piping, air gap and air break, sink traps, dish washers, drinking fountains, waste receptors, sterile equipment, appliances, condensers, point of discharge, venting. Vent requirement, purpose of venting, trap seal protection, materials, vent connections, flood rim level, termination, vent stacks, water curtain and hydraulic jump, cleanouts, venting of interceptors, introduction to vent sizing. one pipe and two pipe systems, different pipe materials and jointing methods, special joints, hangers and supports, protection of pipes and structures, alternative materials, workmanship, prohibited fittings and practices, hydraulic jump, change in direction of flow, T and Y fittings, cleanouts, pipe grading, fixtures below invert level, suds relief.

Course Category:	Program Elective - III	Credits:	3
Course Type:	Theory	Lecture - Tutorial - Practice:	3-0-0
Prerequisites:	23CE5303 - Design of Concrete structures	Continuous Evaluation:	30
		Semester end Evaluation:	70
		Total Marks:	100

Course Outcomes	Upon successful completion of the course, the student will be able to:													
	CO1	Understand the fundamental concepts of prestressing and distinguish between various prestressed concrete systems used in construction.												
	CO2	Apply the principles of prestressing to calculate and assess the various prestress losses.												
	CO3	Analyze the resultant stresses, moments, shear forces, and deflections in prestressed concrete members under various loading conditions, and design these members using appropriate methods, as per relevant IS code.												
	CO4	Examine the stress distribution at the end zone of prestressed concrete members and design the end block in accordance with IS code.												
Contribution of Course Outcomes towards achievement of Program Outcomes (1 – Low, 2 - Medium, 3 – High)		PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO10	PO 11	PSO 1	PSO 2
	CO1	1		1			1						1	1
	CO2	1		1	1								2	
	CO3	1		2	2		1	1	1		1		3	
	CO4	1	2	1					1				2	
Course Content	UNIT – I INTRODUCTION AND SYSTEMS Basic concepts of prestressing; Historical development; Need for High strength steel and High strength concrete; Advantages of prestressed concrete. Tensioning devices; Hoyer's long line system of pretensioning; Post tensioning systems; Detailed study of Freyssinet system and Gifford – Udall system; Thermo – electric prestressing; Chemical prestressing. LOSSES OF PRESTRESS Types of losses in pre and post tensioning ; Loss due to elastic deformation of concrete, shrinkage of concrete, creep of concrete, relaxation of stress in steel, friction and anchorage slip; Total losses allowed for in design.													

	UNIT – II ANALYSIS OF PRESTRESS AND BENDING STRESSES Basic assumptions; Analysis of prestress; Resultant stresses at a section; Pressure (Thrust) line and internal resisting couple; Concept of Load balancing. DESIGN OF FLEXURAL STRENGTH OF PRESTRESSED CONCRETE SECTIONS Basic assumptions of flexural design, Ultimate moment resistance .Check for flexural capacity based on I.S. 1343 Code.
	UNIT – III ELASTIC DESIGN OF PRESTRESSED CONCRETE SECTIONS FOR FLEXURE Permissible compressive stresses in concrete as per IS 1343; Elastic design of rectangular and I – sections of TYPE 1, SHEAR RESISTANCE Ultimate shear resistance of prestress concrete members; Design of shear reinforcement Ultimate shear resistance of prestress concrete members; Design of shear reinforcement UNIT – IV DEFLECTIONS OF PRESTRESSED CONCRETE MEMBERS Importance of control of deflections; Factors influencing deflections; Short term deflections of un cracked members. TRANSFER OF PRESTRESS IN PRE-TENSIONED MEMBERS & ANCHORAGE ZONE STRESSES IN POST-TENSIONED MEMBERS Transmission length; Bond stresses; Transverse tensile stresses; End zone reinforcement; Stress distribution in end block; Design of anchorage and end block

23CE6405/B SOLID WASTE MANAGEMENT

Course Category:	Program Elective - III	Credits:	3
Course Type:	Theory	Lecture - Tutorial - Practice:	3 - 0- 0
Prerequisites:		Continuous Evaluation:	30
		Semester end Evaluation:	70
		Total Marks:	100

Course Outcomes	Upon successful completion of the course, the student will be able to:														
	CO1	Understand the sources, composition and characteristics of Municipal Solid Waste.													
	CO2	Outline the various methods of collection, separation, transportation and disposal of Municipal Solid Waste.													
	CO3	Explain the handling treatment, and disposal methods of Bio-medical Waste as per regulatory guidelines.													
	CO4	Summarize the disposal techniques and recycling processes for plastic waste and e-waste.													
Contribution of Course Outcomes towards achievement of Program Outcomes (1 – Low, 2 - Medium, 3 – High)		PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO10	PO 11	PSO 1	PSO 2	
	CO1	1					2	1						2	
	CO2	1					2	1						2	
	CO3	1		1			2	1						2	
	CO4	1		1			2	1						2	
Course Content	UNIT I: SOURCES, TYPES AND COMPOSITION OF MUNCIPAL SOLID WASTE Sources, Types, Composition of Solid Waste, Effects of improper disposal of solid waste, public health effects, Types of materials recovered from MSW. WASTE HANDLING, SEPARATION AND STORAGE On-site handling and separation at solid waste, on - site storage of solid waste, options under Indian conditions. UNIT II: COLLECTION OF MUNICIPAL SOLID WASTE Methods of collection, equipment, types of vehicles, man power requirement. TRANSFER AND TRANSPORT OF MUNCIPAL SOLID WASTE Need for Transfer operations, Transfer Stations, Selection of Location of Transfer Stations, Transport means and methods.														

	UNIT III: OFF-SITE PROCESSING, SEPARATION,TRANSFORMATION Size Reduction, Separation, Density separation, Magnetic Separation, Pyrolysis, Composting, and Incineration. DISPOSAL OF SOLID WASTE Disposal of Solid Waste – Sanitary land Fills, Site selection, Planning, Design and operation of Sanitary landfills, Leachate collection. UNIT IV: BIO-MEDICAL WASTE MANAGEMENT Sources & generation of Bio-medical Waste, Biomedical Waste Management. PLASTIC AND E-WASTE MANAGEMENT Dangers of Plastics, Recycling of Plastic waste, Disposal of plastic waste. Health Hazards of E-waste, E- waste Management.
Text books	[T1] Goerge,T. Hilary,T. & Samuel, A.V. Integrated Solid waste management, Mc Graw Hill Indian Edition, 2014. [T2] Amalendu,B. Design of Land Fills and Integrated Solid waste management , John Wiley & Sons 3RD Edition, 2004.

23CE6405/C GROUND IMPROVEMENT TECHNIQUES

Course Category:	Program Elective - III	Credits:	3
Course Type:	Theory	Lecture - Tutorial - Practice:	3 - 0- 0
Prerequisites:	Geotechnical Engineering	Continuous Evaluation:	30
		Semester end Evaluation:	70
		Total Marks:	100

Course Outcomes	Upon successful completion of the course, the student will be able to:													
	CO1	Understand need and methods of ground improvement techniques and apply suitable ground improvement technique for a given site												
	CO2	Apply suitable methods to assess the expansiveness of soils and suggest appropriate improvement techniques.												
	CO3	Apply suitable stabilization method and grouting techniques												
	CO4	Understand various types of geosynthetics and reinforced earth concept												
Contribution of Course Outcomes towards achievement of Program Outcomes (1 – Low, 2 - Medium, 3 – High)		PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO10	PO 11	PSO 1	PSO 2
	CO1	3	2	3		3						3		3
	CO2	3		3		3						3		3
	CO3	3	2	3								3	2	3
	CO4													
Course Content	UNIT I: GROUND IMPROVEMENT METHODS IN GRANULAR SOILS Need of Ground Improvement, Different methods of Ground improvement. In place densification by Dynamic Compaction, Vibroflotation, Compaction pile, Vibro-Compaction Piles and Blasting. DENSIFICATION METHOD IN COHESIVE SOILS Introduction, Preloading, Vacuumdewatering, Sand Drains, Stone columns, Prefabricated vertical drains. UNIT II: EXPANSIVE SOILS Problems of expansive soils, Identification tests for expansive soils, I.S. test methods for swelling pressure of a soil.													

	IMPROVEMENT METHODS FOR EXPANSIVE SOILS Sand cushion, CNS layer, Cushions using industrial by products, stabilization and lime slurry pressure injection. UNIT – III: SOIL STABILIZATION Types of soil stabilization, Lime stabilization - Base exchange mechanism, Pozzolanic reaction, lime-soil interaction. Lime stabilization mix design, Cement stabilization: Mechanism, amount, age and curing. GROUTING TECHNIQUES Grouting in soil, Desirable characteristics of grout, Grouting pressure, Grouting methods. UNIT IV: GEOSYNTHETICS Introduction – Family of geosynthetics, Functions and applications of Geosynthetics, REINFORCED EARTH Principle of reinforced earth, Components of reinforced earth, factors governing design of reinforced earth walls, design principles of reinforced earth walls.
Text books	[T1] Hausmann, M.R., Engineering Principles of Ground Modification, McGraw-Hill International Editions, NY, US, 1990. 23CE6405/D AIRPORT AND HARBOUR PLANNING

Course Category:	Program Elective - III	Credits:	3
Course Type:	Theory	Lecture - Tutorial - Practice:	3 - 0- 0
Prerequisites:	Nil	Continuous Evaluation:	30
		Semester end Evaluation:	70
		Total Marks:	100

Course Outcomes	Upon successful completion of the course, the student will be able to:													
	CO1	Explain the modes of air transport, aircraft classifications, and the characteristics, airport criteria for airport site selection.												
	CO2	Apply design principles to assess airport obstructions and determine suitable runway orientation and basic runway length.												
	CO3	Apply various methods to design flexible and rigid airfield pavements												
	CO4	Demonstrate understanding of the types, features and functional requirements of harbors, ports, and docks.												
Contribution of Course Outcomes towards achievement of Program Outcomes (1 – Low, 2 - Medium, 3 – High)		PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO10	PO 11	PSO 1	PSO 2
	CO1	3						2						1
	CO2	3	3	2									3	
	CO3	3	2	2									3	
	CO4	3						3						
Course Content	UNIT – I AIR TRANSPORT Different modes of transportation, Introduction to NAA, IAAI, AAI and ICAO AIRPORT PLANNING AND CHARACTERISTICS Airport classification based on ICAO, airport components, Aero plane components; Air–craft characteristics; Selection of site for airport; Surveys for site selection UNIT – II AIRPORT OBSTRUCTIONS Zoning laws, Imaginary surfaces, Approach zone, turning zone RUNWAY DESIGN													

	Runway orientation- cross wind component, wind rose diagram, types of wind rose; Basic runway length; Corrections for elevation, Temperature and gradient; Runway geometric design. Runway configurations, geometric design standards of taxiway design UNIT – III FLEXIBLE PAVEMENT DESIGN Various design factors, Design methods for flexible airfield Pavement- CBR Method, Mcleod Method and Burmister's Method RIGID PAVEMENT DESIGN Rigid pavement Design- PCA Method; LCN Method of pavement design. UNIT – IV HARBOR AND PORT: Types of Harbours, Site selection, features of harbor, definitions of break water, wharves, jetties, fender, piles, pier heads, mooring, types of break waters, port definition, requirements of port, facilities at port. DOCKS: Types of Docks- dry dock, floating dock, slip way, ship lift, Aprons, transit shed and ware houses

23CE6352 TRANSPORTATION ENGINEERING LABORATORY

Course Category:	Program Core Laboratory	Credits:	1
Course Type:	Laboratory	Lecture - Tutorial - Practice:	0-0-2
Prerequisites:	Nil	Continuous Evaluation:	30
		Semester end Evaluation:	70
		Total Marks:	100

Course Outcomes	Upon successful completion of the course, the student will be able to:													
	CO1	analyze the suitability of aggregates and bitumen in pavement construction.												
	CO2	understand the importance of traffic studies at mid block section												
Contribution of Course Outcomes towards achievement of Program Outcomes (1 – Low, 2 – Medium, 3 – High)		PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO10	PO 11	PSO 1	PSO 2
	CO1	2		3	3			2						3
	CO2	2		3	3			2						3
Course Content	A. TESTS ON AGGREGATES: 1. Determine the strength of aggregate and discuss the suitability in pavement construction. 2. Determine the toughness of aggregate and discuss the suitability in pavement construction. 3. Determine the hardness of aggregate and discuss the suitability in pavement construction. 4. Determine the flakiness and elongation index of aggregate and discuss the suitability in pavement construction. 5. Perform gradation of aggregate, analyze and discuss its importance in pavement layers 6. Determine the Specific gravity Test of aggregate and discuss its application in pavement layers B. TESTS ON BITUMINOUS MATERIALS: 1. Determine the grade of bitumen using different methods (penetration test and viscosity test) 2. Perform different tests on bitumen and discuss the suitability of bitumen in flexible pavement construction. C. TESTS ON SOIL 1. Determine the CBR of soil.													

	2. Plate bearing test – (demo) D. TEST ON BITUMINOUS MIXES 1. Analyze and determine the optimum Binder content for construction of flexible pavement construction – (demo) E. TRAFFIC VOLUME STUDIES 1. Traffic volume study at mid block section 2. Traffic volume study at intersection 3. Speed study
Text books	[T1] Khanna, S. K., C. E. G. Justo, A.Veeraragavan" Highway Engineering Revised 10th Edition Nem Chand Bros .Roorkee 2017.

23HS6153 ADVANCED COMMUNICATION SKILLS LAB

Course Category:	HSS	Credits:	1
Course Type:	Lab	Lecture - Tutorial - Practice:	0-0-2
Prerequisites:	Notable level of skill in language proficiency, including listening, speaking, reading, and writing, reaching a semi-advanced level.	Continuous Evaluation: Semester end Evaluation: Total Marks:	30 70 100

Course Outcomes	Upon successful completion of the course, the student will be able to :											
	CO1	Relate effective listening and reading skills essential for professional contexts.										
	CO2	Demonstrate clear and persuasive spoken communication for argumentation and proficiency in public speaking.										
	CO3	Apply sophisticated and creative written communication suitable for administrative and corporate documentation.										
	CO4	Analyze comprehensive life skills by adeptly communicating in various personal and professional settings for career and personal growth opportunities.										
Contribution of Course Outcomes towards achievement of Program Outcomes (1 – Low, 2 - Medium, 3 – High)		PO 1	PO 2	PO3	PO 4	PO 5	PO 6	PO7	PO8	PO9	PO1 0	PO 11
	CO1									3		
	CO2							1	2	3		
	CO3									3		
	CO4								2	3		
Course Content	1. Reading Comprehension Understanding Main Idea – Analyzing Supporting Details – Drawing Inferences – Recognizing Text Structure – Critical Reading – Active Reading Strategies. 2. Listening Skills Active Listening Techniques – Empathetic Listening – Avoiding Distractions – Clarification and Confirmation – Responding Appropriately – Reflective Listening– Note-taking Techniques – Summarizing and Analyzing – Ted Talks.											

3. Relationship Building

Assertiveness – Adaptability – Emotional Intelligence – Conflict Management.

4. Professional Presentations

Planning and Preparation – Audience Analysis – Structuring Presentation – Visual Aids and Multimedia – Delivery Techniques – Handling Q&A Sessions – Overcoming Presentation Anxiety.

5. Cover Letter & Resume Writing

Cover Letter – Resume Formatting and Design – Creating a Professional and Eye-Catching Document – Highlighting Achievements – Tailoring Your Resume – Including Relevant Keywords.

6. Video Resume

Introduction – Professional Background – Visual Presentation – Personal Branding – Achievements and Accomplishments – Call to Action – Editing and Production.

7. Statement of Purpose (SOP)

Introduction – Educational Background and Training – Subject Matter Expertise – Relevant Skills and Attributes – Research Interests – Fit with the Program – Future Contribution.

8. Book/Film Review

Overview and Summary – Plot Analysis – Cinematography/Writing Style – Acting/Characterization – Themes and Messages – Audience Appeal – Final Thoughts and Recommendation.

9. Kinesics & Para Linguistic Features

Understanding Nonverbal Communication – Body Language – Vocal Cues – Cultural Variations – Emotional Expression – Deception Detection.

10. Life Skills – Poster Presentation

Introduction to Life Skills – Creative Thinking – Critical Thinking – Emotional Intelligence – Communicating Ideas Visually and Effectively.

23TP6107 QUANTITATIVE APTITUDE

Course Category:	Soft skill-4	Credits:	1
Course Type:	Learning by Doing	Lecture - Tutorial - Practice:	0 - 0 - 2
Prerequisites:	--	Continuous Evaluation:	100
		Semester end Evaluation:	---
		Total Marks:	100

Course Outcomes	Upon successful completion of the course, the student will be able to:														
	CO1	Solve various Basic Mathematics problems by following different methods													
	CO2	Follow strategies in minimizing time consumption in problem solving Apply shortcut methods to solve problems													
	CO3	Confidently solve any mathematical problems and utilize these mathematical skills both in their professional as well as personal life.													
	CO4	Analyze, summarize and present information in quantitative forms including table, graphs and formulas													
Contribution of Course Outcomes towards achievement of Program Outcomes (1 – Low, 2 – Medium, 3 – High)		PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	P10	PO 11	PSO 1	PSO 2	
	CO1	2													
	CO2		2												
	CO3	2													
	CO4				2										
Course Content	UNIT I: Numerical ability I: Number system, HCF & LCM, Average, Ratio & Proportion Numerical ability II: Problems on ages, Partnership, Percentages, Profit & Loss, Allegation UNIT II: Arithmetical ability I Time & Work, Pipes & Cistern, Chain Rule Arithmetical ability II: Time & Distance, Problems on Trains, Boats & Steams UNIT III: Arithmetical ability III: Simple interest and compound interest, Calendar and Clock Logical ability: Permutations and Combination, and Probability, Cubes														

	UNIT – IV Mensuration: Areas, Volumes Data interpretation: Tabulation, Bar graphs, Pie charts, line graphs
Textbooks	• R. S. Aggarwal —Quantitative Aptitude, Revised., S Chand publication, 2017, ISBN:8121924987

	UNIT III: Using word processor: Adding a Table of Contents, Updating the Table of Contents, Deleting the Table of Contents, Adding an Index, Creating an Outline, Adding Comments, Tracking Changes, Viewing Changes, Additions, and Comments, Accepting and Rejecting Changes, Working with Footnotes and Endnotes, Inserting citations and Bibliography, Comparing Documents, Combining Documents, Mark documents final and make them read only., Password protect Microsoft Word documents., Using Macros. UNIT – IV: Nature of Intellectual Property: Patents, Designs, Trade and Copyright. Process of Patenting and Development: Technological research, innovation, patenting, development. International Scenario: International cooperation on Intellectual Property.

23CE7301 ESTIMATION, SPECIFICATIONS AND CONTRACTS

Course Category:	Program core	Credits:	4
Course Type:	Theory Cum Practice	Lecture - Tutorial - Practice:	3 - 0 - 2
Prerequisites:	--	Continuous Evaluation:	30
		Semester end Evaluation:	70
		Total Marks:	100

Course Outcomes	Upon successful completion of the course, the student will be able to:													
	CO1	Apply standard methods of building estimation to compute quantities for masonry and RCC works, including comparison of centre line and individual wall methods.												
	CO2	Apply estimation procedures to determine earthwork quantities for roads, canals, and structural components of steel and RCC bridges.												
	CO3	Analyze construction items to develop detailed specifications and perform rate analysis for building works.												
	CO4	Evaluate building valuation based on the rental method and describe PWD procedures and practices.												
Contribution of Course Outcomes towards achievement of Program Outcomes (1 – Low, 2 - Medium, 3 – High)		PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO10	PO 11	PSO 1	PSO 2
	CO1	3	2	1		1	1						2	2
	CO2	3	2	1	1	1	1						2	2
	CO3	3	2	1	1	2	1						2	2
	CO4	3	2	1		1	1					1	2	2

Course Content	UNIT I: METHODS AND PROCEDURE OF BUILDING ESTIMATE Introduction, Units of measurement, Main items of work, Deduction for openings, Comparison of Individual wall method and Centre line method for a single room building. RCC BUILDING ESTIMATE Estimate of Single storey RCC framed residential building with Trapezoidal footings, Estimate of RCC Beam: Standard hooks, Lateral ties and Cranks. Practice Session : Estimation of buildings by using MicroSoft Excel UNIT II: ESTIMATE OF ROAD AND CANAL WORKS Estimate of earthwork of road from longitudinal section and cross section with reduced levels of ground and formation levels of road data Types of Canal Cross Sections, Estimate of earthwork in irrigation channel both in banking and in cutting with longitudinal and cross sections data. Estimation of buildings by using Excel Practice Session : Estimation of earth work for road by using MicroSoft Excel ESTIMATE OF STEEL SANCHION AND RCC BRIDGE COMPONENTS Detailed estimate of Steel sanchion with base plate gusset plate and connections, Detailed estimate
---------------------------	---

	of RCC T-Beam Decking: T-Beams, Fillets, Deck Slab, Railing posts and Kerbs. UNIT III: DETAILED SPECIFICATIONS Purpose and method of writing Detailed specifications, Procedure of Detailed Specifications for the following: Brickwork and R.C.C slab work. ANALYSIS OF RATES Introduction, Task or outturn work, Labor and materials required for different works, Rates of various materials and different types of Labor, Preparing analysis of rates for the following items of work: RCC slab Works, Plastering for super structure walls. Practice Session : Prepare rate analysis by using Microsoft Excel UNIT – IV PWD ACCOUNTS AND PROCEDURE OF WORKS Organization of Engineering department, Contract and various types, condition of contract, contract Document, Tender notice, Tender procedure- Earnest money, Security money, Measurement book, Revised Estimate, Supplementary estimate, Penalty. VALUATION OF BUILDINGS Introduction, Methods of valuation, Valuation of building based on rental method , problem - Out goings, Depreciation, Gross income, Net income, Scrap value, Salvage value, Obsolescence, sinking fund, Capitalized value, Years purchase. Practice Session : Valuation of building based on rental method by using Microsoft Excel

23CE7302 IRRIGATION STRUCTURES

Course Category:	Programme Core	Credits:	03
Course Type:	Theory	Lecture - Tutorial - Practice:	3-0-0
Prerequisites:	23CE5301 – Water Resources Engineering	Continuous Evaluation:	30
		Semester end Evaluation:	70
		Total Marks:	100

Course Outcomes	Upon successful completion of the course, the student will be able to:													
	CO1	Apply river gauging techniques to assess the discharge, velocity of flow and Understand various cross-drainage works.												
	CO2	Understand diversion headworks, weir failures, and canal regulation structures.												
	CO3	Analyze the stability and design of gravity dams.												
	CO4	Understand types and failures of earth dams and spillways, and demonstrate seepage control and energy dissipation methods.												
Contribution of Course Outcomes towards achievement of Program Outcomes (1 – Low, 2 - Medium, 3 – High)		PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO10	PO 11	PSO 1	PSO 2
	CO1	3			2	2								2
	CO2	3												2
	CO3	3	3	2									3	2
	CO4	3		2									2	2
Course Content	UNIT I: RIVER GAUGING: Necessity; Selection of gauging sites; Methods of discharge measurement; Area Velocity method; Measurement of velocity; Floats – Surface floats, Sub–surface float or Double float, Twin float, Velocity rod or Rod float; Pitot tube; Current meter; Measurement of area of flow; Measurement of width - Pivot point method; Measurement of depth – Sounding rod, Echo-sounder. CROSS DRAINAGE WORKS: Introduction; Types of cross - drainage works; Selection of suitable type of cross - drainage work; Classification of Aqueducts and Syphon Aqueducts; Selection of a suitable type. UNIT II: DIVERSION HEAD WORKS: Component parts of a Diversion Head works. Types of weirs, causes of failures of weirs and their remedies. Bligh’s creep theory and Khosla’s theory, Canal falls; Necessity location and classification of falls. Silt control at head works. CANAL REGULATION WORKS: Canal regulators; Off-take alignment; Head regulators and cross- Regulators; Canal escape.													

	UNIT III: STABILITY ANALYSIS OF GRAVITY DAMS: Introduction; Forces acting on a gravity dam; modes of failure and stability analysis of gravity dams. DESIGN OF GRAVITY DAMS: Elementary profile of a gravity dam; Practical profile of a gravity dam; Limiting height of a gravity dam; High and low gravity dams; Galleries; Joints; Keys and water seals. UNIT – IV: EARTH DAMS: Introduction; Types of earth dams; Causes of failure of earth dams and control measures; Section of an earth dam; Seepage control measures. SPILLWAYS: Introduction; Types of spillways; Profile of ogee spillway; Energy dissipation below spillways for relative positions of jump height curve and tail water curve; Stilling basins - Types

23CE7403A PREFABRICATED STRUCTURES

Course Category:	Program Elective IV	Credits:	3
Course Type:	Theory	Lecture - Tutorial - Practice:	3–0–0
Prerequisites:	23CE5303 - Design of Concrete Structures 23CE6301 - Design of Steel Structures	Continuous Evaluation: Semester end Evaluation: Total Marks:	30 70 100

Course Outcomes	Upon successful completion of the course, the student will be able to:													
	CO1	Understand the plant prefabricated and production												
	CO2	Analyse the prefabricated load carrying members												
	CO3	Understand the Various joints in structural members												
	CO4	Analyse the production and hosting technology of prefabrication												
Contribution of Course Outcomes towards achievement of Program Outcomes (1 – Low, 2 - Medium, 3 – High)		PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO10	PO 11	PSO 1	PSO 2
	CO1	2	1	2	3	2	1						2	2
	CO2	2	1	1	3	2	1						2	2
	CO3	2	1	1	3	2	1						2	2
	CO4	2	1	2	3	2	1						2	2
Course Content	UNIT-I INTRODUCTION Need for prefabrication – General Principles of Prefabrication - Comparison with monolithic construction, types of prefabrication PLANT FABRICATION Site and Plant prefabrication, economy of prefabrication, modular coordination-standardization – Materials – Modular coordination – Systems –Production –Transportation – Erection. UNIT-II PREFABRICATED COMPONENTS Prefabricated Load Carrying Members-Planning for components of prefabricated structures, disuniting of structures, design of simple rectangular beams and I-beams, handling and erection stresses, elimination of erection stresses, beams, columns, symmetric frames. BEHAVIOUR OF STRUCTURAL COMPONENTS Behaviour of structural components – Large panel constructions – Construction of roof and floor slabs – Wall panels – Columns. UNIT-III JOINTS IN STRUCTURAL MEMBERS Shear walls. Joints – Joints for different structural connections, effective sealing of joints for water proofing, provisions for non-structural fastenings, Expansion joints in precast construction.													

	PRODUCTION & HOISTING TECHNOLOGY Production Technology - Choice of production setup, manufacturing methods, stationary and mobile production, planning of production setup, storage of precast elements, dimensional tolerances, acceleration of concrete hardening. Hoisting Technology - Equipment for hoisting and erection, techniques for erection of different types of members like beams, slabs, wall panels and columns, vacuum lifting pads. UNIT-IV APPLICATIONS OF PRECAST STRUCTURAL SYSTEMS IN INDUSTRIAL BUILDINGS Applications - Designing and detailing of precast UNIT for factory structures, purlins, principal rafters, roof trusses, lattice girders, gable frames, and single span. DESIGN FOR ABNORMAL LOADS single storied simple frames, single storied buildings, slabs, beams and columns-Progressive collapse – Code provisions – Equivalent design loads for considering abnormal effects such as earthquakes, cyclones, etc., - Importance of avoidance of progressive collapse.

23CE7403/B CONSTRUCTION EQUIPMENT AND AUTOMATION

Course Category:	Programme Elective IV	Credits:	3
Course Type:	Theory	Lecture - Tutorial - Practice:	3-0-0
Prerequisites:	Building Materials and Construction	Continuous Evaluation:	30
		Semester end Evaluation:	70
		Total Marks:	100

Course Outcomes	Upon successful completion of the course, the student will be able to:													
	CO1	Analyze and select appropriate construction equipment for earthwork, foundation, material handling, and concreting operations based on project requirements.												
	CO2	Apply principles of modern concrete techniques and formwork systems for efficient and quality construction practices.												
	CO3	Utilize construction automation, BIM, and digital technologies for planning, execution, and management of construction projects.												
	CO4	Evaluate and apply emerging technologies such as robotics and 3D concrete printing for sustainable and innovative construction solutions.												
Contribution of Course Outcomes towards achievement of Program Outcomes (1 – Low, 2 – Medium, 3 – High)		PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO10	PO 11	PSO 1	PSO 2
	CO1	3	2	1		2	1				1		2	3
	CO2	3	2	3		2	1				1		3	3
	CO3	2	2	2	2	3	1			1	1	2	2	3
	CO4	2	2	3	1	2	2	1		1		2	3	3
Course Content	UNIT I: MODERN EARTHWORK EQUIPMENT Fundamentals of earthwork operations (cut, fill, grading, compaction); Equipment selection based on soil type & project conditions; Advanced equipment: Hydraulic excavators, backhoe loaders, Bulldozers, motor graders, Scrapers and trenchers; Equipment productivity & cost analysis (basic introduction). FOUNDATION & GROUND ENGINEERING EQUIPMENT Pile driving equipment (impact, vibratory, rotary rigs), Drilling and boring machines; Dewatering techniques & equipment; Grouting equipment and applications; Introduction to intelligent equipment (GPS-enabled machinery). UNIT II: SMART MATERIAL HANDLING SYSTEMS Cranes (tower crane, mobile crane, crawler crane), Hoists, forklifts, and automated lifting systems; Belt conveyors and pipeline conveying systems; Equipment planning for high-rise and infrastructure projects; Safety considerations and load charts CONCRETE PRODUCTION & PLACEMENT TECHNOLOGIES Crushers, screening plants & aggregate processing; Batching plants (dry mix, wet mix, RMC plants); Concrete mixers and transit mixers; Concrete pumps and placing booms; Introduction to self-compacting concrete & high-performance concrete (HPC).													

	UNIT III: FORMWORK ENGINEERING & SYSTEMS Functions and requirements of formwork; Types of formwork: Conventional timber formwork, Steel and aluminum formwork, Modular formwork systems, Slip form, jump form, tunnel form; Design considerations: load, pressure, stripping time; Formwork for high-rise & shear wall construction. CONSTRUCTION AUTOMATION & DIGITAL TECHNOLOGIES Introduction to construction automation. IoT in construction (smart sensors, monitoring). Basics of Building Information Modeling (BIM). Digital construction workflows. Introduction to AI & data-driven project management. Autonomous construction equipment (concept). UNIT – IV ROBOTICS IN CONSTRUCTION Introduction to construction robotics; Types of robots: Masonry robots, Demolition robots, Rebar tying robots, Inspection drones; Benefits: safety, speed, quality; Case studies of robotic construction. 3D CONCRETE PRINTING & FUTURE CONSTRUCTION Fundamentals of 3D concrete printing (3DCP); Materials for 3D printing (printable concrete, rheology); Types of 3D printers: Gantry system, Robotic arm system; Process workflow: design → slicing → printing; Advantages & limitations; Global and Indian case studies; Comparison: 3D printing vs conventional construction; Integration with BIM & automation.

23CE7403C DISASTER PREPAREDNESS & PLANNING

Course Category:	Program Elective - IV	Credits:	3
Course Type:	Theory	Lecture - Tutorial - Practice:	3-0-0
Prerequisites:	---	Continuous Evaluation:	30
		Semester end Evaluation:	70
		Total Marks:	100

Course Outcomes	Upon successful completion of the course, the student will be able to:													
	CO1	understand the Concept of Disaster to Management												
	CO2	analyze the relationship between development and disasters												
	CO3	understand Categories of Disasters												
	CO4	apply the responsibilities to society												
Contribution of Course Outcomes towards achievement of Program Outcomes (1 – Low, 2 - Medium, 3 – High)		PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO10	PO 11	PSO 1	PSO 2
	CO1	2				1						1		1
	CO2	2					2					1		1
	CO3	2										1		1
	CO4	2										1		1
Course Content	UNIT I: Introduction: Concepts and definitions: disaster, hazard, vulnerability, resilience, risks severity, frequency and details, capacity, impact, prevention, mitigation. Disasters: Disasters classification; natural disasters (floods, draught, cyclones, volcanoes, earthquakes, tsunami, landslides, coastal erosion, soil erosion, forest fires etc.); manmade disasters (industrial pollution, artificial flooding in urban areas, nuclear radiation, chemical spills, transportation accidents, terrorist strikes, etc.); hazard and vulnerability profile of India, mountain and coastal areas, ecological fragility.													
	UNIT II: DISASTER IMPACTS-1 Environmental, physical, social, ecological, economic, political, etc.													
	DISASTER IMPACTS-2 Health, psycho-social issues; demographic aspects (gender, age, special needs); hazard locations; global and national disaster trends; climate change and urban disasters.													
	UNIT III: DISASTER RISK REDUCTION (DRR) Disaster management cycle – its phases; prevention, mitigation, preparedness, relief and recovery; structural and non-structural measures; risk analysis, vulnerability and capacity													

	assessment; early warning systems, Post disaster environmental response (water, sanitation, food safety, waste management, disease control, security, communications). ROLES AND RESPONSIBILITIES Government, community, local institutions, NGOs and other stakeholders; Policies and legislation for disaster risk reduction, DRR programmes in India and the activities of National Disaster Management Authority. UNIT – IV DISASTERS, ENVIRONMENT Factors affecting vulnerability such as impact of developmental projects and environmental modifications (including of dams, land use changes, urbanization etc.) sustainable and environmental friendly recovery; reconstruction and development methods. DEVELOPMENT METHODS Sustainable and environmental friendly recovery; reconstruction and development methods.

23CE7403D REPAIR AND REHABILITATION OF STRUCTURES

Course Category:	Program Elective IV	Credits:	3
Course Type:	Theory	Lecture - Tutorial - Practice:	3-0-0
Prerequisites:	23CE3308 - Concrete Technology	Continuous Evaluation:	30
		Semester end Evaluation:	70
		Total Marks:	100

Course Outcomes	Upon successful completion of the course, the student will be able to:													
	CO1	Understand the mechanisms of deterioration of structures and diagnosis of failure.												
	CO2	Understand the damages occurred in reinforced concrete building and knowing the remedies for damages.												
	CO3	Apply different types of special materials used for repair technique.												
	CO4	Apply different types of strengthening techniques used for existing structures.												
Contribution of Course Outcomes towards achievement of Program Outcomes (1 – Low, 2 - Medium, 3 – High)		PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO10	PO 11	PSO 1	PSO 2
	CO1	1					1			1		1		1
	CO2	1				1		1			2	1		2
	CO3	1					2		1		1	1		2
	CO4	1					1	1	1	1		1		2
Course Content	UNIT I: INTRODUCTION Introduction: Deterioration of structures with aging; Definition of Maintenance, repair, retrofitting and rehabilitation, Need for rehabilitation, Diffentiate between repair and rehabilitation. Importance of Maintenance. Facets of Maintenance. CAUSES OF DAMAGE TO STRUCTURES Causes of Distress in structures-Extrinsic and Intrinsic Causes for damage of Structures, Types of damages; effects of damages; Assessment procedure for evaluating a damaged structure; Diagnosis of construction failures. UNIT II: DAMAGE ASSESSMENT AND EVALUATION METHODS Damage testing methods; Semi –destructive (CORE,LOK and CAPO test) Non-destructive testing methods(Rebound Hammer ,Ultrasonic pulse velocity and Electrical resistivity test). REINFORCEMENT PROTECTION Methods of corrosion prevention –Corrosion coatings, Inhibitors, Cathodic protection and Corrosion resistant steel UNIT III:													

	REPAIR MATERIALS Essential parameters for selection of repair materials, Polymer concrete, Fibre reinforced concrete, High strength concrete, Ferrocement concrete, Polymer mortar, Epoxy mortar and Bonding agents. TECHNIQUES FOR REPAIR AND PROTECTION METHODS Crack repair techniques-crack stitching, Mortar and dry pack, Epoxy injection, routing and sealing, overlays, Guniting and Shotcrete. Repair to dormant cracks. UNIT IV: METHODS FOR STRENGTHENING Repairs to overcome Low member strength-Jacketing (Concrete and Steel), FRP Confinement. CASE-STUDIES Repair of structures distressed due to corrosion, fire, leakage, Earthquake, Transportation of Structures from one place to other-Case studies.
Textbooks	[T1]Vidivelli. B Rehabilitation of Concrete Structures Standard Publishes Distribution.1st edition 2009. [T2]Hand book on Seismic Retrofit of Buildings, CPWD and Indian Buildings Congress, Narosa Publishers, 2008.

23CE7404A ANALYSIS AND DESIGN OF HIGH RISE BUILDINGS

Course Category:	Program Elective V	Credits:	3
Course Type:	Theory	Lecture - Tutorial - Practice:	3-0-0
Prerequisites:	23CE4303- Structural Analysis 23CE5303- Design of Concrete Structures	Continuous Evaluation:	30
		Semester end Evaluation:	70
		Total Marks:	100

Course Outcomes	Upon successful completion of the course, the student will be able to:														
	CO1	understand structural systems of High Rise buildings.													
	CO2	apply the latest construction practices and processes for various structural systems.													
	CO3	evaluate the wind & seismic effects on behavior of high rise buildings													
	CO4	analyze and design of high rise buildings													
Contribution of Course Outcomes towards achievement of Program Outcomes (1 – Low, 2 – Medium, 3 – High)		PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO10	PO 11	PSO 1	PSO 2	
	CO1		3	2									3		
	CO2	2	3	3									3		
	CO3	2	3	2									2		
	CO4	2	3	3									3		
Course Content	UNIT I: INTRODUCTION TO HIGH RISE BUILDINGS: Evolution of tall buildings – Introduction - Classification of Buildings-lateral loads like Wind loads, Earthquake loads & Blast loads- Design criteria for structural design of Tall building - Concept of premium for height - Development of high rise architecture. CONSTRUCTION OF HIGH RISE BUILDINGS: Assembly of Building and site investigation, Building performance –cost, quality and time. UNIT II: ENVIRONMENTAL REQUIREMENTS: Industrialization & Robotics in Construction - Introduction to safety and Health Management System - Stages of site Investigation - Site Reconnaissance & Ground investigation-Field tests & Laboratory tests. FOUNDATION SYSTEMS: Material handling and Mechanization - Material handling considerations - Earthmoving equipment’s - Horizontal and vertical movements - Selection & Utility of Cranes (Tower Cranes & Climbing Cranes).														

	UNIT III: WIND & SEISMIC EFFECTS ON BEHAVIOR OF TALL STRUCTURES: Outlook of Design considerations and Characteristics of wind - Codal wind loads and cladding pressures on behavior of tall buildings - Introduction to Tall building behavior during earthquakes and seismic design philosophy. STRUCTURAL FORMS & FLOORING SYSTEMS: Introduction of Various structural forms and their importance to high rise architecture - Introduction to various Flooring Systems in concrete & steel. UNIT – IV METHODS OF ANALYSIS: Structural behavior of Rigid frames – Simplified methods of analysis – Substitute frame method & Portal method. MODELING FOR ANALYSIS : Approaches for analysis - Assumptions involved in modeling - Reduction techniques - Application using Structural engineering Software.

23CE7404B RURAL WATER SUPPLY AND SANITATION

Course Category:	Program Elective V	Credits:	3
Course Type:	Theory	Lecture - Tutorial - Practice:	3-0-0
Prerequisites:	23CE5302 - Environmental Engineering	Continuous Evaluation:	30
		Semester end Evaluation:	70
		Total Marks:	100

Course Outcomes	Upon successful completion of the course, the student will be able to:													
	CO1	understand various rural water supply programs in India.												
	CO2	apply various low cost sanitation methods in India.												
	CO3	understand the methods used for wastewater treatment.												
	CO4	apply the methods of low cost sanitation.												
Contribution of Course Outcomes towards achievement of Program Outcomes (1 – Low, 2 – Medium, 3 – High)		PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO10	PO 11	PSO 1	PSO 2
	CO1		1		2									
	CO2		1	3	2									2
	CO3		1		2	1								
	CO4		1	3		1								1
Course Content	UNIT I: RURAL WATER SUPPLY PROGRAMS IN INDIA Need for a protected water supply, Issues of rural water supply –Various techniques for rural water supply- merits- National rural drinking water program- rural water quality monitoring and surveillance- operation and maintenance of rural water supplies. SOURCES OF WATER Investigation and Selection water sources, springs, dug wells, infiltration wells etc. Collection, Protection of well waters, Drinking water quality standards. UNIT II: PROBLEMS AND WATERBORNE DISEASES Introduction – Epidemiological aspects of water quality, waterborne Diseases, Need of treatment, methods for water treatment - Specific contaminant removal systems, LOW COST WATER TREATMENT METHODS Specific problem in rural water supply and treatment e.g. iron, manganese, fluorides, arsenic for drinking water, surface water treatment, slow sand filtration, Disinfection in RWS etc.													

	UNIT III: RURAL SANITATION Introduction to rural sanitation- Need, Objectives, Community and sanitary systems - Planning of wastewater collection system in rural areas, sanitation schemes in India. TREATMENT Wastewater - Compact and simple wastewater treatment units and systems in rural areas stabilization ponds - Effluent disposal. UNIT – IV WASTE DISPOSAL Low Cost Sanitation Methods, Centralised and Decentralised Methods of Rural Sanitation, Pit Privy, Aqua Privy, Water Seal Latrine, Bore-hole Latrine, Trench Latrine, Overhung Latrine, Compost Privy, Double Pit Latrine, Pour Flush Latrine, Improved Double Pit Pour Flush Latrine, Septic Tank, design of Septic Tank, disposal of Septic tank effluent. WASTE MANAGEMENT Disposal of Solid Wastes- Composting- land filling incineration- Biogas plants - Rural health - Other specific issues and problems encountered in rural sanitation.

23CE7404C PAVEMENT DESIGN AND CONSTRUCTION

Course Category:	Program Elective V	Credits:	3
Course Type:	Theory	Lecture - Tutorial - Practice:	3-0-0
Prerequisites:	23CE6302 - Transportation Engineering	Continuous Evaluation:	30
		Semester end Evaluation:	70
		Total Marks:	100

Course Outcomes	Upon successful completion of the course, the student will be able to:													
	CO1	understand the factors affecting pavement design and analyze layer system												
	CO2	evaluate the thickness of flexible and rigid pavements												
	CO3	understand different materials and methods used in construction of pavements												
	CO4	analyze and design pavement overlays												
Contribution of Course Outcomes towards achievement of Program Outcomes (1 – Low, 2 - Medium, 3 – High)		PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO10	PO 11	PSO 1	PSO 2
	CO1		2	2										2
	CO2		2	3									3	
	CO3				3									2
	CO4		2	3									3	
Course Content	UNIT I: FLEXIBLE PAVEMENT - INTRODUCTION Requirements of highway pavement, Types of pavement structures, Flexible pavement components and functions, factors affecting design and performance of flexible pavements, stresses in flexible pavement- single layer system, two layer system. DESIGN OF FLEXIBLE PAVEMENT CBR method, Flexible pavements design as per IRC guidelines IRC 37:2012, AASHTO Method- basis for AASHTO method, performance criteria, traffic and material inputs, pavement design as per AASTHO criteria. UNIT II: RIGID PAVEMENT - INTRODUCTION Rigid pavement components and functions, Types of joints, factors affecting design and performance of CC pavement, stresses in rigid pavement (numerical). DESIGN OF RIGID PAVEMENTS Design of rigid pavement as per IRC guidelines, design of joints, design of dowel bars, design of tie bars													

	UNIT III: CONSTRUCTION OF FLEXIBLE PAVEMENTS Construction of highway embankment – material, construction steps, QC checks, Construction of subgrade - material, construction steps, QC checks, Construction of GSB – material, construction, QC checks, Construction of Base course- WMM material, construction steps, QC checks, Preparations before constructing bituminous layer over GSB, Preparations before laying bituminous pavement layer over existing bituminous layer, Prime coat, tack coat, Construction of bituminous macadam – materials, construction steps, QC checks, Dense graded bituminous mixes – materials, construction steps, QC checks. CONSTRUCTION OF RIGID PAVEMENTS Construction of CC pavement- construction of supporting layers, construction of cc pavement slab, construction of joints, QC checks, Interlocking concrete block pavements. UNIT – IV PAVEMENT EVALUATION Pavement deterioration, objectives of maintenance, classification of maintenance, structural evaluation of flexible pavement- principle of FWD method, Evaluation by Benkelman beam method (no numerical). PAVEMENT OVERLAYS Design of flexible pavement overlay using BBD data, strengthening of existing flexible pavement by overlays, strengthening of cc pavements by overlays.

23CE7404D GROUND WATER HYDROLOGY

Course Category:	Program Elective V	Credits:	3
Course Type:	Theory	Lecture - Tutorial - Practice:	3-0-0
Prerequisites:	23CE5301 - Water Resources Engineering	Continuous Evaluation:	30
		Semester end Evaluation:	70
		Total Marks:	100

Course Outcomes	Upon successful completion of the course, the student will be able to:													
	CO1	understand components, fluctuations, flow rate and measurement of velocity of ground water.												
	CO2	evaluate the storage capacity, ground water potential and the methods for assessment of ground water.												
	CO3	apply the design principles of wells and assessment of ground water quality.												
	CO4	understand sea water intrusion and artificial ground water recharge.												
Contribution of Course Outcomes towards achievement of Program Outcomes (1 – Low, 2 – Medium, 3 – High)		PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO10	PO 11	PSO 1	PSO 2
	CO1	3				2								2
	CO2	3		2										2
	CO3	3	2	2										3
	CO4	3		3		2		3			2			3
Course Content	UNIT I: INTRODUCTION TO GROUND WATER HYDROLOGY: General Water Balance, Regional Ground Water Balance, Distribution of subsurface water, Components of ground water studies. Ground water level fluctuations. OCCURRENCE AND MOVEMENT OF GROUND WATER: Origin & age of ground water, ground water flow rates and flow directions. Ground Water velocity measurement- Preliminary and chemical methods. UNIT II: METHODS OF LOCATING GROUND WATER: General-Investigations- Geologic maps- Field Procedures, Depth Sounding Curve. GROUND WATER ASSESSMENT: Discharge by wells, Safe yield & overdraft, Calculation of safe yield-Simpson's method, calculation of Ground Water Storage capacity and ground water potential.													

	UNIT III: METHODS OF WELL DESIGN General – Steps involved in the design of a tube well- Mechanical Analysis- Methodology- Effective grain size- Well Screen length-Well screen slot openings well screen diameter. GRAVEL PACKING AND GROUND WATER QUALITY: Head losses through the screens-gravel packing and formation, stabilization. Ground Water quality Standards for drinking, irrigation and Industrial purpose. UNIT – IV SEA WATER INTRUSION IN COSTAL AQUIFERS: Physical characteristics of water intrusion, causes of salinity, recognition of sea water in ground water, relationship between salt water and fresh water. ARTIFICIAL RECHARGE: Direct benefits of artificial recharge, principles adopted in recharge, factors to be considered in selection of artificial recharge sites, Artificial recharge techniques.

23CE7205A GREEN BUILDINGS AND SUSTAINABILITY

Course Category:	Open Elective/ Job Oriented Elective-3	Credits:	3
Course Type:	Theory	Lecture - Tutorial - Practice:	3-0-0
Prerequisites:	Nil	Continuous Evaluation:	30
		Semester end Evaluation:	70
		Total Marks:	100

Course Outcomes	Upon successful completion of the course, the student will be able to:													
	CO1	Explain green building concepts, evolution, and benefits.												
	CO2	Analyze indoor built environment and resource consumption.												
	CO3	Apply green building design strategies.												
	CO4	Evaluate green building rating and certification systems.												
Contribution of Course Outcomes towards achievement of Program Outcomes (1 – Low, 2 – Medium, 3 – High)		PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO10	PO 11	PSO 1	PSO 2
	CO1	2	1										2	
	CO2	2	3				3						2	2
	CO3	2	2	3		2	3						2	2
	CO4		2	2		1	3	1					2	
Course Content	UNIT: 1 GREEN BUILDINGS History of Green Building Movement; Environmental Impact and Resource Consumption; Introduction to concept of green buildings; Benefits of Green Building and its Productivity. UNIT: 2 INDOOR BUILT ENVIRONMENT Problem of Existing Buildings and Built Environment; Energy use in buildings; Greenhouse Gas Emissions and Indoor Air pollution; Building Water Use; Land use and consumption; Construction Materials; Construction, Operation and Demolition Waste. UNIT: 3 GREEN BUILDING DESIGN Passive Design Strategies: Optimum Design, Performing Insulation Solution, Ventilation; Active Strategies: Equipment, Renewable Energy; Retrofitting; Net Zero Building Design; Embodied Energy Estimation; Life Cycle Assessment Analysis. UNIT: 4 GREEN BUILDING ASSESSMENT Green Building Organizations, Green Building Rating Tools, Green building certification procedure Learning

23CE7205 B ADVANCED CONSTRUCTION MATERIALS

Course Category:	Open Elective/ Job Oriented Elective-3	Credits:	3
Course Type:	Theory	Lecture - Tutorial - Practice:	3-0-0
Prerequisites:	--	Continuous Evaluation:	30
		Semester end Evaluation:	70
		Total Marks:	100

Course Outcomes	Upon successful completion of the course, the student will be able to:													
	CO1	Evaluate different types of modern materials, Paints, Enamels and Varnishes that are used in construction.												
	CO2	Analyse the importance of special concretes and glass materials used in Building Construction												
	CO3	Understand the classification and usage of materials like Plastics and Sound absorbent materials.												
	CO4	Evaluate building material like Gypsum and Adhesives.												
Contribution of Course Outcomes towards achievement of Program Outcomes (1 – Low, 2 - Medium, 3 – High)		PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO10	PO 11	PSO 1	PSO 2
	CO1	1		1			2				1			2
	CO2	1		1			2				1			2
	CO3	1	1				2				1			2
	CO4	1	1				2			2	1			2
Course Content	UNIT - I MODERN MATERIALS Intriduction, Ceramics, Sealants for joints, Fibre glass Reinforced Plastic, Refractories, and Geosynthetics. PAINTS, ENAMEL AND VARNISHES Intriduction, Plastic Paint, Emulsion Paint, Synthetic Rubber Paint, Enamel Paint, Texture Paint; Varnishes – Objects, Characteristics Types of varnishes. UNIT - II SPECIAL CONCRETES. Intriduction, Light Weight Concrete, NO – Fines Concrete, High Density Concrete, Fiber Reinforced Concrete, Polymer Concrete. GLASS Intriduction, Composition, Classification, and Properties. UNIT - III PLASTICS Introduction, Composition, Polymerization – Definition, Classification, Methods of Polymerization; Classification of Plastics; Properties of Plastics; Uses of Plastics;													

	Biodegradable Plastic; SOUND ABSORBENT MATERIALS Introduction, Porous materials, Porous-cum-elastic materials, Perforated materials, Baffle materials. UNIT – IV GYP SUM Introduction, Advantages of Gypsum, Gypsum Plaster, Plaster boards, Non-load bearing Gypsum partition blocks. MISCELLANEOUS MATERIALS Adhesives – Advantages, Types, Uses; Asbestos – Properties, Uses. Asphalt – Classification, Forms of Asphalt, Properties, Uses;
Textbooks	1. Engineering Materials by S.C.Rangwala Charotar Publishing House, 33 Edn, 2017. 2. Building Materials by S.K.Duggal; New Age International Publishers, 3rd Edn, 2009.
Reference books	1. Building Materials by P.C.Varghese; PHI Learning, 2nd Edn 2005.

23CE7205/C QUALITY CONTROL AND QUALITY ASSURANCE

Course Category:	Open Elective/ Job Oriented Elective-3	Credits:	3
Course Type:	Theory	Lecture - Tutorial - Practice:	3-0-0
Prerequisites:	---	Continuous Evaluation:	30
		Semester end Evaluation:	70
		Total Marks:	100

Course Outcomes	Upon successful completion of the course, the student will be able to:													
	CO1	Understand and apply fundamental quality concepts, standards, and quality management systems in construction projects.												
	CO2	Develop and implement quality planning, inspection, and control procedures for construction works.												
	CO3	Apply statistical quality control techniques and modern digital tools (BIM, IoT, AI) for effective quality management.												
	CO4	Analyze construction defects and implement quality improvement and forensic engineering techniques for sustainable construction.												
Contribution of Course Outcomes towards achievement of Program Outcomes (1 – Low, 2 – Medium, 3 – High)		PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO10	PO 11	PSO 1	PSO 2
	CO1	3	2	1		1	1					1	1	2
	CO2	3	3	2		2	1				1			2
	CO3	2	2	2	2	3	1			1	1	2	2	2
	CO4	2	3	3	1	2	2	1		1		2	2	2
Course Content	UNIT I: QUALITY CONCEPTS & MODERN PRACTICES Definition of quality in construction; Evolution: QA → QC → TQM → Lean Construction → Six Sigma; Factors influencing construction quality (materials, workmanship, design); Cost of quality and lifecycle quality concepts; Introduction to sustainable construction quality. QUALITY SYSTEMS & STANDARDS ISO 9001:2015 – principles and implementation; Quality Management Systems (QMS); Documentation: Quality manual, SOPs, checklists; Third-party inspection & certification (TPQA concepts); Case studies from infrastructure projects. UNIT II: QUALITY PLANNING IN CONSTRUCTION PROJECTS Quality policy and objectives; Inspection and Test Plans (ITP); Sampling methods (IS codes); Acceptance criteria and tolerances; Risk-based quality. CONCRETE PRODUCTION & PLACEMENT TECHNOLOGIES Site quality control procedures; Three-phase control system (Preparatory, Initial, Follow-up); Field testing: concrete, soil, materials; Non-destructive testing (NDT) basics; Quality control in major works (concrete, steel, roads).													

	UNIT III: STATISTICAL QUALITY CONTROL (SQC) Basic statistics: mean, variance, standard deviation; Control charts (X-bar, R-chart, P-chart); Acceptance sampling techniques; Taguchi method (basic concept); Numerical problems (industry-oriented). FORENSIC ENGINEERING & FAILURE ANALYSIS BIM for quality management; IoT-based quality monitoring (sensors, real-time data); AI/ML applications in defect prediction; Digital twins in construction; Data-driven decision making. UNIT – IV QUALITY IMPROVEMENT & FORENSIC ENGINEERING Six Sigma (DMAIC concept); Lean construction principles; Kaizen and continuous improvement; Quality audits and benchmarking; Case studies of quality improvement in projects. 3D CONCRETE PRINTING & FUTURE CONSTRUCTION Causes of construction failures; Root cause analysis: Pareto analysis, Fishbone (cause-effect diagram); Quality failures in concrete, steel, foundations, Case studies (bridge collapse, building failure); Role of quality engineers in forensic investigations.
Textbooks	1. Juran & Gryna, Quality Planning and Analysis, McGraw Hill . 2. K.K. Chitkara, Construction Project Management, Tata McGraw Hill . 3. Besterfield et al., Total Quality Management, Pearson . 4. Oakland, Statistical Process Control, Routledge.
Reference books	1. Pyzdek & Keller, the Six Sigma Handbook, McGraw Hill. 2. Love, Building Information Modeling a Strategic Implementation Guide. 3. ISO 9001:2015 Standards Documentation. 4. ASCE Manuals on Quality in Construction.

23CE7206 CONSTRUCTION QUALITY CONTROL & MONITORING

Course Category:	Open Elective/ Job Oriented Elective-4 (NPTEL/ SELF LEARNING)	Credits:	3
Course Type:	Theory/Practical	Lecture - Tutorial - Practice:	3-0-0
Prerequisites:	Building materials and construction, Concrete Technology	Continuous Evaluation:	30
		Semester end Evaluation:	70
		Total Marks:	100

Course Outcomes	Upon successful completion of the course, the student will be able to:													
	CO1	Explain the principles and practices of quality management in construction projects.												
	CO2	Describe quality control inspection procedures for various construction activities.												
	CO3	Analyze pavement quality evaluation and road inspection methods.												
	CO4	Explain sustainable construction practices and green building assessment systems.												
Contribution of Course Outcomes towards achievement of Program Outcomes (1 – Low, 2 - Medium, 3 – High)		PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO10	PO 11	PSO 1	PSO 2
	CO1	3	2	1						1	1	2	1	1
	CO2	3	3	2	2	1				1	1	2	2	3
	CO3	3	3	2	2	2	1			1	1	2	2	3
	CO4	2	2	2	1	1	3	2		1	1	2	3	2
Course Content	UNIT – I													
	FUNDAMENTALS OF TOTALQUALITY MANAGEMENT (TQM) IN CONSTRUCTION													
	Concept of Quality Control, Quality Assurance and Quality Management; Objectives and principles of TQM; Development and design concepts of TQM; Quality planning and quality improvement techniques; ISO standards and quality auditing in construction industries.													
	STATISTICAL AND DOCUMENTATION PRACTICES IN QUALITY MANAGEMENT													
	Statistical quality control methods; Quality documentation procedures; Construction records and reporting systems; Accuracy in calculations; Estimation of area and volume; Quality monitoring techniques in construction projects.													
Course Content	UNIT II													
	QUALITY CONTROL INSPECTION FOR BUILDING CONSTRUCTION													
	Duties, responsibilities and qualification of quality control staff; Inspection procedures and checklists for quality of materials; Quality control in masonry and plastering works; Concrete construction quality control – batching, mixing, transporting, placing, compaction, finishing and curing.													
	SPECIALIZED CONSTRUCTION QUALITY MANAGEMENT													
	Quality inspection of reinforcement and formwork; Quality control in timber and steel construction; Inspection of doors, windows, plumbing and drainage systems; Quality management practices in high-rise buildings and large infrastructure projects.													
Course Content	UNIT III													

	PAVEMENT MATERIALS AND MIX DESIGN Principles of pavement material quality assessment; Quality control tests for aggregates and bitumen; Marshall Mix Design; Determination of optimum binder content; IRC specifications for pavement quality control. PAVEMENT EVALUATION AND ROAD INSPECTION Pavement evaluation methods – Benkelman Beam Method and Falling Weight Deflectometer (FWD) Method; Flexible and rigid pavement quality evaluation; Causes of pavement failures; Maintenance quality assessment and road inspection procedures. UNIT – IV SUSTAINABLE BUILT ENVIRONMENT Concepts of sustainable development and green buildings; Green building definitions and principles; Green construction materials and technologies; Energy-efficient building systems; Water conservation and waste management techniques. GREEN BUILDING ASSESSMENT AND LIFE CYCLE ANALYSIS Goals, advantages and limitations of green buildings; Introduction to Life Cycle Assessment (LCA); IGBC and GRIHA rating systems; Sustainable materials and assessment of building performance; Green building certification procedures.

23CE7652 COMPUTER AIDED CONSTRUCTION MANAGEMENT

Course Category:	Advanced Skill Course	Credits:	2
Course Type:	Theory cum Practice	Lecture - Tutorial - Practice:	0-1-2
Prerequisites:	---	Continuous Evaluation:	30
		Semester end Evaluation:	70
		Total Marks:	100

Course Outcomes	Upon successful completion of the course, the student will be able to:													
	CO1	understand the planning and scheduling, networking methods, resource optimization techniques in various construction projects												
	CO2	apply Network Diagram with the identification of activities and their underlying relationships and Create a Work Breakdown Structure (WBS)												
	CO3	analyse project plan and measure variances and report performances												
	CO4	apply various resources like labor, non-labor, material, critical path, forward/backward pass, resource leveling and base lining												
Contribution of Course Outcomes towards achievement of Program Outcomes (1 – Low, 2 - Medium, 3 – High)		PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO10	PO 11	PSO 1	PSO 2
	CO1	1	2	2	2	3	3		2			3		2
	CO2	1	2	2	2	3	3		2			3		2
	CO3	1	2	2	2	3	3		2			3		2
	CO4	1	2	2	2	3	3		2			3		2
Course Content	UNIT – I INTRODUCTION -BASIC CONCEPTS Project ,Project Management, Five Process Groups of Project Management, Schedule and its Importance, Project Management Through Networks, Critical Path Method, PERT for Scheduling, Understanding a Gantt Chart, Project Management Fundamentals, Optimization of cost through networks, Resource Allocation Techniques. INTRODUCTION TO MS PROJECT - Tools in MS Project - MS Project Interface and Preferences													
	UNIT – II WBS - Organizational Breakdown Structure. - Creating WBS in MS Project - Work Breakdown Structure - Access Control in MS Project													

	PLANNING AND CREATING A NEW PROJECT • Planning your Project Schedule, • Understanding a Sample Project, • Creating a New Project in MS Project, • Project Window Options, • Total Float and Project Must Finish Date
	UNIT – III RESOURCES • Resources allocation and cost estimation. CALENDARS • Role of Calendars in Scheduling, • Adding and Assigning Calendars
	UNIT – IV BASIC FORMATTING • Formatting Columns and Timescale • Percentage Complete Types in MS Project FORMULATING ACTIVITIES • Activity Types in MS Project • Setting Defaults for New Activities • Adding Activities • Estimating Duration of Activities • Adding Duration of Activities • Tracking the Project

23CE7551 INDUSTRIAL / RESEARCH INTERNSHIP

Course Category:	Internship / Project	Credits:	2
Course Type:	practical	Lecture - Tutorial - Practice:	0 – 0 - 0
Prerequisites:	---	Continuous Evaluation:	30
		Semester end Evaluation:	70
		Total Marks:	100

Course Outcomes	Upon successful completion of the course, the student will be able to:													
	CO1	Understand industrial practices, workflows and professional environment in civil engineering.												
	CO2	Apply engineering knowledge to solve real-world problems during internship.												
Contribution of Course Outcomes towards achievement of Program Outcomes (1 – Low, 2 - Medium, 3 – High)		PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO10	PO 11	PSO 1	PSO 2
	CO1	2	2	1	1	1	2	2	2	2	1	2	2	2
	CO2	3	3	2	2	2	2	1	2	2	2	2	3	3
Course Content	Industry-Based Internship: - Students are required to undergo a mandatory summer internship in an industry approved by the respective Head of the Department for a minimum duration of eight weeks after the completion of VI semester examinations, and submit the internship report in the VII semester. The evaluation will be carried out by a departmental committee, and each student must submit a detailed report along with a certificate of successful completion from the industry, and deliver an oral presentation before a panel comprising the Head of the Department, internship supervisor, and a senior faculty member. - The assessment will be based on 40% weightage for the report and 60% for the presentation. The college will facilitate and monitor the internship process, and successful completion of the internship is mandatory for the award of the degree; students who fail to complete it must repeat and successfully fulfill the requirement.

23CE8551 MAJOR PROJECT AND INTERNSHIP

Course Category:	Internship/ Project	Credits:	12
Course Type:	practical	Lecture - Tutorial - Practice:	0 – 0 - 24
Prerequisites:	----	Continuous Evaluation:	30
		Semester end Evaluation:	70
		Total Marks:	100

Course Outcomes	Upon successful completion of the course, the student will be able to:													
	CO1	Apply engineering knowledge, problem analysis, and modern engineering tools to address real-time problems encountered during internship and project work.												
	CO2	Design and develop solutions based on field exposure/internship experience considering societal, environmental, and sustainability aspects.												
	CO3	Conduct investigations, analyze data, and prepare a comprehensive technical report following standard professional practices.												
	CO4	Demonstrate professional competencies including teamwork, communication, project management, ethics, and lifelong learning through project execution and presentation.

Course Content	Major Project and Internship (VIII Semester): In the final (VIII) semester, students are required to mandatorily undergo an internship (onsite or virtual) while simultaneously working on a project with well-defined objectives. At the end of the semester, the student must submit both an internship completion certificate and a comprehensive project report; the project may be based on the work carried out during the internship. The major project involves the preparation and presentation of the report on the internship work, and students are encouraged to publish their findings in reputed journals or conferences. The project report and presentation shall be evaluated by a committee, including an external examiner.

	➤ Internship & Professional Networking Platforms • AICTE Internship Portal: Centralized portal offering verified internships across industries in India. • Internshala: Provides internships, training, and career support resources. • LinkedIn: Enables industry networking, job search, and professional learning. ➤ Technical Learning & Academic Content • NPTEL: Domain-specific courses in civil engineering, project management, and construction practices. • SWAYAM: Free online courses aligned with academic curriculum. • MIT OpenCourseWare: Advanced engineering lectures and real-world case studies. ➤ Research, Publications & Reference Databases • IEEE: Access to research papers and guidelines for technical documentation. • Google Scholar: Literature review and citation tracking for project work. • ResearchGate: Access to research publications and collaboration opportunities. ➤ Engineering Software & Tools : Examples: • AutoCAD: Drafting and design of engineering drawings. • STAAD Pro: Structural modeling and analysis. • ETABS: Building analysis and design. • Microsoft Excel: Data analysis, estimation, and calculations. • Building Information Modeling (BIM) Tools • Autodesk Revit: Used for 3D modeling, coordination, and integrated design of building systems. • Navisworks: Facilitates clash detection, simulation, and project review. • Autodesk BIM 360: Enables collaborative project management and real-time data sharing. • Project Planning & Management Tools • Primavera P6: Industry-standard tool for project scheduling, resource allocation, cost control, and monitoring. • Microsoft Project: Used for planning, scheduling, and tracking project activities. ➤ Documentation & Presentation Tools • Microsoft Word: Preparation of project reports and internship documentation. • Microsoft PowerPoint: Preparation of seminar and viva presentations. • Mendeley: Citation management and bibliography generation.

MINORS

23CEM4701 INTRODUCTION TO CIVIL ENGINEERING – CONCEPTS AND MATERIALS

Course Category:	Minor	Credits:	3
Course Type:	Theory	Lecture - Tutorial - Practice:	3 - 0- 0
Prerequisites:	---	Continuous Evaluation:	30
		Semester end Evaluation:	70
		Total Marks:	100

Course Outcomes	Upon successful completion of the course, the student will be able to:														
	CO1	Understand the evaluation criteria for civil engineering materials and the use of stone as a primary construction component.													
	CO2	Evaluate the quality and properties of bricks and timber through appropriate testing methods.													
	CO3	Apply standard tests on cement and understand the varieties and applications of concrete.													
	CO4	Analyze the quality, characteristics, and performance of steel and paints used in construction.													
Contribution of Course Outcomes towards achievement of Program Outcomes (1 – Low, 2 – Medium, 3 – High)		PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO10	PO 11	PSO 1	PSO 2	
	CO1	3						2						3	
	CO2	3						2						3	
	CO3	3						2						3	
	CO4	3						2						3	
Course Content	UNIT – I INTRODUCTION General Introduction to Civil Engineering; History of Civil Engineering; Relevance of Civil Engineering in the overall infrastructural development of the country. STONES: Classification of rocks; Qualities of a good building stone; Uses of Stones; Stone quarrying; Tools for blasting; Common building stones of India. UNIT – II BRICKS: Composition of good brick earth; Qualities of good bricks; Tests for bricks; Classification of bricks; Size and weight of bricks. TIMBER: Definition; Structure of a tree; Qualities of good timber; Preservation of timber; Seasoning of timber; Advantages of timber construction; Use of timber.														

	UNIT – III CEMENT Basic Ingredients; Grades of cement; Properties of cement; Field tests on cement. CONCRETE Definition; properties; Special Concretes-Light weight concrete, High density concrete, Fibre reinforced concrete, Polymer concrete. UNIT – IV STEEL General; Manufacture of steel; Uses of steel; Market forms of steel; Properties of mild steel; Properties of hard steel; PAINTS, VARNISHES AND DISTEMPERS General; Painting; Varnishing; Distempering; Wall paper; White washing; Colour washing.
Text books	[T1] Engineering Materials by S. C. Rangwala; Charotar Publishing House. [T2] Building construction by B. C. Punmia -Laxmi Publications, New Delhi.
Reference books	[R1] Building construction and construction materials by G.S.Birdie and T.D.Ahuja, Dhanpathrai publishing company, New Delhi.
E-resources and other digital material	http://nptel.ac.in/courses/105102088/

Course Category:	Minor	Credits:	3
Course Type:	Theory	Lecture - Tutorial - Practice:	3 - 0- 0
Prerequisites:	---	Continuous Evaluation:	30
		Semester end Evaluation:	70
		Total Marks:	100

Course Outcomes	Upon successful completion of the course, the student will be able to:													
	CO1	Assess the feasibility aspects of a construction project.												
	CO2	Apply planning principles and interpret construction contract procedures.												
	CO3	Analyze construction finance and examine the organizational structure of a project.												
	CO4	Assess construction materials and apply suitable quality control procedures.												
Contribution of Course Outcomes towards achievement of Program Outcomes (1 – Low, 2 - Medium, 3 – High)		PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO10	PO 11	PSO 1	PSO 2
	CO1	1	1	1							1	2		1
	CO2	1	1	1							1	2		1
	CO3	1	1	1						1	1	2		1
	CO4	1		1							1	2		1
Course Content	UNIT I: INTRODUCTION Role of government and construction agencies, classification of construction works, various stages in construction of a project, the construction team. PROJECT FEASIBILITY REPORTS Introduction, technical analysis, financial analysis, economic analysis, ecological analysis, schematic diagram for feasibility study. UNIT II: PLANNING FOR CONSTRUCTION PROJECTS General, steps involved in planning, objectives, principles, advantages of planning, limitations, stages and types of planning, stages of planning by different agencies. CONSTRUCTION CONTRACTS & TENDERS General, contract documents, types of contract, tender notice, types of tenders, tender													

	documents, Earnest money deposit and security deposit. UNIT III: CONSTRUCTION FINANCING AND CONTROL Introduction, costs associated with constructed facilities, estimates, effect of scale on construction cost, means of financing, application of financial assistance, cost control. ORGANISING FOR CONSTRUCTION Importance, general principles, types of organization structures, forms of business organizations. UNIT – IV: MATERIALS MANAGEMENT Importance, Objectives, Costs, functions of material management, uses, stores management, material procurement, maintaining stocks, material handling. QUALITY CONTROL IN CONSTRUCTION Elements of quality, Organisation for quality control, Quality assurance techniques, Documentation, Quality control circles, variation
Text books	[T1] Dr.S.Seetharaman, 『Construction Engineering and Management』, 5th Edition, Umesh Publications, New Delhi,
Reference books	[R1] Kumar Neeraj Jha, —Construction Project Management』, 2nd Edition, Pearson Education India, New Delhi, 2015

23CEM6701 SYSTEM DESIGN FOR SUSTAINABILITY

Course Category:	Minor	Credits:	3
Course Type:	Theory	Lecture - Tutorial - Practice:	3 - 0- 0
Prerequisites:		Continuous Evaluation:	30
		Semester end Evaluation:	70
		Total Marks:	100

Course Outcomes	Upon successful completion of the course, the student will be able to:													
	CO1	Understand the sustainable product-service systems (SPSS) and their application in distributed renewable energy systems,												
	CO2	Apply SPSS to distributed renewable energy systems and exploring their sustainability.												
	CO3	Understand methodologies for design for Sustainability, and role in promoting eco-efficiency and social equity,												
	CO4	Acquire knowledge on methods and tools for system design for sustainable energy, and design strategies to real-world case studies.												
Contribution of Course Outcomes towards achievement of Program Outcomes (1 – Low, 2 - Medium, 3 – High)		PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO10	PO 11	PSO 1	PSO 2
	CO1	1		1			2	1						2
	CO2	1		1			2	1				1		2
	CO3	1		1			2	1				1		2
	CO4	1		1			2	1				1		2
Course Content	UNIT I : INTRODUCTION Addressing sustainability by design; an introduction to sustainable product-service systems Applied to distributed renewable energy; United nations sustainability energy for all agenda DISTRIBUTED ENERGY SYSTEMS Distributed renewable energy systems and Integrating SPSS with DE. UNIT II : SUSTAINABLE PRODUCT-SERVICE SYSTEM (SPSS) Introduction to SPSS; Types; Sustainability Benefits; Barriers and Limits. SUSTAINABLE PRODUCT-SERVICE SYSTEM APPLIED TO DISTRIBUTED RENEWABLE ENERGIES A Win-Win opportunity; Scenario for SPSS applied to distributed renewable energy (DRE); SPSS applied to DRE: Sustainability Potential Benefits; SPSS applied to DRE: Sustainability Potential Benefits.													

	UNIT III: DESIGN FOR SUSTAINABILITY Evolution of design for sustainability ; Product life cycle design or Eco-Design ;Design for Eco-Efficient Product-Service Systems; Design for Social Equity and Cohesion; Design for Socio-Technical Transitions; State of the art of design for Sustainability Human Centred and Universal Design. SYSTEM DESIGN FOR SUSTAINABLE ENERGY FOR ALL: A NEW ROLE FOR DESIGNERS System design for sustainable energy for all (SD4SEA); SDSEA Design Criteria, Guidelines and Examples. UNIT IV: METHOD AND TOOLS FOR SYSTEM DESIGN FOR SUSTAINABLE ENERGY FOR ALL(SD4SEA) Method for system design for sustainable energy for all; Sustainability design orienting Scenario; (SDOS) on S.PSS&DRE; Sustainable energy for all idea Tables and Cards; E.DRE—Estimator for Distributed Renewable Energy; PSS + DRE Innovation Map S.PSS + DRE Design Framework & Card ; The Energy System map innovation diagram for S.PSS& DRE; Concept Description Form for S.PSS and DRE Stakeholder Motivation and Sustainability Table. PRACTICAL EXAMPLES OF APPLICATION OF SDSEA APPROACH/TOOLS AND OTHER METHODS TO ACHIEVE SUSTAINABILITY Solar Energy Company, Botswana; SMEs for Energy, Uganda ; Summary and Considerations; green design; emotionally durable design; cradle to cradle design, bio mimicry design; design for base of a pyramid design; design for social innovation.
Text books	[T1] FabrizioCeschin, İdilGaziulusoy, Design for Sustainability A Multi- level Framework from Products to Socio- technical Systems, Taylor and Francis, 2020. 23CEM6702 ECOLOGY AND ENVIRONMENT

Course Category:	Minor	Credits:	3
Course Type:	Theory	Lecture - Tutorial - Practice:	3 - 0- 0
Prerequisites:		Continuous Evaluation:	30
		Semester end Evaluation:	70
		Total Marks:	100

Course Outcomes	Upon successful completion of the course, the student will be able to:													
	CO1	Apply the concepts of ecology and sustainability to understand and assess human impacts on the environment.												
	CO2	Choose suitable water demand principles and water quality standards to assess the needs of a water supply system.												
	CO3	Utilize basic water treatment and distribution processes to examine the performance of potable												
	CO4	Analyze the effect of various attributes of environmental pollution												
Contribution of Course Outcomes towards achievement of Program Outcomes (1 – Low, 2 - Medium, 3 – High)		PO 1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PSO1	PSO2
	CO1	1						2					1	1
	CO2	2			3		1							2
	CO3	2		3			1						1	2
	CO4	1		2	1									2
Course Content	UNIT I: INTRODUCTION TO ECOLOGY AND ENVIRONMENT Definition, scope & importance, need for public awareness- environment - definition, ecology, eco system - balanced ecosystem, human activities - food, shelter, economic and Social security. SUSTAINABILITY Sustainability – definition, significance, sustainability goals, impacts of climate change, Case Studies. UNIT II: WATER SUPPLY – QUANTITY OF WATER Sources of water, objectives of water supply systems, Per capita consumption; Types of demands; Fluctuations in demand.													

	QUALITY OF WATER Water purity characteristics; analysis of water samples - physical, chemical and biological tests; Standards for drinking water as per W.H.O; Water borne diseases. UNIT III: WATER TREATMENT Fundamentals on water purification; sedimentation; coagulation and types of coagulants; sedimentation and coagulation tanks uses and importance; theory of filtration; slow sand and rapid sand filters; operation; disinfection methodologies DISTRIBUTION SYSTEMS Methods of supply; Layouts, Plumbing-pipes and fittings; Traps; One pipe and Two pipe Systems. UNIT – IV ENVIRONMENTAL POLLUTION Environmental Pollution: Water pollution, Land and soil pollution, Air pollution, their impacts and on health and environment. SOLID WASTE MANAGEMENT Solid waste characteristics–basics on on-site handling, collection –separation and processing – Incineration- Composting-Solid waste disposal methods – Fundamentals of land filling.
Text books	[T1] Benny Joseph, — Environmental Studies, Tata Mc Graw Hill, 2005 [T2] Ignaci Muthu S, — Ecology and Environment, Eastern Book Corporation, 2007 [T3] Birdie G.S. and Birdie J. S., — Water Supply and Sanitary Engineering, 9th ed., Dhanpat Rai Publishing Company, New Delhi, 2015.
Reference books	[R1] Garg S. K., — Environmental Engineering Vol. I & II- Water supply engineering, Khanna Publishers, New Delhi, 2017. 23CEM7702B NPTEL (Mandatory Course Based on Availability)

HONORS

23CEH4801A STABILITY OF STRUCTURES

Course Category:	Program core	Credits:	3.0
Course Type:	Theory	Lecture - Tutorial - Practice:	3 - 0- 0
Prerequisites:	Honors	Continuous Evaluation:	30
		Semester end Evaluation:	70
		Total Marks:	100

Course Outcomes	Upon successful completion of the course, the student will be able to:													
	CO1	Analyze the buckling behavior of columns and beam-columns and compute critical loads using energy and non-energy methods.												
	CO2	Examine and analyze the lateral buckling of beams using both energy and non-energy approaches.												
	CO3	Evaluate the buckling of rectangular plates and determine critical compressive loads for various boundary conditions												
	CO4	Analyze the buckling behavior of axially loaded cylindrical shells.												
Contribution of Course Outcomes towards achievement of Program Outcomes (1 – Low, 2 - Medium, 3 – High)		PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO10	PO 11	PSO 1	PSO 2
	CO1	1		3	2		1						2	
	CO2	1		3	2		1						2	
	CO3	1		3	2		1						2	
	CO4	1		3	2		1						2	
Course Content	UNIT-I Buckling of columns: Introduction; Methods of finding critical loads; Critical loads for straight columns with different end conditions and loading; Inelastic buckling of axially loaded columns; Energy methods; Prismatic and non-prismatic columns under discrete and distributed loading. Beam Columns – Theory of Beam column – Stability analysis of beam column with different types of loads.													
	UNIT-II Lateral Buckling of Beams: Beams under pure bending; Cantilever and simply supported beams of rectangular and I sections; Beams under transverse loading; Energy methods; Solution of simple problems.													
	UNIT-III													

	Buckling of Rectangular Plates: Plates simply supported on all edges and subjected to constant compression in one or two directions; Plates simply supported along two opposite sides perpendicular to the direction of compression and having various edge conditions along the other two sides UNIT-IV Buckling of Shells: Introduction to buckling of axially compressed cylindrical shells, Linear theory of cylindrical shells-donnell equations, critical load of an axially loaded cylinder, failure of axially compressed cylindrical shells
Text books	1. Theory of elastic stability by Timoshenko & Gere, McGraw Hill, 1961. 2. Background to buckling by Allen and Bulson, McGraw- Hill, 1980.
Reference books	1. Elastic stability of structural elements by N.G.R.Iyengar, Macmillan India Ltd., 2007. 2. Principles of Structural stability theory by Alexandar Chajes

23CEH4801B SUSTAINABLE CONSTRUCTION METHODS

Course Category:	Honors	Credits:	3
Course Type:	Theory	Lecture - Tutorial - Practice:	3 - 0- 0
Prerequisites:	---	Continuous Evaluation:	30
		Semester end Evaluation:	70
		Total Marks:	100

Course Outcomes	Upon successful completion of the course, the student will be able to:													
	CO1	Understand the concepts of green buildings and sustainable design principles.												
	CO2	Apply water conservation and energy efficiency strategies in building design and operations.												
	CO3	Implement sustainable materials and practices to promote resident health and wellbeing.												
	CO4	Utilize principles of green rating systems in construction.												
Contribution of Course Outcomes towards achievement of Program Outcomes (1 – Low, 2 - Medium, 3 – High)		PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO10	PO 11	PSO 1	PSO 2
	CO1	1		1				2						1
	CO2	1		1				2						1
	CO3	1		1			2	2						2
	CO4	1		1				2						2
Course Content	UNIT I: INTRODUCTION Green building, Global warming, requirement of Green Building, Benefits of green Buildings SUSTAINABLE DESIGN Local building requirements, soil erosion control, natural topography, vegetation, heat island effect, roof & non-roof, passive architecture, basic house hold amenities, green education & awareness UNIT II: WATER CONSERVATION Water efficient plumbing fixtures, rain water harvesting, landscape design, management of irrigation system, recycle and reuse of waste water, water quality ENERGY EFFICIENCY HCFC free equipment, minimum energy performance, enhance energy performance, alternate													

	water heating systems, on-site renewable energy – common lighting, energy efficiency in common area equipment, integrated energy monitoring system UNIT III: MATERIALS & RESOURCES Separation of house-hold waste, green procurement policy, local materials, eco friendly wood based materials, alternate construction material, handling of construction & demolition material. RESIDENT HEALTH & WELLBEING Minimum day lighting, Ventilation design, no smoking policy, enhanced day lighting, enhanced ventilation design, cross ventilation UNIT – IV CONSTRUCTION AND OPERATIONS Construction, Occupancy & Operations GREEN RATING SYSTEMS IGBC, LEED, GRIHA, BEE, benefits of rating systems, procedure to get IGBC certification
Text books	[T1] IGBC Green homes rating system Version 3.0 – A bridged reference guide, September 2019 [T2] Jerry Yudelson, —Green building through Integrated design, Mc Graw Hill, 2009 [T3] Gautham R K, —Green Homes, BSP Books Private Limited, New Delhi, 2009.
Reference books	[R1] —Sustainable building technical manual- Green building design, constructions and operation, Produced by Public Technology Inc., US Green Building Council

23CEH4801C DESIGN OF FORMWORK

Course Category:	Honors	Credits:	3
Course Type:	Theory	Lecture - Tutorial - Practice:	3-0-0
Prerequisites:		Continuous Evaluation: Semester end Evaluation: Total Marks:	

Course outcomes	Upon successful completion of the course, the student will be able to:													
	CO1	Select appropriate materials for manufacturing false work and formwork suited to specific												
	CO2	Analyze the pressure exerted by concrete on formwork to ensure structural safety.												
	CO3	Evaluate the adequacy of decking, formwork, and falsework for construction loads.												
	CO4	Assess the construction sequence of civil engineering structures and implement safety measures in the design of formwork and falsework.												
Contribution of Course Outcomes towards achievement of Program Outcomes (Low – 1, Medium - 2, High – 3)		PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO 10	PO 11	PSO 1	PSO 2
	CO1						1	1						2
	CO2	2		1									2	
	CO3	3		3			1						3	1
	CO4	1					2	1					2	
Course Content		UNIT – I INTRODUCTION Formwork and false work, Temporary work systems, Construction planning and site constraints.												
		MATERIALS OF FORMWORK Materials and construction of the common formwork and false work systems, Special and proprietary forms.												
		UNIT – II FORM WORK Formwork – Design: Concrete pressure on forms, Design of timber and steel forms												
		ANALYSIS OF FORMWORK Loading and moment of formwork.												

	UNIT – III DESIGN OF DECKS Types of beam, decking and column formwork, Design of decking FALSE WORKS False work design, Effects of wind load, Foundation and soil on false work design.
	UNIT – IV SPECIAL FORMS The use and applications of special forms. CONSTRUCTION SEQUENCE AND SAFETY IN USE OF FORMWORK Sequence of construction, Safety use of formwork and false work.
Text books	[T1] Robert L. Peurifoy and Garold D. Oberiender, —Formwork for Concrete Structures‡, McGraw-Hill, 1996. [T2] TudorDinescu and Constantin Radulescu, —Slip Form Techniques‡, Abacus Press, Turn Bridge Wells, Kent, 2004.
Reference books	[R1] Austin, C.K., —Formwork for concretel‡, Cleaver - Hume Press Ltd., London, 1996 [R2] Michael P. Hurst, —Construction Press‡, London and New York., 2003

23CEH5801A ENGINEERING ROCK MECHANICS

Course Category:	Program Core	Credits:	3
Course Type:	Theory	Lecture - Tutorial - Practice:	3 - 0- 0
Prerequisites:	Geotechnical Engineering	Continuous Evaluation:	30
		Semester end Evaluation:	70
		Total Marks:	100

Course Outcomes	Upon successful completion of the course, the student will be able to:													
	CO1	Assess rock masses using established classification systems.												
	CO2	Apply laboratory and field tests to determine the engineering properties of rocks.												
	CO3	Analyze rocks based on failure criteria to predict their behavior under load.												
	CO4	Evaluate the bearing capacity of foundations on rocks and assess the stability of rock slopes.												
Contribution of Course Outcomes towards achievement of Program Outcomes (1 – Low, 2 – Medium, 3 – High)		PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO10	PO 11	PSO 1	PSO 2
	CO1	3		2			3							1
	CO2	3		2			3							1
	CO3	3		2			3							1
	CO4	3		2			3							1
Course Content	UNIT I: INTRODUCTION TO ROCK MECHANICS AND CLASSIFICATION OF ROCKS Objectives of rock mechanics, Fields of application of rock mechanics. Geological Classification of igneous, sedimentary and metamorphic rocks based on texture and stratification. ROCK MASS CLASSIFICATIONS Rock Quality Designation (RQD), Rock Structure Rating (RSR), Rock Mass Rating (RMR). UNIT II: LABORATORY TESTS - PHYSICO —MECHANICAL PROPERTIES OF ROCKS Compressive strength, Tensile strength, Direct shear test, Triaxial shear test, Slake durability test, Schmidt rebound hardness test FIELD TESTS - PHYSICO —MECHANICAL PROPERTIES OF ROCKS Uniaxial jacking test, Pressure meter tests, Hydraulic fracturing, Flat jack test. Electric resistivity method, Seismic refraction method.													

	UNIT III: FAILURE CRITERIA FOR ROCK AND ROCK MASSES Mohr-Coulomb Yield Criterion, Hoek-Brown Criterion. STRENGTH AND DEFORMABILITY OF JOINTED ROCK MASS Shear strength of Rock joints, Deformability of Rock joints, Concept of joint compliance. UNIT – IV FOUNDATION ON ROCKS Estimation of bearing capacity, Settlement in rocks, Pile foundation in rocks. STABILITY OF ROCK SLOPES AND METHODS TO IMPROVE ROCK MASS RESPONSES Modes of failure, Grouting in Rocks, Rock bolting, Rock Anchors.
Text books	[T1] Goodman-Introduction to Rock mechanics, Willey International (1980). [T2] Nagaratnam Sivakugan, Sanjay Kumar Shukla and Braja M. Das-Rock Mechanics-An Introduction, CRC Press, (2013) [T3] Ramamurthy, T. - Engineering in Rocks for slopes, foundations and tunnels, Prentice Hall of India. (2007)
Reference books	[R1] Jaeger, J. C. and Cook, N. G. W. — Fundamentals of Rock Mechanics, Chapman and Hall, London. (1979). [R2] Hoek, E. and Brown, E. T. Underground Excavation in Rock, Institution of Mining and Metallurgy, 1982. [R3] Rock mechanics for engineers: Varma, B.P, Khanna Publishers

23CEH5801/B ADVANCED STEEL DESIGN

Course Category:	Program Core	Credits:	3
Course Type:	Theory	Lecture - Tutorial - Practice:	3 - 0- 0
Prerequisites:	Design of steel structures	Continuous Evaluation:	30
		Semester end Evaluation:	70
		Total Marks:	100

Course Outcomes	Upon successful completion of the course, the student will be able to:													
	CO1	Determine the safe section for eccentric connections.												
	CO2	Design safe sections for tension members with lug angles and built-up compression members.												
	CO3	Evaluate the safe section of plate girders.												
	CO4	Assess the safe section for gantry girders.												
Contribution of Course Outcomes towards achievement of Program Outcomes (1 – Low, 2 - Medium, 3 – High)		PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO10	PO 11	PSO 1	PSO 2
	CO1	2		2				1					3	
	CO2	2		2				1					3	
	CO3	2		2				1					3	
	CO4	2		2				1					3	
Course Content	UNIT – I: SEATED CONNECTIONS Introduction to Connections, Unstiffened seated connections-bolted and welded, Stiffened seated connection-bolted and welded BRACKET CONNECTIONS Bracket Connections, type I-bolted and welded, Bracket connection type2-bolted and welded UNIT II: TENSION MEMBERS (ISS00-2007) Design of tension members with Lug angles with bolted and welded connections. COMPRESSION MEMBERS (ISS00-2007) Design of axially loaded built up compression members with Laced and Battened columns with													

	bolted and welded connections. UNIT III: INTRODUCTION TO PLATE GIRDERS Introduction to plate girder, Elements eccentric depth, Design of web and flanges, Design of plate girders without stiffeners, Problems DESIGN OF PLATE GIRDERS Design of plate girders with stiffeners, Design of plate girders with intermediate stiffeners, Problems on plate girders with intermediate stiffeners UNIT III: INTRODUCTION TO GANTRY GIRDER Introduction, Various loads, Load effects, explanation of how to calculate loads, Calculation of Maximum SF and Maximum BM using influence lines, Deflections DESIGN OF GANTRY GIRDER Design of Gantry Girder, Problems on design of gantry girder.
Text books	[T1] Duggal, S.K., Limit State Design of Steel Structures, McGraw-Hill, NDLS, 2019. [T2] Bhavikatti, S.S., Design of Steel Structures-By Limit State Method as per IS:800-2007, I. K. IBH Pvt. Ltd., NDLS, 2019.
Reference books	[R1] Subramanian, N., Design of Steel Structures-Limit State Method Oxford University press, HYB, 2018. [R2] Ram, K.S.S., Design of Steel Structures, Pearson Education India, NDLS, 2015. [R3] Chandra, R. and Gehlot, V., Limit State Design of Steel Structures, Scientific Publishers, NDLS, 2010.

23CEH5801C GEOSPATIAL DATA PROCESSING

Course Category:	Honors	Credits:	3
Course Type:	Theory	Lecture - Tutorial - Practice:	3 - 0- 0
Prerequisites:		Continuous Evaluation:	30
		Semester end Evaluation:	70
		Total Marks:	100

Course Outcomes	Upon successful completion of the course, the student will be able to:													
	CO1	Understand the concepts of Geographical information systems and apply them in various engineering applications.												
	CO2	Evaluate appropriate remote sensing data products for mapping, monitoring and management applications.												
	CO3	Implement various image processing techniques and explore their applications.												
	CO4	Apply RS and GIS techniques for solving Engineering applications.												
Contribution of Course Outcomes towards achievement of Program Outcomes (1 – Low, 2 – Medium, 3 – High)		PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO10	PO 11	PSO 1	PSO 2
	CO1	3		3		1								3
	CO2	3		3		2								3
	CO3	3		3		3							2	
	CO4	3		3		3							2	
Course Content	UNIT I: GEOGRAPHICAL INFORMATION SYSTEM Components of GIS, Types of Data, coordinate systems, Geographic coordinate system, Projected coordinate system, Maps and scales, Types of Maps and scales, Projections, Types of Projections, Georeferencing, Data structures, GIS analysis functions. DATA EDITING AND STORAGE Raster and vector data models, Digitization, Data editing, Errors and corrections, data presentation and generation of thematic maps, spatial database management systems, Data representation, Data storage, Entity relationship models. PRACTICE: 1. Introduction to Arc GIS and Georeferencing, projections and re-projections Creating a shape file, clip and attribute data manipulation. UNIT II: INTRODUCTION TO REMOTE SENSING Introduction, Data and Information, Remote sensing data collection, Remote sensing advantages & Limitations, Remote Sensing process. Electromagnetic Spectrum, Energy interactions with atmosphere and with earth surface features (soil, water, and vegetation), Resolution, image registration and elements of visual interpretation techniques.													

	DATA ACQUISITION AND PLATFORMS Indian Satellites and Sensors characteristics, Remote Sensing Platforms, Sensors and Properties of Digital Data, Data Formats: Introduction, platforms-IRS, Landsat, Sentinel, SPOT, CARTOSAT, etc. sensors, sensor resolutions (spatial, spectral, radiometric and temporal), Optical, Thermal and Microwave, signal to noise ratio, LiDAR data acquisition and processing. PRACTICE Data Digitization (Draw, edit, delete and update) UNIT III: IMAGE CLASSIFICATION TECHNIQUES Supervised Classification, Unsupervised classification, ANN and SVM classification techniques SPECTRAL INDICES Vegetation indices, water related indices, Digital elevation model, Digital terrain model, Triangulated irregular networks. PRACTICE Data Analysis – Overlay, Buffer Generation of DEM and DTM using raster data. UNIT – IV APPLICATIONS IN SCIENCE DOMAIN Applications of Remote sensing in various Engineering and Science domains such as Agriculture, Forest, Soil, Geology APPLICATIONS IN ENGINEERING DOMAIN LU/LC, Water Resources, Urban, Disaster Management, etc PRACTICE Assignment on Application of Geospatial techniques in Civil Engineering.

23CEH6801A TRAFFIC ANALYSIS AND DESIGN

Course Category:	Honors	Credits:	3
Course Type:	Theory	Lecture - Tutorial - Practice:	3 - 0- 0
Prerequisites:	NIL	Continuous Evaluation:	30
		Semester end Evaluation:	70
		Total Marks:	100

Course Outcomes	Upon successful completion of the course, the student will be able to:													
	CO1	Understand traffic engineering studies, analyse the data and present the results.												
	CO2	Evaluate traffic and road facilities, and intersection control measures for smooth traffic movement.												
	CO3	Analyse appropriate traffic control and management measures.												
	CO4	Apply the principles of queuing theory to analyse delay at signalized and Un signalized intersections.												
Contribution of Course Outcomes towards achievement of Program Outcomes (1 – Low, 2 - Medium, 3 – High)		PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO10	PO 11	PSO 1	PSO 2
	CO1	3			3					1				
	CO2	3	3								1		3	
	CO3	3					3							3
	CO4	3	3							1				3
Course Content	UNIT I Traffic Engineering Studies and Analysis Sampling in Traffic Studies, Adequacy of Sample Size; Objectives, Methods of Study, Equipment. Data Collection, Analysis and Interpretation Case Studies of (a) Speed (b) Speed and Delay (c) Volume (d) Origin and Destination (e) Parking (f) Accident & other Studies UNIT II Design of Traffic Engineering Facilities Control of Traffic Movements through Time Sharing and Space Sharing Concepts.													

	Design of Islands Design of Channelising Islands, T, Y, Skewed, Staggered, Roundabout, Mini-roundabout and other forms of AT-Grade Crossings including provision for safe crossing of Pedestrians and Cyclists; Grade Separated Intersections, their Warrants and Design Features; Bus Stop Location and Bus Bay Design UNIT III Traffic Regulation and Management Traffic Signs, Markings and Signals; Principles of Signal Design, Webster's method of Signal Design, Redesign of Existing Signals including Case Studies; Signal System and Coordination. Traffic Management measures Speed, vehicle, parking, enforcement regulations, mixed traffic regulation, various management techniques. UNIT – IV Traffic Stream Models Fundamental Equation of Traffic Flow, Speed-Flow-Concentration Relationships, Normalised Relationship, Fluid Flow Analogy Approach, Shock Wave Theory, Platoon Diffusion and Boltzman Like Behaviour of Traffic Flow, Car-Following Theory, Linear and Non-Linear Car-Following Models, Acceleration Noise. Queuing Analysis Fundamentals of Queuing Theory, Demand Service Characteristics, Deterministic Queuing Models, Stochastic Queuing Models, Multiple Service Channels, Models of Delay at Intersections and Pedestrian Crossings.

Course Category:	Honors	Credits:	3
Course Type:	Theory	Lecture - Tutorial - Practice:	3 - 0- 0
Prerequisites:	NIL	Continuous Evaluation:	30
		Semester end Evaluation:	70
		Total Marks:	100

Course Outcomes	Upon successful completion of the course, the student will be able to:													
	CO1	Understanding the economic principles and estimating the various cost components in transportation												
	CO2	Apply the possible project alternatives for the economic analysis and applying the appropriate economic analysis method												
	CO3	Analysing Demand and Supply modelling												
	CO4	Attaining Knowledge on Regulation and Policy making of Economic Evaluation												
Contribution of Course Outcomes towards achievement of Program Outcomes (1 – Low, 2 - Medium, 3 – High)		PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO10	PO 11	PSO 1	PSO 2
	CO1	3	3										3	3
	CO2	3	3			3				1				
	CO3	3			3									
	CO4	3							3		1			3
Course Content	UNIT I Transport Costs and Benefits Principles of economic analysis, Fixed and variable cost, cost of improvement, maintenance cost, cost estimating methods, accounting for inflation, external costs. Consequences of transport projects, road user consequences Reduced vehicle operation costs, value of travel time savings, value of increased comfort and convenience, cost of accident reduction, reduction in maintenance cost, non-user consequences – travel time. UNIT II Economic Analysis Methods Generation and screening of project Alternatives Different methods of economic analysis annual cost and benefit ratio methods, discounted cash flow methods, shadow pricing techniques, determination of IRR and NPV, examples of economic analysis, application economic theory in traffic assignment problem.													

	UNIT III Transport Demand The Basic Framework- measuring the demand in a spatial and temporal setting. Traditional Four-Stage Demand Model; modern approaches to modelling demand and practical issues in demand estimation. Transport Supply The nature of output in transport, output and costs, economies of size, density and scope, empirical estimation of transport cost functions- the approaches and illustrations. UNIT – IV Regulation and policy Theory of Regulation, Deregulation and Privatisation in Transport. Approaches to privatisation of transport infrastructure and services and a competition policy for transport. Evolution of transport policy in India with focus on case studies regarding different modes. Evolution of Policy Evolution of transport policy in India with focus on case studies regarding different modes.

23CEH6801C ADVANCED FOUNDATION ENGINEERING

Course Category:	Honors	Credits:	3
Course Type:	Theory	Lecture - Tutorial - Practice:	3 - 0- 0
Prerequisites:	24CE6404/B Foundation Engineering	Continuous Evaluation:	30
		Semester end Evaluation:	70
		Total Marks:	100

Course Outcomes	Upon successful completion of the course, the student will be able to:													
	CO1	Apply different techniques for determining bearing capacity.												
	CO2	Analyze shallow foundations to assess bearing capacity and settlement.												
	CO3	Evaluate the safe load-carrying capacity of pile foundations under various loading conditions.												
	CO4	Assess the stability of well foundations and caissons.												
Contribution of Course Outcomes towards achievement of Program Outcomes (1 – Low, 2 - Medium, 3 – High)		PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO10	PO 11	PSO 1	PSO 2
	CO1	3		1										2
	CO2	3		1										2
	CO3	3		1										2
	CO4	3		1										2
Course Content	UNIT – I BEARING CAPACITY OF SHALLOW FOUNDATIONS Vesic method; IS Code method; Effect of water table; Footings with eccentric or inclined loads; Footings on layered soils. ESTIMATION OF BEARING CAPACITY BASED ON FIELD TESTS Bearing pressure using SPT & CPT. UNIT – II CONCEPT OF SETTLEMENT – CLASSIC THEORIES Immediate settlement; Consolidation settlement; Secondary compression settlement. SETTLEMENT ESTIMATION - EMPIRICAL METHODS Settlement of foundations on sands – Schmertmann. UNIT – III PILES IN COMPRESSION													

	Static capacity of piles; Point bearing resistance with SPT and CPT; Ultimate capacity of pile groups in compression; Settlement; Pile load test; Negative skin friction. SPECIAL PILES AND SETTLEMENTS OF PILE Laterally loaded piles – Ultimate lateral resistance; Batter piles; Under-reamed piles; Mini and micro piles; Pullout& lateral load; Efficiency; Settlements of pile groups. UNIT – IV WELL FOUNDATIONS Open wells; Design of pier foundations and well foundations; Lateral stability of well foundations; RCC designs of wells. PNEUMATIC CAISSONS Introduction to pneumatic caissons; Construction of piers.

23CEH6801B1 NPTEL Mandatory Course based on Availability

Course Category:	Honors (NPTEL)	Credits:	3
Course Type:	Theory	Lecture - Tutorial - Practice:	3 - 0- 0
Prerequisites:		Continuous Evaluation:	30
		Semester end Evaluation:	70
		Total Marks:	100

PROGRAM OUTCOMES (PO'S):

- PO1: Engineering Knowledge:** Apply knowledge of mathematics, natural science, computing engineering fundamentals and an engineering specialization to the solution of complex engineering problems.
- PO2: Problem Analysis:** Identify, formulate, review research literature and analyze complex engineering problems reaching substantiated conclusions with consideration for sustainable development.
- PO3: Design/Development of Solutions:** Design creative solutions for complex engineering problems and design/develop systems/components/processes to meet identified needs with consideration for the public health and safety, whole-life cost, net zero carbon, culture, society and environment as required.
- PO4: Conduct Investigations of Complex Problems:** Conduct investigations of complex engineering problems using research-based knowledge including design of experiments, modelling, analysis & interpretation of data to provide valid conclusions.
- PO5: Engineering Tool Usage:** Create, select and apply appropriate techniques, resources and modern engineering & IT tools, including prediction and modelling recognizing their limitations to solve complex engineering problems.
- PO6: The Engineer and The World:** Analyze and evaluate societal and environmental aspects while solving complex engineering problems for its impact on sustainability with reference to economy, health, safety, legal framework, culture and environment.
- PO7: Ethics:** Apply ethical principles and commit to professional ethics, human values, diversity and inclusion: adhere to national & international laws.
- PO8: Individual and Collaborative Team work:** Function effectively as an individual, and as a member or leader in diverse/multi-disciplinary teams.
- PO9: Communication:** Communicate effectively and inclusively within the engineering community and society at large, such as being able to comprehend and write effective reports and design documentation, make effective presentations considering cultural, language and learning differences.
- PO10: Project Management and Finance:** Apply knowledge and understanding of engineering management principles and economic decision-making and apply these to one's own work, as a member and leader in a team and to manage projects and in multidisciplinary environments.
- PO11: Life-Long Learning:** Recognize the need for and have the preparation and ability for i) independent and life-long learning ii) adaptability to new and emerging technologies and iii) critical thinking in the broadest context of technological change.

PROGRAM SPECIFIC OUTCOMES (PSO'S):

- PSO1:** Graduates will have an ability to design and develop sustainable civil infrastructure by applying engineering principles to address environmental, social and economic considerations.
- PSO2:** Graduates will have an ability to analyze and understand materials, construction processes and technologies across various civil engineering domains to provide efficient, durable and practical solutions.

Department of Civil Engineering

VELAGAPUDI RAMAKRISHNA SIDDHARTHA SCHOOL OF ENGINEERING

SIDDHARTHA

ACADEMY OF HIGHER EDUCATION

An Institution DEEMED TO BE UNIVERSITY

(Under Section 3 of UGC Act, 1956)
